THE CENSUS

Some Statistics of Population A few of the enumerators of this county have not yet sat for a revision of their enumeration, and quite a number of those who have sat have failed to make a record of the total population in their respective districts. The only way, therefore, that parties interested can get the totals is to count them-no slight task, by the way, when it is remembered there are over eighty districts, each containing from 1,000 to 3,000 inhabitants. We have published from time to time the population of the several districts as far as they have been verified. Not all of the figures have off the semi-annual interests on the bonds been official, but they have been substan-

tially correct. The population of the city has been reported several times, the figures varying a little as corrections were made by the enumerators. The following we believe to be more correct than any heretofore
