The Letters. The letter of Gen. Hancock will not disappoint the American people, whose confidence in his sagacity had been won and its honest men are quitting it. by his able state papers when in command of the department of Louisiana and Texas. It lacks none of their vigor of thought, conciseness of expression and high conviction of constitutional Our country is safe when its government is administered strictly in conformity with the constitution and the laws. The perils which beset it have arisen out of departures from these: the restoration of good government must come and will only come in a return to them. The Democratic party was founded by those who settled our free institutions and organized it to preserve them. Their sheet anchor was the constitution, and the party has had the power to continue itself amid all political vicissitudes, to maintain its organization, its vital principles and its name because it was, and is and will continue to be the party of the constitution, recognizing that the life of the nation is the preservation, each in its in-

tegrity, "of the just powers of the gen-

eral government, the rights of the states

and the liberties of the people."

He who thoroughly appreciates this is is both. If his military training has enabled him to express himself with brevity it is a branch of the soldier's tuous reader of Mr. Quay's advice that education that more of our statesmen he should be so ready to frankly declare needs to be said, and he has carefully avoided what so easily might have been improperly said. It will aid the executive power to usurp the legislative, or the legislative to infringe upon the executive or it will prostitute the judiciary to unfairly control both if it finds advantage in the subversion. Gen. Hancock has not only the statesmanship to know the right relation of all these powers, tain it by enforcing "a free vote, a free ballot and a fair count," by which alone as he says " the people can rule in fact, as required by the theory of our government.

For the purification of the civil service he gives ample security in the announceholder. No incompetent or dishonest person should ever be intrusted with itrejected." In the work of protecting our industries and developing our rethought of the age and in full accord with that enlightened statemanship which comprehends that "to develop our vast natural resources and increase the prosperity and happiness of the people," there must be no class legislation the prejudice of the common weal.

Mr. English's letter is more lengthy than that of the head of the ticket, due no doubt to his more discursive style rather than to any greater weight attaching to his views. He expresses them, however, clearly and positively, and they fully accord with the doctrines of the party in whose promotion would be hastened "the development of material prosperity, the elevation of labor, the enlargement of human rights, the promotion of education, morality, religion, in the grand march of human progress."

To the realization of these grand pur poses Mr. English can give no more substantial aid than by effecting that which at the October battle there.

The Power of Money.

Mr. Quay seems to have some money left; he is reported as having handed his check for \$500 to a ward club in Philadelphia with the remark that what was wanted in this campaign was work and not talk. Mr. Quay has a very correct view of the exigencies of the situation. Mr. Quay is an intelligent man. He also seems to be a man of money. He is reported to have an ambition to be United States senator from Pennsylvania. No doubt Mr. Quay's heart is in this canvass. A man's heart generally follows his pocket; and Mr. Quay's liberality is a very satisfactory sign of his interest in the success of the Republican party. It cannot do better than to take his advice as unhesitatingly as it takes his money. He will prove a better Moses to lead it into the promised land than its candidates with their long worded letters and its orators with their sound and fury and careful avoidance of of the best and greatest men engaged in DeGolyer and Credit Mobilier. I accept the nomination with grateful appreciation of the confidence reposed in me. The principles enunciated by the convention are those I have cherished in the past and shall endeavor to maintain in the future. The amendments to the constitution of the United States embodying the results of the war for the Union are inviolable. Powers not delegated to the United States by the constitution nor prohibited by it to the states belong to the states respectively, or to the people. The general and state governments, each acting in its own sphere without trenching upon the lawful jurisdiction of the other, constitute the Union. This Union, comprising a general government with general powers and state governments with state powers, for purpose local to the states, is a polity the foundations of which were laid in the profoundest wisdom. This is the Union our fathers made, and which has been so respected abroad, and so beneficial at nome. Tried by blood and fire it stands to-day a model form of free popular government, a political system which rightly administered has been and will continue to be the admiration of the world. Public office is a trust, not a bounty bestowed upon the holder. No incompetent or dishonest persons should ever be entrusted with it, or if appointed they should be promptly ejected. The basis of a substantial, practical civil service reform must first be established by the people in filling the elective offices. If they fix a high standard of qualification for office and sternly reject the corrupt and incompetent the result will be decisive in governing the action of the servants whom they entrust with appointing powers.

The war for the Union was successfully closed more than fifteen years ago. All classes of our people must share alike in the blessings of the Union and are equally concerned in its perpetuity and in the proper administration of public affairs. We are in a state of profound peace; henceforth let it be our purpose to culti-vate sentiments of friendship and not of animosity among our fellow citizens. Our material interests varied and progressive, demand our constant and united efforts. A sedulous and scrupulous care of the public credit and economical management of our governmental expenditures should be maintained in order that labor may be lightly burdened and that all persons may be protected in their right to the fruits of their own industry. The time has come to enjoy the substantial benefits of recon ciliation. As one people we have common interests. Let us encourage the harmony and generous rivalry among our own industries, which will revive our languishing merchant marine, extended our commerce with foreign nations, assist our merchants, manufacturers and producers, to develop our vast resources and increase the prosperity and happiness of our people. questioned honesty, trusted often with important public duties, faithful to every trust and in the full meridian of ripe and vigorous manhood, he is in my judgment eminently fitted for the highest office on

earth, the presidency of the United States. Not only is he the right man for the place, but the time has come when the best interests of the country require that the party which has monopolized the execu tive department of the general governmen for the last twenty years should be retired. The continuance of that party in power four years longer would not be beneficial to the public nor in accordance with the spirit of our republican institutions. Laws of entail have not been favored in our system of government. The perpetuation of property or place in one family or set of men has never been encouraged in this country, and the great and good men who formed our republican government and its traditions wisely limited the tenure of office, and in many ways showed their dis approval of long leases of power. Twenty years of continuous power is long enough and has already led to irregularities and corruptions which are not likely to be properly exposed under the same party that perpetrated them.

Besides, it should not be forgotten that the last four years of power held by that party were procured by discreditable means and held in defiance of the wishes of a majority of the people. It was a grievous wrong to every voter and to our system of self-government which should never be forgotten or forgiven. Many of the men pow in office were put there because of corrupt partisan services in thus defeating the fairly and legally expressed will of the majority, and the hypocrisy of the professions of that party in favor of civil service reform was shown by placing such men in office and turning the whole the constitution which in every article, sec- broad of federal office-holders loose to influence the elections. The money of the people taken out of the public treasury by these men for services often poorly performed or government of the United States. The not performed at all, is being used in vast sums with the knowledge and present sanction of the administration to control the elections, and even the members of the cabinet are strolling about the country making partisan speeches instead of being in their departments at Washington, discharging the public duties for which they

are paid by the people. But with all their eleverness and ability discriminating public will no doubt read between the lines of their speeches that their paramount hope and aim is to keep themselves or their satellites four years longer in office. That perpetuating the power of chronic oflice-holders four years onger will not benefit the millions of men and women who hold no office but earn their daily bread by honest industry is what the same discerning public will no doubt fully understand, as they will also that it is because of their own industry and economy and God's bountiful harvests that the country is comparativeby prosperous, and not because of anything done by these federal office-holders. The counconstitutes us one people is justly dear to try is comparatively prosperous not be-

The wise men who formed our constitution knew the evils of a "strong" government and the long continuance of political power in the same hands. knew there was a tendency in this direction in all governments and consequently him. danger to the republican institutions from that cause and took pains to guard against it. The machinery of a strong centralized general government can be used to perpetuate the same set of men in power from term to term until it ceases to be a republie only in name, and the tendency of the party now in power in that direction as shown in various ways besides the willinguess recently manifested by a large number of that party to elect a "president" an unlimited number of times, is quite apparent and must satisfy thinking people that the time has come when it will be the safest and best for the party to be retired. A REPUBLICAN ON HANCOCK.

Interview With Gen. C. S. Hamilton, Re "General, it is reported to-night that since your return from the East, you have stated that you believed Hancock would be elected, and that you intend to vote for

"No, sir," said the general, "I have not said that. I have not said to anyone that I should vote for Hancock. But I will say this freely and frankly: I am a Republican, but I am certain that Hancock will be elected. There is not a particle of doubt about that.

"General, you have just been down in New York. How do matters look there?" New York state is sure for Hancock She will give him 45,000 majority.

"You were at West Point with Hancock, were you not?" "Yes. Grant and I were in the same class. Hancock was one class below us. I have known Hancock well, ever since he was sixteen years old. And Pknow this: When he is elected, he will be pres ident. I mean by that, that no clique or group of politicians will control him. He has a mind of his own, and he will exercise ment of the powers rightfully belonging to it. I do not regard him as to what you it under the constitution. Encroachments might call a 'brilliant' man; but he is a man of good, hard common sense, a safe

And, aside from the fact that is to be exin everywhere now, and finally and forever pected that men who have served in one common cause should hold together, there is a peculiar feeling among soldiers for Gen. Hancock.

Mary O'Brien, aged 16, residing at Black Valley, while out picking berries on the Mine Hill mountain, entered into a clump of bushes for the purpose of securing some blackberries which were there growing on some very high bushes. She felt something unusual rubbing against the lower part of her left limb. She paid no attention to this, however, continuing to pick berries, when suddenly she felt a sharp cutting pain. Springing out from the bushes she found a copperhead snake, of about one yard in length, coiled about her limb. With great presence of mind she took hold of the tail end of this unwelcome companion, and after unwrapping it dashed it to the earth, then seizing a club close by she put an end to its earthly career.
