An Old-Time Republican. One of the ablest and purest and, in all party of this country has had in its ranks and lost from them is Lyman Trumbull.

members against its degradation by un- false as it is silly. principled thieves and time-serving politicians. He left it because he considered it hopelessly corrupt, and he embraced Democracy, not because of any past sympathy with it, but because he saw only in the triumph of its organization any hope for the country. Slander and malice have invented no apology for his course that reflects upon his integrity or his patriotism, nor even upon his good temper. He is conceded to be a pure and upright man. What he says should have weight with his old party friends and that his example is moving some of them, may be inferred from the altogether hopeful contest making by the Democracy of Illinois with Trumbull at the head of their ticket.

Mr. Trumbull in a recent speech reminds his old party friends that without Democratic soldiers no war would have been successfully carried on against the South: without Democratic votes the thirteenth constitutional amendment would not have been passed; that the Democracy alone to-day are a truly national party, and that their candidates this year. He will be quite as good game have the Jeffersonian qualities for office. Mr. Trumbull speaks from the head and the heart. He is with us by the exercise of his judgment no less than by the promptings of his feelings. The logic of events compels him as well as the promptings of his patriotism. Where they lead it is not likely that men like him will fear to follow because of Logan, and Cameron, and Cessna, and that kind. who, when Trumbull was fighting the battles of freedom, were knotting whip crackers for the slave-driver's lash.

Eloquent Figures.

It is a very remarkable showing that five Democratic states of what the Republicans so scornfully and bitterly call the solid South and which can contribute only 43 electoral votes to the election of a Democratic president, sent more Union troops to the front than did some thirteen Northern states which must give their whole 66 electoral votes to any Republican nominee who hopes to be elected. Strange as it may appear the Democratic state of Missouri sent more troops to the war to fight for a restoration of the the great Mormon apostle, and one of the Union than did the Republican states of seven children who prosecuted to success-New Hampshire, Vermont, Rhode Is- ful issuethe suit against his estate, is flourland, Minnesota, Kansas, California ishing around Chicago and an enthusiastic Colorado, Nebraska, Oregon and Ne- reporter describes her as "a particularly Press, Examiner, et id onme genus have vada, though they have 42 Republican handsome and attractive looking woman. electoral votes to Missouri's 15 Demo- with a complexion of great beauty, abun-

Year after year in this section the Democrats have increased their vote until the gap is entirely covered and the opposition is behind. These figures have an eloquence that outspeaks stump orators. They settle and silence the clamor about the solid South. They prove that the capital as well as the laber, the brain and sinew, the hope and confidence of the country, the interests of all sections, are with the Democratic party.

THE Philadelphia grand jury inveighs most bitterly against the office of recorder in that city, and the manner in which it is administered, declaring that the position, which was established against the protests of the business men, is run in such a manner that its incumbent ought to be indicted. No necessity exists for it, and it proves to be just what it was predicted that it would become—a place for mousing politicians to grow fat over William B. Hart by a majorat the public expense. It was established to pension Quay, but as he saw a wider field of operations at the head of the pardoning board and as a candidate for United States senator, he quietly give it over to a congenial friend who, most likely, divides with him. The character of this office, and the nefarious means by which it was established, are characteristic of Republican methods in this state. Those methods aim persistently at building up a party organization at the expense of the public, and whenever existing offices fail to go around new ones are created for the pensioned families. Of those methods Quay is the animating genius. His fertile brain devises them and his conscienceless boldness executes them. His reward is to be a seat in the United States Senate and Demuth is instructed to vote for him.

It is hardly worth while for the New is no danger of the rebel debt, indemnity for slaves, or pensions for Confederate soldiers being paid; for, as it says: compensation amounts to about \$4,300, and threatens his hearers with the payment drawing a clerk's salary from the governof rebel claims, those who are not absolutely ignorant know that he is attempting a gross deceit; for they know that pay a cent of it. So we are of the opinion under our constitution the people never that the method suggested by our neighsurrender themselves or their rights and property into the hands of any party. Not one of them believes in this silly stuff, which yet is a staple of the Republican canvass. Every man outside of a madhouse knows that the Democrats Lancaster Intelligencer, comes to us of the stream, which is deep and rapid the pay taxes, own government bonds and this week double its former size, and is raft began to leak, and the men got alarmed are concerned for the credit and prosper-ity of the country as well as the Repub. ity of the country as well as the Repub- It licans." It hardly pays to say that Congressman Beltzhoover saidthat ex-rebel respects, best men that the Republican congressmen are not disposed to increase the pension list; for that story, if true, would only affect the rebel con vressmen, of Illinois. The leaders of both sides have got down to business and hard work in Indiana, and the Republicans to-day openly confess, for the first time, that Chairman Jewell has been utterly outgeneraled in Indiana. They know that Indiana is naturally a Democratic state; that it elected Hendricks governor in 1872; that it gave 17, 000 Democratic majority in 1874; 5,500 in 1876, and 14,000 in 1878, and they now see the vanity and folly of Jewell's "splendid dress parade" begun by him-self in Indiana more than two momths ago and followed up by a lavish waste of money, parades, speeches and enforced enthusiasm long before the people were ready to take part in the contest. Assessments and double assessments on the officeholders were called for and poured into Indiana before money could effect any lasting good, while English sat calmly on his "bar'l" and waited for his opponents to exhaust themselves. Barnum slipped out to Indianapolis soon after Jewell had exhibited on the tree tops and told how the state was to be carried with a hurrah, and none knew that he came but English. They met, talked the battle over, decided to let the Republicans exhaust their money and enthusiasam, devised the most complete system for reaching every individual voter of the state by actual canvass, and decided to wait until three weeks before the election and then go in with all their resources. No money was scattered around for fireworks or parade; but the canvass was made as a matter of business by English, paid for out of his own pocket, and every weak voter and every weak point of the Republican line is before English to guide him in putting his reserve powers into the struggle 'where they will do the most good." \* \* \* There is not anything like confidence felt in Indiana now at Republican

headquarters. Two weeks ago Jewell was

aglow with enthusiasm over the easy victory he promised himself in the pivotal state; but to-day he and those about him regard Indiana as more than doubtful, because they feel that they have wasted their resources and cannot now meet the Democratic assault that is certain to be made on the state. Another new feature of the state contest that has been unexpectedly developed since Barnum's late visit to Indianapolis, is a fierce, aggressive campaign against Judge Porter, putting him on the defensive by charges gross corruption as controller of the treasury. The charge has been worked up by ex-Detective William P. Wood, once chief of the secret service, and it makes out a plausible case against Controller Porter for paying a fabricated and fraudulent claim, knowing it to be such. It is not credited by Republicans, nor is it likely to be really credited by sensible Democrats; but it puts Judge Porter at the great disadvantage of being on the defensive in his joint debate with Landers, and that is a reversal of the whole Republican policy of the Indiana campaign. The great distress in the Jewell committee now s becaust of the want of money. Enough and more than enough to meet all requirements now has been wasted in Alabama, Maine, Vermont, and in a premature display in Indiana, and now, when a large sum is needed, the contributions and parties subject to assessments are exhausted. And the now well-developed programme of Barnum means to make a systematic and eye. Morton was arrested exhaustive effort, backed with all the money that can be used effectively, to earry Ohio in October. This is an unexpected and serious peril for Jewell's committee to meet, for they must not allow Ohio to fall to a nominal majority, and the loss of the state in October would elect Hancock by a hurricane. The work of collecting money for Ohio and Indrana will begin anew to morrow and it will be pressed with desperate vigor, but the growing conviction among Republican contributors that Indiana is lost, and principally because of Republican waste and mismanagement, will make responses reluctant and not at all liberal. There will be a desperate battle in Indiana, notwithstanding the disadvantages under which the Republicans must labor from this time out, but the belief is much more general than it is expressed among the leaders that Indiana is lost to the Republicans, and that Ohio must be liberally supplied with money to save Garfield's own state.

A discussion arose as to the propriety of getting for exhibition at the fair a pair of golden and a pair of silver pheasants. It was asked what action would be taken towards having an incubator on exhibition at the show, and it was answered that Mr. Cameron, Brickerville, had promised to let the society have the one on exhibition last year. It was also stated that a gentleman of this city had invented an incubator which he had put in successful operation and which he would probably be willing to in the machinery and had one leg taken off exhibit. A Live Corpse. Several nights ago two gentlemen were walking up North Duke street. When opposite the court house they found a young man lying stretched out on the pavement and very drunk. One of the gentlemen thought he would have some fun, so he said to his friend, "I suppose this man is dead; he has no doubt fallen from the roof of this building; you go for a physician and I will go for Coroner Mishler." The two men started off at a rapid rate, but they had not gone far before the "dead" man arose and yelled, "Here, darn your skins, I am not dead."
