Germuntown Telegraph. Among the influences contributing largely to render farming profitable in the Middle and Western states, besides that of Middle and Western states, besides that of cheap transit by railroad, perhaps the most important are the rapid multiplication of grist mills, grain elevators, butter factories, cheese factories, canning factories, cider mills, and similar industrial works. Of these the grain elevator may be said to have originated in the West. And though these establishments are most often spoken of as centralizing in the great cities, they of as centralizing in the great cities, they really exist at every important village or town along the lines of the railways in the grain-growing states. At these elevators the farmers from the whole surrounding country obtain good cash prices for their grain, and this is the influence that renders the ascendency of the grain interest in the West permanent. The operation of grist mills, cider mills, butter factories, cheese factories and canning factories is very similar in rendering profitable dairy farming, the production of fresh vegetables and fruits, orchard farming, etc. The influence of this is seen in the magnitude of the dairy interest in the state of New York, in consequence of the large number of butter and cheese factories in successful operation in that state. The canning interest flourishes at the present time over a wide extent of country in the New England, Middle and Western states. These are the agencies that chiefly contribute to increase the agricultural wealth of the North and West.

Indigestion.

The main cause of nervousness is indigestion, and that is caused by weakness of the stomach. No one can have sound nerves and good health without using Hop Bitters to strengthen the stomach, purify the blood, and keep the liver and kidneys active, to carry off all the poisonous and waste matter of the system.
