THE POLITICAL SITUATION.

Some Canvassing for the County Offices. Little was done in Republican politics yesterday, as but a few of the Mulhoolys were in town, the fall of snow probably keeping many of them away. Kirk Brown, who was a candidate for sheriff three years ago, is now aspiring to the office of register. He was in town yesterday looking peared, relative to the part that the militia whether there were any probabilies of a of this state is going to play, are not very favorably received and many are the exset-up in his favor.

Toby Hershey came up smiling yesterpressions of disgust that are being hurled day and spent most of his time in the coart at the managing committee in general, house watching the movements of George and General Sherman in particular. Geo. John II. High, candidate for sheriff, was buzzing around among the politicians short work of the furniture. While affairs yesterday, and he is certain that he will

be taken, and Abe Keller left. Dr. Compton wants to get on a good strong set-up, as he thinks that is the only way to win. If any one doubts that the doctor is working let them take a stroll through the court house on one of these nice days. They will find the doctor smiling on every one and at the same time soliciting their influence. The doctor guarantees that if he gets in every clerk in court house row now will stay in and everyone now out who wants in will get there. That ought to settle it. Ben Wissler, of Clay, thinks that he will be the next register, but some of the "stalwarts" are down on him because

his district did not go for Tom Davis. Davis has his knife into Wissler up to the handle. Samuel M. Myers will be a candidate for county commissioner, and he thinks he

Coroner Mishler wants to be re-elected, and he has been doing hard work. He does not ask people to support him, but he informs all that he is a candidate, and if he receives their votes they will be thankfully received. Jake Heline has not opened his compaign yet, nor has Peter Honahmon, L. D. Gallagher, of Mount Joy, will be a candidate, and he thinks o'clock, and later in the evening the numhe is solid in the upper end. The arrival of other policemen put an end to the fight and Fetter was taken to the station house. It is a pity that the honorable gentleman must die offi-cially on March 4, and that with him must also perish for the present his great scheme of electoral reform." Although Senator Wallace will probably be retired from the Senate on the fourth of March, it does not follow, as the Times predicts, that his "great scheme for electoral reform " will be retired with him. The abandonment of the present cumbersome and dangerous method of electing the president and vice president is only a question of time, and the plan proposed by Senator Wallace seems to satisfy the popular judgment more nearly than any other that has been suggested. Some change in the details of Senator Wallace's proposition may upon further investigation be found necessary. but in the main it is sensible, practical and in thorough accord with Democratic principle.-Bellefonte Watchman.

The Only One in the Country.

The only platinum worker in the United States is Josquin Bishop, of Sugartown, Chester county. Last week the associa tion of mining engineers made an excursion to the works of Mr. Bishop to see his working of the intractable metal. Mr. ground with a heavy piece of lead pipe and for whom the police have been looking by of metal from the Ural Mountains, in Russia, has been working ever since the occurrence. He left the platinum for forty years. In 1845 he city and did not return until a month or took a premium, but at that time demand for platinum was so small that it only occupied him one day in the month, using the metal principally for rivets to fasten artificial teeth. Before the engineers Mr. Bishop melted a piece of platinum AY and for burglary, and that he was mixed up in with the case that a plamber melts lead. The intense heat used may be imagined when it is known that a steel file held in Feter was held for trial on three charges The Russian government used platinum in its coinage until 1861, when about \$2,500,-000 worth of platinum coins had been struck.
