MONDAY EVENING, AUGUST 1, 1881.

Preparations for Panics.

The panic, so variously and persistently predicted for us on both sides of the water, seems, at a superficial view of the situation, hardly reconcilable with the present harmonious relations between labor and capital.

man who gave the country its national hymn. THE mayor and chief of police, we are confident, will not remain inactive under the charges of the New Era that some of the police are derelict in their duty, and either are negligently ignorant of offenses calling for its exercise, or, knowing, dare not enforce the law fearlessly against the offenders.

THE New York Times has got so far along with its Star Route investigations as to speak of "Key's strange apathy."

MINOR TOPICS.

SHOULD women be called "cranks" because they turn men's heads?

THE "limited" co-operative dress association is in charge of Mr. Wales. Does this imply the Prints of Wales in bathing costumes?

BECAUSE Dr. Cream, of Chicago, was gathered in for murder, it was erroneously reported that the authorities were skinning the Illinois river.

It was discovered after the decease of "Old Abe," the celebrated Wisconsin war eagle, that it was not that kind of bird. It should have been christened Dr. Mary Walker, Gail Hamilton or Joan of Arc.

A GERMAN SAVANT announces that a new moon for the earth is now in process of formation by the condensation of the zodiacal light which surrounds our planet, and that it may take its place in the heavens in the course of a few years.

THE number of idiots and imbecile persons in this country is estimated at about one in every 1,000 of the general population.

PRETTY house aprons of white satteen for pretty girls, have pockets on which are bee hives in Turkey red stitched em broyery, each live in a different perspective.

THE New York Sun has taken up the cause of Midhat Pasha, and devotes many columns to proving that the trial to which he with some other eminent and wealthy Turks, has just been subjected on the charge of having murdered the late Sultan Abdul Aziz was a conspiracy, and the result predetermined by the present heads of the government, the sultan and the grand vizier.

FOOT'S Railroad Manual states that HORATIO ALLEN who ran the first locomotive ever used in the United States, and JOHN ERICSSON, who competed for the prize for the first locomotive used on the Stockton & Burlington railroad, in England, are both now living in New York.

Most of our modern slang upon investigation turns out to be classic. In Joseph Caryl's "Exposition of Job," a work in twelve volumes, published in 1659, the phrase is used: "In commenting on verse 14, chapter 31, last clause: "What shall I answer?" he says: "Surely I shall have never a word to say. I shall not be able to frame an answer myself, nor can any advocate among the sons of men draw up one for me which will hold water in the day of that visitation."

THE increasing carrying trade of the Mississippi is beginning to have its logical effect upon eastern terminal. Philadelphia shows a decline of about fifty per cent. in its receipts of grain as compared with the same period last year.

MAINE is enjoying a deadlock all by herself. Since Blaine was promoted to the presidency, his Maine-stay has rather dropped out of range of the public tropic, but they have brewed a nice little tempest in a tea pot for all that.

IN celebrating its high-day the Press discovered that it fell upon the same day as that of the author of the "Star Spangled Banner," in which it found occasion to pronounce that lyric "our national song" and to publish some memoirs of its author, which have a local interest for Lancasterians, not so much because the writer of them resides here, as from the fact that it was a Lancasterian who first set Key's national anthem to music, and the still more interesting fact that a granddaughter and other-lineal descendants of Key are residents of this city, in the family of our esteemed fellow citizen Dr. John S. Messersmith, medical director of the United States navy, whose wife's mother was a daughter of the

sort, a piquant newspaper correspondent says: "Mine host" was once a term of abuse their trade, and the guest found at the door a plain, well-fed man, with honest eyes, who took his baggage on his hand and said, "Now, come to me if anything goes wrong." In these days some bar-keeper turned great man has replaced the host, whose ambition it is to appear to do nothing and to look haughty and intellectual, as if a glorious ancestry kept his impulsiveness in check.

PERSONAL.

DAN RICE's second wife is a suitor for a divorce from him on the charge of desertion. This is the way, too, that he came to have his second wife.

FRANK LAFLICHE, the brother of "Bright Eyes," who is now a clerk in the interior department, had no objection, to his sister marrying a white man, but he thought "she ought to have got one worthy of her." T. A. T. Tibbles.

WILLIAM LEHMAN ASHMEAD BURDETT, COLT'S-BARTLETT seems likely to lose himself among names. He has lately advertised several additions to his original patronymic, and now tells the world that, pursuant to the Duchess of St. Albans's will, he will henceforth use the surname Counts.

Senator DAVID DAVIS intends to retire to private life at the expiration of his present senatorial term and under no consideration will he be a candidate for reelection. He said he "did not want to see any more of the iron horse," and he refused to ride in a railroad car. After spending the day at Bismarck the Indians left in the boat for Standing Rock.

In conferring upon our American philologist, Prof. WILLIAM DWIGHT WHITNEY, the membership of the Order of Merit, made vacant by the death of Carlyle, the Emperor William has paid a graceful compliment to American learning, as well as worthily recognized the merits of one of the most distinguished of philologists.

JOHN McLAUGHLIN, of McLaughlin Bros., Philadelphia, large owners in the Times, who recently returned from a health voyage to Europe, has died at Cape May. The gale lasted twenty-four hours, after which, with the exception of two days fresh southwest winds, it had eight variable airs during the passage.

MILLIONAIRE MARK HOPKINS never kept nor had kept an account book of any kind not even a bank book, nor any other similar record, to show his individual dealings and operations. Everything that he had, all the money he made from all sources, was turned into the Western Development company, and from that company he drew when he wanted money to pay a tailor's bill or build a two million mansion. He left an estate of \$16,000,000. Some of his heirs claim that the estate was worth \$27,000,000, and that \$11,000,000 should yet be distributed. Mrs. Hopkins, as executrix, entered bond in the sum of \$5,000,000, and she says that only \$275—in an item that was overlooked—remain undistributed.
