A casual investigation revealed the presence of eighteen others in a paper bag in a corner, and they were killed. The mother snake was soon afterwards found and sent to join her young. The species was unknown to the family, but the reptiles were marked alike with flat heads and rings around the body, and a flat head is a peculiar characteristic of all poisonous

Postmaster General James called at the executive mansion this morning, but upon seeing the bulletin within the door, said, "That is good enough; I'll go to the department and go to work," and he drove away without coming up stairs.

WASHINGTON, Aug. 31, 2:30 p. m .- Unofficial.—In an interview with a reporter of the associated press, at 2:15 p. m., Dr. Bliss said that the president's condition is highly satisfactory, and that he is making very favorable progress in every way. The parotid swelling has been reduced to twothirds of its maximum size and steadily diminishing. The patient continues to take food well and has made a slight gain in strength. The question of his re. moval from the executive mansion is again being seriously considered. The president himself wishes to go to Mentor, but although he will doubtless be taken there eventually the first removal will be to a shorter distance. It will take place at the earliest possible moment. The patient's pulse at noon went down to 95, for the first time since the 8th of August, and

toms correspondingly favorable.
