 showers of Fire. While some drillers, near Sarnia, Ont., were boring for oil recently, they were astonished to find that a huge volume of gas was escaping from the well. The gas was accidentally ignited by the torch of a man twenty-live feet from the well, according to a local paper, and the flames, which are described as "vivid and silvery," leaped to a height of thirty feet. Every fifteen minutes "by the watch" there is a grand cruption of water, which instead of putting out the flames " drives them into sheets above the highest trees, and falls in showers for a considerable distance
