Microscopic observations prove that decry is due to septic matter, or minute germs that de- velop and teed upon animal and vegetable structures. OZONE, applied by the PREN- TISS METHOD, selzes and destroys these germs at once, and thus preserves. At our offices in Cincinnati can be seen almost every article that can be thought of preserved by this process, and every visitor is welcome to come in, taste, smell, take away with him, and test in every way the merits of OZONE as a preservative. We will also preserve tree of charge any article that is brought or sent prepaid to us, and return it to the send- or for bir to know and test.
