A New Source of Glucose.

A Company Forming to Produce it From A Philadelphia company is being formed by a number of capitalists to make glucose from cassava, a tuber which grows luxu-riantly in the southern part of the United States. Glucose has become a very important article of commerce during the past few years, and the consumption of it has reached 200,000 tens in this country alone, and a large quantity is imported. It has been made heretofore from corn, which has advanced so much this year as to make this much-needed article quite ex-pensive. The demand for it is very large and exceeds the supply. Heretofore the profits of manufacturing it have been very great, at the rates paid for corn during the past few years. During the trial of a recent lawsuit in New York it came out in evidence that the Buffalo grape sugar company sold to one agency \$100, 000 worth of grape sugar or glucose pe month. That company is now using nearly 6,000 bushels of corn every day in the week. A bushel of corn, weighing 56 pounds, will yield 30 pounds of sugar or glucose. The average net profit on a bushel of corn is between 40 and 50 cents The pospectus of the company now being formed to make glucose gives some com parisons as to the cost of raising corn and cassava. The average production of corr in the states of Pennsylvania, New York Ohio, Michigan and Illinois is 35 bushele to the acre. The amount of glucose pro duced from one bushel is 30 pounds, o 1,050 pounds to the acre. Well authenticated evidence is at hand to the effect that 20 tons of cassava to the acre is no un usual crop in Florida. This, at 56 pound to the bushel, would give a yield of over 700 bushels per acre, or at the rate of 30 pounds of glucose per bushel, would produce over 21,000 pounds of glucose per acre. A comparison of the yield of glucose from corn and cassava shows that 1,000 acres of corn yields about 500 tons of glucose; 1,000 acres of cassava yield about 10,000 tons of glucose.

A Clergyman's Odd Mistake. Boston Herald

The Presbyteriau church in Walpol was the scene of a very amusing inciden last Sunday. It appears that the paster the Rev. Frank S. Hamblett, upon enter ing his pulpit to proceed with Divine service, was astonished to find a clerical-look ing stranger occupying the same, and hi manuscript spread out upon the desk The pastor quietly inquired of the stranger his mission, to which he replied that it "was all right." Supposing he had some cranky individual to deal with whom it would be judicious to handle with care he asked, in tremulous tones, whether th gentleman intended to preach, to which the stranger replied that such was his in tention. Casting an appealing glance for protection to the deacons in the from

The stranger in blank astonishment stated that he had come, as Mr. Marsh could not be on hand. This solved the mystery, and the pastor informed the stranger that his colaborer, Mr. Marsh ed to preach in the Ort near by. The sudden exit of the gentle man followed this explanation, and in hot haste he proceeded to the Orthodox church, to find all there in a state of great anxiety, the organist having played the prelude through three times, and the worthy deacons were on the point of tak ing up the collection and then dismiss the

At this juncture the clergyman rushed in, mounted the pulpit, and with the per-spiration streaming from his face requested the congregation to sing, "Nearer, My God, to Thee," and the service proceeded.

Experiments in a Human Stomach.

Dr. Mikulicz, of Vienna, has invented an instrument for illuminating and inupon which he has bestowed the title of "Gastroscope," to the leading professors of the medical faculty at the Polyklinik, and performed some interesting experi ments with it upon a female hospital patient suffering from chronic dyspepsia. It consists of a tube, fitted with a set of and connected at the other with an electric battery, by which a brilliant light is projected into the stomach requiring inspection. This tube was passed down the subject's throat and remained there for full 20 minutes, during which time the Viennese professors were enabled to diagnose the condition of every part of the mucous membrane thus lighted up and revealed to their gaze. The gastroscope is considered likely to render invaluable services to the cause of electro-endoscopic investigation, which for some time past has been prosecuted with ardor by eminent Austrian pathologists. Several ingenious contrivances for examining the interior of the body have been invented within the last few years. They are all, it appears, very costly, and Baron Nathaniel de Rothschild, with characteristic generosity has presented a correlate set of osity, has presented a complete ret of electro endoscopic instruments to the Polyklinik, by aid of which that institution has already placed on record a long series of important and highly instructive observatious respecting the phenomena of internal diseases.

THE HOUSEHOLD MARKET. SATURDAY Dec. 19 .- A full market to-day with all kinds of provisions abundant. The farmers continue to demand high prices for butter, eggs, roots and vegetables, but prices fell off a little during the market. Butter, which opened from at 40c. a pound, fell to 35 and even to 30 before market closed, and eggs could be bought for 30@32c. a dozen. Pota toes, beet, parsnips, turnips and other roots were to be had in sufficient quantities, while celery and cabbage were scarce and high and of rather poor quality. Cranberries sold at 12@15c. a quart; apples at 20@30c. half peck; lemons 12@15c. per dozen; poultry of all kinds abundant at last week's prices. No change in price of meats, fish or other staples, except that beef per quarter may be quoted a shade lower, fore quarters being offered as low as 5@6c. and very good hind quarters at

THE HISTORY OF A SUCCESSFUL BUSINESS

Prosecuted Upon the Principles of Truth and Honesty.

We refer to the wonderful success that has attended the introduction of Dr. C. W. Benson's Celery and Chamomile Pills into the whole country.

They are prepared expressly to cure Sick-Headache. Nervous Headache, Neuralgia, Nervousness, Sleeplessness and Dyspepsia and the facts prove that they do and will cure these diseases every time where the cause is not of an organic nature.

The secret of their success is twofold. First, the need of them is very great; it is the only thing that has ever been found, in the profes sion or out of it. that would actually and permanently cure those diseases; so that every body who takes them becomes a walking and talking advertisement for them. One box, taken into a neighborhood, has been followed and traced to selling \$50 worth in that one

They are indeed a valuable preparation and

no nervous person ought to be without them, as they not only save from suffering, but save and prolong life by preventing paralysis, apoplexy and heart disease.
Sold by all druggists. Price, 50c. a box. Depot, 106 North Eutaw street, Baltimore, Md.
