TALK:

Christmas has come and gone. The old year has kissed its "good bye" to '52 and dropped back into the past, taking its place among the most eventful years of history. The Holidays are over. The gifty givers have ceased their giving, and the time when any

thing and everything would sell so readily has gone. The "old fogy" merchants are preparing to wear out chair cushions and trousers by sitting themselves down during the months of January, February and March, to await the coming of "SPRING TRADE."

The "WIDE AWAKE" MERCHANT, the "Man-Who-Never-Has-a-Dull-Season," the man who has learned that trade can be made in the usually dull months by working for it is lauching forth some new idea, some attraction which will draw the people; and accordingly keep the trade a "booming" and give his sleepy neighbors something to talk about and

Can any person be so obstinately blind as not to see that the "EVER BUSY MERCHANT is the one who REDUCES HIS GOODS TO COST in the dull season rather than store them away for the next season, whether his neighbor likes it or not, and such a store is being sought after by the swarming thousands of Lancaster city's and county's purchasers. AND NOW WE HAVE OUR STORE ILLUMINATED BY THE ELECTRIC LIGHT

by which every tint and color can be seen as well by night as by day.

I therefore call your attention that every garment has been MARKED DOWN TO COST FOR THE NEXT THIRTY MAYS, whereby you will be enabled to buy an

THE WATER WORKS.

SUPERINTENDENT KITCH'S REPORT

AN EXHAUSTIVE AND INTERESTIN DOCUMENT.

THE CONDITION AND NEEDS OF OUR
WATER SYSTEM.

some Facts that Merit Thoughtful Cou-

Following is the annual report of Superintendent of the Water Works Davis Kitch. It was prepared and intended for presentation at last night's meeting of councils, but owing to sickness in the family of Superintendent Kitch he was detained at his residence and not able to be present at the meeting. It has, however, been placed on file in the mayor's office, where it can be seen at any time, and will be formally presented to councils at the adjourned meeting, to be held on Friday evening, the 10th :

To the Honorable the Select and Common Councils of the City of Lancaster:

GENTLEMEN:-I herewith submit to your honorable bodies the annual report of the water department for the year ending February 28, 1882, in accordance with the resolution of January 1, 1879, providing that an annual report shall be made by the heads of the several city departments on the last day of February of each year.

I assumed the duties of superintendent of the water works for a second term on April 4, 1881. In this report I present to you a statement of the operations of the water department for the past year the present condition of the different pumping ergines, works, reservoirs, forcing and distributing mains, valves, stops and fire-plugs, together with tables, showing the amount of water forced into the reservoirs each month of the year, and other items of general interest. I also present for your consideration the wants of the department.

Complaints of Lack of Water. The water department fails to keep pace with the rapid growth of the city. from citizens living on the high grounds of the Fifth, Sixth, Seventh, Eighth and Ninth wards that they did not receive an adequate supply of water. On that day the height of water in the western reservoir was 14 feet 6 inches, and in the eastern reservoir 13 feet 6 inches.

The Eastern Reservoir. The eastern reservoir which was repaired in the summer of 1880 has shown no sign of leakage since, although in con-stant use and taxed to its greatest

Low Water. In the months of June, July, August, September, October and November, the water being low in the creek, the Worthington duplex pump, although taxed to its utmost capacity to keep up the supply, lost during the business portion of the day from one to two inches per hour, and I was compelled to run the duplex pumping engine 22 or 23 hours, and sometimes day and night continuously, before the water in the reservoir was forced to the point where the signal sounded, signifying that the resorvoir was filled to a heighth consistent with the safety of the banks. The water was so low at times that the engine could not get a sufficient supply of water from the feed pipe, and I was com-pelled to have a force of laborers to dig out the race and let the water in from the

dam to fill the wells from which the engine gets its supply of water. Water Pumping Power. The Geylin pomp was operated during 2.848.880 revolutions, and pumping 51,-

89,840 gallons of water. The Birkinbine pump No. 1 was opera-ted 6,468 hours; making 8,537,760 revolutions, and pumping 170,755,200 gallons of

The total number of gallons of water pumped by water power was 389,638,800 at a cost of \$1.81 per million gallons delivered into the reservoirs.

Steam Pumping Power. The Worthington high service engine was operated during the year 40 hours, making 105,600 revolutions and pumping into the reservoir 844,800 gallons of water. The Worthington Duplex engine was operated during the year 5,976 hours,

generally sold in this country, and need only be seen or heard to be appreciated. Musical Boxes with bells, drums, castanets, celestial voices, mandoline, diva-harmonie, overture, tremelo-piccolo, sublimeharmonie, harp-zither attachment, at a slee two and three mainsprings of large street and fireman, and packing etc. the cost was \$7.53 per large street and str

oil, packing, etc., the cost was \$7.53 per The following table shows in detail the

working of the several pumps during the

161,310 feet, or a fraction over 301 miles. New Renters.

During the year 196 2-inch, one 1-inch and one 11-inch ferrules were inserted, being 41 more ferrules than were inserted the year previous. There were more new renters in that year than ever before.

The Water Rent in Detail. The following is a synopsis of the duplicate for the coming year: 771 one story houses, 2,455 two-story houses, 508 three-story houses, 27 four-story houses, or a total of 3,761 houses; pave washes, without hydrants, 38; private bath tubs, 757; water closets, 883; public water closets, 73; public baths, 24; public urinals, 26; private urinals, 35; hotels, 45; restaurants, 61; steam engines (from the year 3,646 hours; making in that time 5 to 500 horse power), 91; bakeries, 41 private stables, 28; hotel stables, 17; livery stables, 7; exchange stables, 3; horses, 280; cows, 83; dentistries, 13; barber shops, 25; fountains, 16; photo-graph gallerits, 5; liquor stores, 11; printing offices, 12; gardeners, 19; dye houses, 3; slaughter houses, 11; curry-The Birkenbine pump No. 2 was oper-ted 5,972 hours, making 6,449,760 revolu-tions and pumping 167,693,760 gallons of laundry, 1; foundries, 4; stock yards, 3 agricultural park, 1; gas works, 1; min-

eral water establishments; 2; street sprinklers, 4. The Reservoirs. ern reservoir was kept at a uniform to be opened), a distance of 400 feet, to branches of councils. Height of 13 feet 6 inches. The height of Freiberg street. If this is done the RULE 7. For absent During the year the water in the eastwater in the western reservoir varied from southern portion of the Seventh ward 14 feet 6 inches to 16 feet, the average height being about 15 feet 5 inches.

Pumps, Engines, &c. The Worthington engines are in first-class condition. They needed no repairs during the year. The water pumps are in fair condition, but will need some slight repairs during the dry season.

Damages, &c. The late freshets have damaged the arches over the tail race, at the works, but the necessary repairs can be made at a small expense. A short time ago I was compelled to take out one of the 20-inch pipes on East Orange street, it having broken. The breakage occurred on ac-count of bad material in the pipe. The only inconvenience was to parties having to do without water for a few hours.

Connections Needed. I would renew my recommendation that connections be made at the points designated in my last annual report (our water pipes cross each other, but are not connected) and for the same reason then urged, viz: That when a heavy draw is made in summer time on the reservoir, all will not come from a single main.

Flange Pipes Recommended. During the year a 12 inch flange pipe was laid over the Shippen street bridge. It gives to the residents of the Sixth ward an additional supply of water. They could be still further benefited if flange pipes were laid over the Duke and Line street bridges, and I would therefore recommend councils to provide for the same in the estimates for the ensuing fiscal year.

Stops or Valves Needed. I would again urge upon councils the be irresistible. necessity of having stops or valves inserted in the main supplying the most populous portions of the city, so that when a break occurs, whole sections of the city would not be deprived of water. There would not be deprived of water. There breeds would have been clamoring for it. are now sections of from one to four That is about the size of the Half-breeds squares that have no valves or steps. If in the "neck of the wood." the stops or valves are inserted few will be inconvenienced, where now hundreds are.

station house and mayor's office. This I were always the first on the enemy's ramfound to be a very great convenience. If anything is out of order at the works, I bravery of two battles.

can be summoned and be there in a very A new boiler house and a set of boilers referred to as necessary in my last annual report have been provided. The boilers were constructed by Mr. John Best in a workmanlike manner, and fully answer all purposes. The boiler house was built by John W. Reith according to specifications

and plans. The old boilers should be put in condition, and I would recommend that they be remodeled on the same plan as the new ones. They should be repaired and used occasionally, so that the new boilers need not be kept in constant use.

I would recommend that two fire hydrants be placed at the water works. They could be put there at a slight cost, and are a necessity.

Receipts from Water Bent. The following are the receipts from water rents since 1874: 1874, \$24,000.00; 1875, \$24,500; 1876, \$26,493.56; 1877, \$29,256.89; 1878, \$30,219; 1881, \$38,326.-93: 1882 estimated at \$40,000

92; 1882 estimated at \$40,000. Consumption of Water.

During the year there were pumped into the reservoirs 1,188,976,100 gallons of water, making a daily consumption of 3,257,474 gallons. The more I study the every city of our size, and larger, in the United States have them or are about introducing them. The time is not far distant when we too must introduce them. As an experiment, during the year I pro-cured three meters. One I placed at a private residence, the second at a res-taurant and the third at a brewery. The result has been as I anticipated. The private citizen pays more for the water used at his dwelling house, at the present rate, than does the manufacturer. The only fair way to equalize the water rents is by person will pay for what he uses or wastes, the daily consumption will be less, and the department can get along with a smaller appropriation.

Distributing Mains. There are about 15 miles of small mains laid throughout the city. I would renew my recommendation made last year that size. The wants of the citizens demand it. I would recommend that as much of the money appropriated for laying pipe as possible be expended in the laying of at least 8-inch mains. No Increase of Debt for a Year

dance of water. Councils passed the re-The indifference shown may be fairly acrise the water mains of the city of Lan- counted for by the interest centred in the contest for mayor. The wants of those living in the high portions of the wards named can only be relieved by the extension of the 20 inch main. The necessity of another pump is apparent, for if an accident was to happen to the Worthington Duplex in summer time, there would surely be a water famine. According to the law governing an increase of the Making a total of debt, which may be found on page 66, sec 17, city ordinances of 1881, there cannot be another vote on the same question for one year from the date of the last election. It would be policy for coun-cils towards the end of the year to re enact the ordinance providing for an increase of the debt, but to have the question voted on at a special election so that no side issues will determine whether or not those citizens living on high portions of the city and who pay their water rent can or cannot get what they pay for. The reason the election was made at the time of the municipal election was to save the city the expense of a special election-about

I have rigidly adhered to the policy of the water mains to have separate pipes running to their houses. There are still many cases where as many as half a dozen houses are receiving water from one pipe, and in case of a break several families are inconvenienced where only one should be.

Further Recommendations. I would recommend a stop to be placed north of 24 inch Y on the flat below the made at the works.

A six inch main should be laid from the would be supplied with water when there | Chief engineer \$5, engineer of steamers \$4 is any in the reservoir.

I would recommend the putting in of a rack, constructed of iron, in the head race to protect the 24 inch feed pipe that supplies the Worthington engine.

Account of Stock. The following is a list of the material on hand belonging to the department : Two fire hydrants, three pieces of 24inch pipe, two pieces of 20 inch pipe, shall contain: forty-five pieces of 6-inch pipe, three 24-inch sleeves, one 20 inch sleeve, one 16-inch stop valve, two 4 inch stop valves, 3d. His occ four 4-inch sleeves, two 6-inch stop valves. All of which is respectfully submitted,

DAVIS KITCH, Superintendent of Water Works. Lancaster, Pa., Feb. 28, 1882.

THE NOBLE "306." A Statwart Editorial Defender.

Lancaster Daily Examiner. If there had not been the "306" in the Chicago convention, there never would have been a "President Garfield." It is all very well to sneer at the "306,"

but when the battle is to be won "the charge of the heavy brigade " is found to The Buffalo Courier says the reason why

The "306" never quail when under fire, nor are they disheartened where de-During the year a telephone line was feated. They left Chicago with flying run, connecting the water works with the banners, and in the campaign of last fall The Call System.

Kules and Regulations for the Governmen of the Fire Department of the City of Lancaster.

Chief Engineer

RULE 1. The chief engineer shall have

entire command of the fire department at fires and alarms of fires, and the grounds around the same; direct his foremen and assistants how to dispose of the respective companies, and shall direct the efforts of the department until the fire shall be extinguished, or the department shall be dismissed by his orders. He shall have charge of all the apparatus belonging to or used by the department; and shall see that it is kept at all times in good order and ready for service, and shall for that purpose visit at least once in each day every engine house and place where any fire apparatus is kept or stored, and examine carefully the condition of the apparatus, horses and all property of the department, and the condition of the houses as to order and cleanliness. He shall have the supervision of the person or persons who may be employed therein, and all the materials, supplies, tools, fixtures and fur niture used or deposited therein, and shall see that all materials provided for the department are properly and economically 3,257,474 gallons. The more I study the used. No tools or other city property matter the stronger am I convinced that shall at any time be lent or taken from there is but one way to put a stop to this the houses or other places where they are enormous consumption, and that is by the kept without his permission or an order introduction of the water meter. Nearly from the fire department committee. He must appear on the fire ground with regulation badge or equipment.

RULE 2. It shall be the duty of foremen of companies to see to the apparatus entrusted to their care and the several buildings in which the same is deposited, and all articles in or belonging to the same, are kept neat and clean and in order for immediate use. They shall also preserve order and discipline at all times in their respective companies, and enforce a strict compliance with the rules and regulations of the introduction of the meter; then every the department and the orders of the chief engineer. They shall promptly report all delipquencies on the part of employees or members of the respective companies to the chief engineer. They shall keep ac-curate record of the attendance of the members of their companies at fires as well as all absence from or omission or ne glect of duty on their part, and an account these be replaced by mains of a larger of all property entrusted to their care, in a book provided for that purpose, which record shall be open to the inspection of the fire department committee and chief engineer. He shall be held responsible for the conduct of his men while on the fire ground, and will be required to report The water committee unanimously rec- in writing to the chief engineer any dereommended to councils the necessity of liction of duty or violation of the rules by another pump and the extension of the 20- the members. allowed to congregate in or about the same, except members of the department; and it shall be the duty of the chief en-

alarm shall be subject to a fine of fifty dollars, the same collectionable by the mayor or any alderman of the city of Lan-

caster. All fines to be converted to the use of the city, the same as other fines and penalties as now prescribed by law.

W. P. Clarke, esq., 920 Walnut street, Phila-delphia, Pa., writes: "I have used Dr. Bull's Cough Syrup and found it to be the best re-medy I ever tried."

"How do you manage," said a lady to her friend, "to appear so happy all the time?" "I always have Parker's Ginger Tonic handy," was the reply," and thus keep myself and family in good health and spirits. See adv. ml-iwdcod & oow

Years of Suffering.

Mrs. Barnhart, cor. Pratt and Broadway. Buffalo, was for twelve years a sufferer from rheumatism, and after trying every known remedy without avail, was entirely cured by Thomas' Eclectric Oil. For sale at H. E. Cochran's drug store, 137 North Queen street, Lancaster.

II. Adam had had a game of "Fifteen" placed in his hand at an early period of his existence, the whole course of history might have been materially altered for the better, and it biliousness, indigestion, sick headache or dyspepsia were unknown, Spring Blossom would not be needed. Price 50 cents. For sale at H. B. Cochran's drug store, 157 North Queen street, Lancaster.

How's the Baby. "How's the baby?" "His croup is better this morning, thank you. We gave him some of Thomas' Eclectric Oil as you advised, doctor, and shall give him some more in an hour or so." Next day the doctor pronounced the youngster cured. For sale at H. B. Cochran's Drug Store, 137 North Queen street, Lancaster.

MEDICAL.

DREJUDICE OF THE PRESS OVERCOME

OFFICE OF THE SENECA CO. HERALD, 2 Hamilton Block, BLOOMVILLE, Ohio. BLOONVILLE, Ohio.

GENTLEMEN: You can count me a convert to Dr. Thomas' Eclectric Oil. When your agent came into my office to advertise your medicine, I classed it with the thousand and one nostrums hawked about the country and sord as cure-alls. For fitteen or twenty years I have been suffering with that terrible disease, Catarrh; had lost my sense of smell and taste, also my sight and hearing was fast failing. I had previously tried scores of advertised remedies, but found only temporary relief. Last fall I concluded to give your Eclectric Oil a trial. After using part of the first bottle I began to feel better. So I kept on using it every night before retiring. I am now most happy to say I am nearly cured and feel better than I have for 10 years. Sopa time ago I felt a pricking sensation under one of my thumbnails. I could not imagine what caused it. It fet his if a piece of needle was under the nati. I tied up my finger with a rug, freely saturating it with the oil; the pain ceased and in a few days a black spot made it appearance and gradually increased until a new nail grew on. These are facts voluntarily given, even against a former prejudice concerning patent medicines. You can use this testimony as you see fit. If it will do any good in getting suffering humanity for try your medicine, and it relieves others as it has me, they will feel thankful.
