Six Chinamen, who were working in the neighborhood, also saw this astonishing mon ster, and it is understood that Messrs Campbell and Howard can make them

testify to the fact if it should be thought desirable. What is perhaps most remarkable in the Missouri monster is the self restraint which is shown in its construction. It is combined crocodile, bird, centipede, bear and calf, but these simple elements are really all that enters into its composition. Nothing would have been easier than to give it in addition a barbed tail, an elephant's trunk, a full set of porcupine's

quills, and a pair of horns. Thus the monster would have. become grossly im-probable and would have been cast out and spurned by every intelligent hotel-keeper. As it is, the great Missouri flying animal is as probable as the sea-serpent, and there is not the least doubt that it

Price Two Cents.

The Blood is the foundation of life, it circulates through every part of the body, and unless it is pure and rich, good health is impossible. It disease has entered the system the only sure and quick way to drive it out is to purify and enrich the blood,

These simple facts are well known, and the highest medical authorities agree that nothing but iron will restore the blood to its natural condition ; and also that all the iron preparations hitherto made blacken the teeth, cause headache, and are otherwise injurious.

Brown's Iron Bitters

Will thoroughly and quickly assimilate with the blood, purifying and strengthening it, and thus drive disease from any part of the system and it will not blacken the teeth, cause headache or constipation, and is positively not injuriou .

17 N. Eutaw St., Baltimore, Md. February 12, 18:0. GENTS : Upon the recommendation of a triend I tried BROWN'S IRON BITTERS as a tonic and restorative for my daughter, whom I was thor-oughly convinced was wasting away with Consumption. Having lost three daughters by the terrible disease, under the care of eminent physicians I was loth to believe that anything could arrest the progress of the disease, but, to my great surprise, before my daughter had taken one bottle of BROWN'S IRON BITTERS, she be gan to mend and now is quite restored to former health. A fifth daughter began to show signs of Consumption . and when the physician was consulted he quickly said, "Tonics were re-quired"; and when informed that the elder sister was taking BROWN'S IRON BITTERS responded "that is a good tonic, take it."

He had which never fail to create the utmost enthusiasm. The only fault that can be found with the sea serpent is the fact that his sphere is a limited one. He is monopono complaint to make, was attached to his employer, liked the business and all that, lized by the seaside hotels, and the inland but resign he would. It turned out that summer resorts are unable to make the this was the cause : Tuesday, the maid whose duty it is to till the used cans of that day, poured them full of water as they stood in the wagon and left them to stand twenty-four hours to sweeten, as is the rule. Before daybreak yesterday the deserving of these animals, and ten or twelve years ago the local hotel propriedriver brought out his team and hitched up to the team containing the cans of water colored by the remains of milk, instead of to a second wagon in which the fresh milk had been placed for him, Oblivious of his error he drove over his entire route and various Canadian lake serpents, he never served all his customers with milk colored drew largely, and soon ceased to be any water. When, later in the day, he discov-ered his error, he resigned rather than attraction to the summer boarders. A very little reflection will show that what our hotel keepers, whether of the CARPETS face the battery of complaints he knew was ready for him. "I can go up to a cannon's mouth," said he, "and let'en bird as remarkable in its way as the seabird as remarkable in its way as the sea-serpent is among sea-faring beasts. Such a monster could visit every hotel in the country in succession, and could be as popular among the White Mountains as at Niagara br the Yosemite Valley. The Central Americans, unenterprising as we are apt to think them, invented an admir-able bird many years are although they shoot me in two, but I never want to set eyes again on a house where I served that water." His employer enjoys that joke hugely, and was busy all day yesterday setting things to rights and explaining the error between his gasps for breath from too much laughter. Some of his custo-mers remarked that they had noticed the milk wasn't quite as rich as usual.
