The New Collector.

Mr. Wiley steps out and Mr. Kauffman steps into the pleasant collectorship of this district, and the reason why is that dertaken. Mr. Kauffman was one of the 306. That is quite sufficient reason in itself under this administration, and we need hardly inquire for any other. It was not that Mr. Wiley has not made a good collector, nor for any failure on his part in the performance of his duties ; though they do say that an effort was made to gather testimony to prove that he was not al ways so sweet and gentle a creature as happy Andy habitually is. The change was not made because unlucky Tom is thin and dark, and lucky Andy fat and fair; that may be a very powerful inducement to a rotund and florid president to a bestowal of his rewards. It may be that we are to have a blonde administration of round and rubicund officeholders, that there may be a fraternal sympathy, similarity and regularity in tone, color and feature, down the whole line of the Stalwart army. Brother Kauffman physically will answer excellently well as a color-bearer under Arthur as commander-in-chief. That distinguished person is reported in the newspapers to be a thing

of great corporal beauty; although it is altogether a question of taste; and to ours it seems that the represident have the Esquimaux idea of it; or the Cincinnati idea; if it is true that Cincinnati worships pork. The truth of it is that our new collector would make a better looking president than his chief. One expects to see in that exalted station a man who is always ready to look you straight in the eye. Our Andy has a frank and open expression, while Arthur's look is sidelong. He looks just like the man to surround himself with all the Bill Chandlers and big rascals in his

party ; but it does not seem to be a sine qua non of appointment that the big fair- tronizingly as "Mr. Sensenig." It was haired fellows shall be also oblique-eyed quite as polite when "Mr. Sensenig" and morally and physically; for our Andy his heelers were helping to steer the Reisn't.

Nor does it appear to be indispensable that they shall be big. Bigness no doubt is a recommendation ; but its absence will be condoned if other agreeable qualities are present. The question with us just now is as to the extent to which doubt exists of the presidential preference for blondes. Our red-headed Hewit, whose hair ruined him as speaker of the House, has it for a very strong card in

"MENTOR, Ohio, Oct., 24, 1881. This certifies that on or about August 8th, 1881, the late president, James A. Garfield, made the following statement to me in the presence of Mrs. Garfield, viz.: That Dr. J. H. Baxter had been his physician for many years, and that he still considered him as his physician.'

He also stated that he bad no knowl-edge of ever having placed himself under the professional care of Dr. D. W. Mrs. Garfield stated at the same time that she had never been consulted by Dr. Bliss upon the subject, and had no knowledge of the president having chosen Dr.

vention in a way peculiarly their own. The county committee was evenly divided between the Stalwarts and Half-breeds including the chairman who acted with the former, On a test question there were ten Half-breed and nine Stalwart votes. The chairman added his vote to the nine Stalwart votes making ten and resulting in a tie. The redoubtable chairman, however, was equal to the emergency. He was not the man to balk at so trifling a difficulty. He declared that the question was decided in the affirmative. The ten Half-breeds appealed from the decision of the chair. There were nine votes to sustain the chair and ten opposed. The chairman voted to sustain his own decision, and although the vote was a tie he declared the matter decided in his favor. The

ten Half-breeds then left the meeting in disgust and the nine Stalwarts proceeded to elect Beaver delegates.

The Case of Dr. Lamson.

In the House of Lords, Earl Granville, secretary of state for foreign affairs, replying to the Earl of Milltown, quoted precedents where the British government ad made representations similar to those made by the United States in the Lamson case. The United States, he said, did not interfere with the English administration of justice, but merely intimated that there might be cause for clemency. Generally dence in this one came from the United States, the time was somewhat extended.
