## TOBACCO MATTERS.

THE OUTLOOK OF THE NEW CROP.

Thousands of Acres Planted—Transactions on Former Crops—Philadelphia and New York Markets.

"Don't count your chickens before they are hatched," is a very wise adage, and may be profitably applied to tobacco farmers as well as chicken fanciers or any other class of people. And yet almost every body in this sanguine, hopeful world does look ahead and count their chickens long before they get them. The tobacco farmer is doing so now and has been doing for weeks past. He measures and plows, and ridges his field, sets out the tender little plant, looks at it lovingly and says "grow little one, two month hence you will be a mighty stock, bearing twenty leaves each three feet long and a foot wide, and I will sell you for 25 cents a pound"—and he believes it. Drive, if you please, into almost any section of this great country and you will find upon almost every farm a garden-patch, or a choice acre, or a ten acre field, or even a large space of the best land on the farm, set out with serawny little plants scarcely visible at a dozen rods distance. If the weather be dry, men, women and children may be seen plodding through the fields with watering pots, covering the roots of each tiny plant, and giving it a chance to live. If the sun be scorching hot, the pet plant is protected by a paper "too" as carefully as if it was protected from frost, (while in its little bed), by a blanket of burlap or coverlet of canvas. How many thousands of acres of plants have been, are being, and will be set out nobody can yet tell. A ride up and down the two branches of the Pennsylvania railroad, between Lancaster and Middletown, shows a hundred of fields already planted, and the farmers along the line busily engaged in planting more. Advice from other sections of the county are to the same effect; and it is very probable that not less than 15,000 acres have been or will be planted in the county before the 1st of July. In this respect the county is unique. Here tobacco growing is the rule; as soon as we leave its borders tobacco growing is the exception. Within a few days past we took a run through the Cumberland valley from Harrisburg to Carlisle—and a most beautiful valley it is, teeming with thousands of acres of wheat, oats, potatoes and other crops—but not half a dozen tobacco patches along the entire route could be seen from the cars. Of course there are some patches about Mechanicsburg, and Shumanstown, and From Carlisle south to Mount Holly there is not a tobacco patch to be seen among all the fertile fields. The tobacco speculator might just as well search for his favorite weed among the barren rocky wastes above Elizabethton, where the Candidate Brosius some days ago declared, "was not made in vain, but was like himself fashioned by divine Providence for some wise but inscrutable purpose;" but what that purpose is no fellow can find out. It is probably the best tobacco in the county, and it will be one of the best of the entire crop of the county has been planted, and the plants though generally small, look healthy. In many sections, however, the out has been very trifling, and made it necessary to set out many plants. Then the weather for several days past has been intensely hot, and though there have been several light rains, the plants have in some instances withered from drought. Add to this the storm wind and sun, and sun-failing, the increase of mortality among the plants, and it will be seen the planter's lot is not a happy one.

Sales of old tobacco on our market have been merely nominal, the whole aggregating not more than 150 cases, most of which went to California.

Only a few dealers are showing much activity in the purchase and receipt of baled tobacco of the crop of 1881. B. S. Kendig & Son received at their Lemon street warehouse, Philadelphia, three days about a dozen carloads, principally from York county of medium or low grades. Frank Pentlage also received a few carloads and a few wagon-loads have been delivered at other warehouses. A majority of the packers have finished their packings and discharged most of their men. Kendig & Son, however, have a force of 50 men yet at work, and some other houses have from six to a dozen.

Within a few days the sampling of the crop will be well advanced, and we shall then be better able to judge of its merits than now. Reports as to its condition are very conflicting, some wisecracks declaring that it is not sweating at all, and others that no crop has ever done better.

The York Dispatch says: "The bulk of the tobacco has not yet been planted in York county. The young plants were slow growing, and now farmers are waiting for rain to put the ground in condition to set out the plants. Haymaking and possibly harvesting will be entirely finished. However, in spite of the agitation, manufacturers of very cheap and of very good cigars were and are extremely busy. Medium grade cigars are very much neglected. This is one of the mysteries of the industry. No fellow has ever been able to find out."

The feeling of the market is very buoyant. All holders of new tobacco look forward to a brisk paying business, and even holders of old stock are still hopeful of realizing some profit. A few of the pessimistically inclined lead dealers and holders of old Pennsylvania concluded to get rid of their bargains this week, and closed out low figures—provided the reports of the market are correct. Certain it is that if holders of old tobacco will come down in their prices, there will be no lack of buyers.

There was considerable inquiry for export goods, but owing to the faith in the future of the home market, holders of such stock cannot be persuaded to sell at ruling export figures. Besides, it is generally held that before long exporters will offer much higher figures than they do now, and that not alone old, but new export goods as well, will find profitable buyers.

The sales for the week were as follows: Pennsylvania—Crop '80: 900 cases, 13 to 17 cents; fillers, 6 cents. Connecticut—Crop '80: 300 cases, mostly wrappers, 27 to 35 cents. Wisconsin—Crop '80: 120 cases, 8 cents. Ohio—Crop '80: 400 cases, 4 1/2 to 9 cents; about 200 for export. Havana—Market continues active. No change in prices. Sales 700 bales.

The New York Market.  
Following are the sales of seed leaf tobacco reported by J. S. Cochrane & Co., tobacco brokers, No. 131 Water street,

New York, for the week ending June 26, 1882: 800 cases 1881 Pennsylvania 6 to 18 cents; 300 cases 1881 New England, second and fillers, p. t.; 200 cases 1880 Ohio 6 to 11 cents; 150 cases 1880 Wisconsin Havana seed, 8 to 11 cents. Total, 1,436 cases.

The New York Tobacco Leaf reports the trade in Western tobacco quiet; Virginia leaf dull, with a prospect of its remaining so until Congress settles the tax question. Seed leaf shows a slight improvement.

For manufactured tobacco there is fair inquiry, and though there is a pressure for reduced prices, manufacturers are prepared to decline to lower them. Smoking tobacco is in good but not in active request. The cigar market is steady and moderately active.

Philadelphia Market.  
Seed leaf dealers report made very quiet. There are but few goods being sold at present. Manufacturers seem to prefer working up their old stock, and wait for further developments of condition, etc., of new leaf. Some new Connecticut second hands have already been sold in our market; they are reported as opening much better than expected. It is rumored that Wisconsin seed received a set-back last week by the non-acceptance of 1,000 cases, bought in New York, subject to resampling; they were not up to the mark. The look-out for leaf tobacco is promising.

Havana—Good goods offered and freely taken at full figures.

Receipts for the week: 386 cases Connecticut, 242 cases Pennsylvania, 60 cases Ohio, 82 cases Wisconsin, 23 cases state seed, 103 bales Havana, 170 hbls Virginia and Western leaf tobacco.

Sales have been: 186 cases Connecticut, 273 cases Pennsylvania, 26 cases Ohio, 38 cases Wisconsin, 13 cases state seed, 90 bales Havana, and 75 hbls Western in transit direct to manufacturers.

Exported of leaf tobacco to Liverpool, per steamer British Queen, 14,289 lbs; per steamer Lord Gough, 46,373 do; total 60,662 do.

The Wisconsin Crop.  
Our farmers inform us that tobacco plants will not be set out much before the last of this month. But, however, we hear that four acres have been set out near Janesville. It is estimated that more land will be planted in tobacco in this state this season than ever before. *Edgerton (Wis.) Tobacco Reporter, June 16.*

Tobacco Notes.  
The funny man of the Norristown Herald says: "A graduate of the Pennsylvania agricultural society purchased 5,000 cigars last week. He says he is going to plant them and raise a crop of tobacco, as he has been told there is money in it. And yet some editors who don't know the A B C of farming, want the Pennsylvania agricultural college abolished." The funniest part of the above joke is that Gen. Beaver, the head and front of the agricultural society, is the Herald's candidate for governor!

## MEDICAL.

BROWN'S IRON BITTERS.

## PLAIN TRUTHS

The blood is the foundation of life, it circulates through every part of the body, and unless it is pure and rich, good health is impossible. If disease has entered the system the *only* sure and quick way to drive it out is to purify and enrich the blood.

These simple facts are well known, and the highest medical authorities agree that *nothing* but iron will restore the blood to its natural condition; and also that all the iron preparations hitherto made blacken the teeth, cause headache, and are otherwise injurious.

BROWN'S IRON BITTERS will thoroughly and quickly assimilate with the blood, purifying and strengthening it, and thus drive disease from any part of the system, and it will not blacken the teeth, cause headache, or constipation, and is positively *not* injurious.

Saved his Child.

Dr. S. Kutaw St., Baltimore, Md., Feb. 12, 1882.  
Gents:—Upon the recommendation of a friend I tried BROWN'S IRON BITTERS as a tonic and restorative for my daughter, whom I was thoroughly convinced was suffering from consumption. Having lost three daughters by the terrible disease, under the care of eminent physicians, I was loth to believe that anything could arrest the progress of the disease, but to my great surprise, before my daughter had taken one bottle of BROWN'S IRON BITTERS, she began to improve, and in a few days she was able to walk and eat as she used to do. A fifth daughter began to show signs of consumption, and when informed that the old remedy was quickly and cheaply obtained, she was taken to BROWN'S IRON BITTERS, and she is now as well as ever. I can truly say that BROWN'S IRON BITTERS is a good tonic, take it!

ADAM PHILLIPS.  
BROWN'S IRON BITTERS effectually cures Dyspepsia, Indigestion and Weakness, and renders the greatest relief and benefit to persons suffering from such wasting diseases as Consumption, Kidney Complaints, etc.
