"BY THE WAY."

ITEMS OF NEWS TAKEN ON THE PLY. Our Special Reporter at Landisville-Camp meeting i-respects—The Tobacco Crop and its Enemies-Harvest at

its Height. There is a general apprehension that the Landisville campmeeting of 1882 will not be so largely attended nor so religiously successfull as in previous years-this may perhaps be a mistaken opinion on the part of those interested in its success, but indications at present point otherwise. Year after year prior to its opening has seen the grounds noisy with the sound of the carpenter's hammer or made dusty by the busy sweeper. The sweeper is there doing his share to make the grounds presentable for the accommodation of visitors

and around the village of Landisville the usual preparations are being made, and Mr. J. B. Miunich, proprietor of the Sycamore hotel, has greatly remodeled that old hostlery and added to its conveniences for the visiting public who prefer its un-restricted freedom to the "blue law" of the camp ground. Indications may be deceiving, and we may yet see fondest hopes realized and the old Landisville campmeeting of this year rank with its former years' successes. So we hope.

The Tobacco Crop. We do not lay claim to the distinction of being a tobacco prophet-tobacco prognostications are beyond our experience, but to tell what we see and hear may not only be "newsy," but a straw in the

phrophet's scales.

Tobacco raisers in this section—around Landisville, Salunga and Mt. Joy-are not very jubilant over the prospect of the crop of '82. The cut-worm, caterpillar and midget, have formed an unlimited co-partnership to do all in their power to destroy the growing growing plants. Some farmers have been compelled to replant as often as four times, owing to the havec made by those enemies of the growing plant. The other day while going through the large patch of Mr. C. Hershey, east of Landisville, some plants with leaves 4 to 6 inches in length are being cut to pieces. To show us how the cut-worm carried on the business he dug up for us several-a dozen at least-hard at work on the tender of the plants, but what dug up we know won't "cut" away more stalks. In some sections you see the tobacco plants well under way-the leaves large, fresh-looking and growing nicely, while in others they are small; very small. The caterpillar has also made his appearance. In a talk with a planter, buyer and packer of many years experience at the large warehouse of Garber & Son, Rapho township, he told us that this new visitor was doing great harm in that section. He did not speak in the most glowing terms of the outlook for the crop of this year, either, and said he never knew the worms to be so bad. His opinion is echoed by many others. We also find a considerable quantity of the 1880-81 crop held by farmerslittle of the former, but a great deal of the latter-and hope that the lucky lightning may yet strike them. The Harvest.

Hay making is nearly over and barvest ing in its height. The wheat crop of this year excells that of many previous ones. In this connection we may note the advance made by the Lancaster county farmer in the matter of farming machinery. In years before it was a rare exception to see harvesters at work, and a harvester and self binder was indeed a rare exception—a novelty in the section in which it was worked. This year you can see many of these combined labor-saving machines cutting the golden grain and throwing the tightly bound sheaf aside, while the blade of "our father's cradle" is dull with rust following non

All growing crops will be large this year. In the field and in the garden you can see what tells you of a year of plenty.

THE POISON SPREADING.

Flow of the Impure Schuylkill Water Eastward-Physicians Studying the Mystery. The excitement which was caused last week by the discovery that the water in the Schuylkill river had been poisoned still continues unabated. The first indication that the water had been poisoned was by the discovery of numerous dead fish and frogs floating on top of the water for several miles below and above Reading. The water of the canal is also re ported as turning blue and becoming offensive. Reports from all points above and below Reading say that the fish continue to die in large numbers and to float along the river banks. They are now decomposing in the strong rays of the sun and emit a sickening stench. It is reported that the fish which have not died congregate in large schools at points where fresh and pure streams empty into the river. Parties have been guilty of catching the diseased fish which were full of sore spots supposed to be caused by mineral poison. It has not as yet been ascertained whether the parties who caught the fish ate them or offered them for sale. The officials have been informed and will take immediate steps to prevent the catching of fish at this

The river at Reading seems to be get-ting worse instead of getting better. Many theories are advanced as to the cause of the poisoning and the dying of the fish. It did not seem to effect the bass until yesterday, when quite a number were found along the river. A petition will be drawn up and presented to the Leg-islature that fishways be placed in the river. Some think the contamination is caused by refuse matter being thrown in the river. The health commisioner thinks the fish die from some disease or by alkali being washed up from the river bed. The board of health will make an immediate attempt to ascertain the cause of the trouble. Others think that the white deposit in the river is lime, caused by the commingling of the sulphuric acid in the water from the coal mines and limestone water near Reading, and the water is deprived of the ingredients that sustain fish

The president of the Poitstown water company came to Reading with a sample of the water at that point for analysis. in the river at Pottstown and that the people are greatly alarmed. The poisonous water has reached Poenixville, showous water has reached Fogenixvine, snowing that it travels very slowly. It is reported that the waste of the Reading gas works contaminates the water for several miles below Reading. It is alleged that suit will be brought against the company by a prominent retired physician.

Large saving by a very slowly.

Definition of the sight—is of very slow formation, and gives rise to no pain. It is seldom met with except in persons who have passed the middle period of lite.

All diseases of the EYE, EAR, THROAT—also, Chronic and Private Diseases—success falls treated by suit will be brought against the company by a prominent retired physician.

It has become generally known in Potts. town and Reading that the poison in the

river is due to the pumpings from an old

mine at Tamaqua, which has been idle about twenty years.

LONE JACK. Mo., Sept. 14, 1879.

I have been using Hop Bitters, and have received great beneat from them for liver complaint and malarial fever. They are superior to all other medicines.

LANCASTER WATCHES

SWITZERLAND Endorses Pennsylvania

LANCASTER, NOV. 1st, 1878, A. BITNER, ESQ., Manager:

Dear Sir: In answer to your inquiries of Oct. 28th, I have to say that I was absent on my recent European tour just four months, traveling a distance of 12,000 miles. I carried with me a watch made at the Lancaster Watch Factory. Before starting I set it to the time of the Pennsylvania Railroad. It was never changed during the entire trip, and UPON MY EETUEN. IT WAS ON THE MINUTE WITH THE SAME BAILROAD TIME.

When at Geneva. Switzgriand, with a dozen but no sound of the mechanic can be heard. The decayed leaves, the broken benches, and the fallen-down fences that autumn's winds and winter's storms have lain low are being removed, but not one building is being creeted. For many years—eleven in all, we believe—scores yes, hundreds of religious pilyrims have wended their ways to the Landisville camp grounds until its fame was no longer bounded by county or state lines.

The religious programme will be of a high order—some of the most brilliant and learned divines in the Methodist church will be in attendance, lending their eloquence and experience to work out its success. The board of directors have had a number of meetings, but have not as yet fully completed their work. Thursday, July 20, the camp will announce their full plan of action. In and around the village of Landisville the number of meetings are being made and a number of the their second the matter.

Many miserable people drag themselves when Parker's the first does, the first does themselves the first does, the first does, the first does themselves the first does, the first does themselves the first does, the first does themselves and the first does, the first does themselves the first does, the f

This opinion was again expressed with This opinion was again expressed with even stronger emphasis to a party of Americans recently traveling in Switzerland. Under date of "Geneva, August 2, 1881," Miss L. B. Gara writes, in a letter published in the Lancaster New Era: "Mr. Perrine bought two handsome watches from the leading manufacturers here, and Dr. Hampton, of our party, showed them his Lancaster Watch. They examined it and said it was the best American watch they had ever seen—MUCH SUPERIOR TO ANY OTHER MADE IN THE UNITED STATES."

Second Letter (1882) Next Week. GIFT DEAWINGS.

COMMONWEALTH DISTRIBUTION CO 46th Popular Monthly Drawing OF THE

COMMONWEALTH DISTRIBUTION CO. in the City of Louisville, on MONDAY, JULY 31st. 1882. These drawings occur monthly (Sundays excepted) under provisions of an Act of the General Assembly of Kentucky.

The United States Circuit Court on March 31 rendered the following decisions:

1st—That the Commonwealth Distribution Company is legal.

2d—Its drawings are fair.

N. B.—The Company has now on hand a large reserve fund. Read the list of prizes for the
