By Mr. Remley: For a crossing at Col umbia avenue and Caroline street. Re ferred to the street committee, with in structions to have the work done.

By Mr. Remley: To have a gong placed at the residence of each of the engineers of the fire department. Referred to the fire committee.

By Mr. Scheetz: For the erection of street lamps on North Charlotte street. from James street to the Harrisburg turnpike. Referred to the lamp committee, with instructions to have the work done. By Mr. Everts: For a bridge over the

gutter at Rockland and Low streets. Referred to the street committee, with in structions to have the work done. By Mr. Everts: For the passage of an ordinance requiring that all gasoline, coal

oil and similar inflammable materials be kept stored in brick buildings, and only in limited qualities. The Fire Committee's Report

Mr. Cox presented the report of the fire committee, the principal feature of which was a recommendation for the appointment of a committee to confer with a committee of the school board in reference to the purchase of the Mulberry street school property for use as an engine house. It was stated that the Humane fire company wanted an unreasonably high rent for their building, and required also that the city purchase the property at the end of the year for \$6,000. In accordance with this recommendation Messrs, Al-bright, Eaby and Cormeny were appointed a committee on the part of common council. Select Council concurred and Messry. Wolf. Wise and Evans were appointed in that body.

More Resolutions. Mr. Cochran offered a resolution instructing the street committee to lay a crossing at James and Christian streets. Referred to the street committee, with instructions to have the work done.

Mr. Hurst offered a resolution instruct ing the clerks of councils to gather all ordinances passed since the printing of the last city digest, and enter them into a book, and that the clerks be allowed a reasonable compensation for the work. and that hereafter the clerks enter all ordinances in said book.

Mr. Cox thought it would be better to have the ordinances printed for the convenience of members, but after some discussion the resolution passed in the orig inal form. Select council concurred.

Mr. Cochran offered a resolution directing the fire committee to report to coun cils the costs of operating the new fire department for the six months running, from April 1 to October 1, including the cost of reorganization. Adopted. In select council laid on the table.

Dr. Davis stated that he had received his usual mouthly contribution from Mr. Schleich in the shape of a communication several yards long, which was laid on the table without being read.

A Hayes Truck to be Bought. Bids for the furnishing of a hook and ladder truck with all the necessary appurtenances were read from the following: From E. B. Creston & Co., Chicago, price \$1,800, payable thirty days after receipt; a second class truck similarly equipped for \$1,600.

From the La France fire engine com my, of Elmira, N. 1., Hayes patentex tension ladder, truck and fire escape with and the old truck.

From Fred. J. Miller, New York, Still man truck and apparatus, for \$1,300 cash : will allow \$125 for the old truck. Chairman Cox offered a resolution that

the fire committee be empowered to purchase a Hayes truck, saying that he had been one of a committee who witnessed the operation of the truck, and was very much leased with its work; other trucks he said had been thrown out of the market by the introduction of the Hayes apparatus. Mr. Hurst hoped the resolution would

pass, as he thought the city should purchase the best truck that could be procured, and that the matter of a few hundred dollars should not induce the purchase of an inferior apparatus.

Mr. Cochran thought there were pleuty of trucks of lower price that would answer all necessary purposes, and Mr. Smeych expressed similar views. There have been no fires in Lancaster where an ordinary truck would not fulfill all the require ments. Mr. Cox urged that the resolution be adopted and pointed out its many advantages. Mr. Riddle thought the city was unable at this time to invest \$2,700 for a truck, and while he had no doubt the Hayes machine was a very good thing in its way there was not much likelihood called into requisition in this city, where the buildings are not so tall nor so closely built as in larger cities. Mr. Power thought the Hayes truck was what we lecturers will be Judge Tourgee.

A vote was taken on the resolution, the yeas and mays were demanded by Mr. Cochrau, and the measure passed by a vote of 12 to 10, as follows: Yeas-Messrs. Albright, Cox, Eaby,

Hartley, Hurst, Moore, Power, Remley, Scheetz, Schum, Trost, Davis, president-

Nays-Messrs, Buchanan, Cochran, Cormeny, Everts, Huber, Lichty, McKillips, McLaughlin, Riddle, Smeych-10. In select council the resolution was also cleared away, there was seen a confused adopted.

New Ordinances. Mr. Everts introduced an ordiance prohibiting the storage of oil, gasoline and naphtha within the city limits in larger quantities than one barrel, except special committee consisting of Messrs. Hurst, Everts and Huber, who reported it back with an affirmative recommenda

Mr. Schum, on behalf of Mr. Goodman, offered a series of amendments to the ordinance reorganizing the fire department, the salient features of which were providing for the election of an assistant engipeer of the department, at a salary of \$250 per annum, who shall assist the chief at all fires, and in case of the absence, sickness or death of the chief he shall assume the duties of chief; the foremen and engineers of the several companies shall lodge in the engine houses, the former to number of Lancaster people were on hand. receive an annual salary of \$200, and the latter \$400; the drivers and tillerman shall receive \$360 per annum, and the salaries of hosemen and laddermen, the number of whom is increased from four to five for each company, are raised to \$120 per annum. It is also provided that at least two of the hosemen and laddermen of each company shall lodge in the engine houses. The ordinance was

referred to the fire committee. Prior to adjournment President Davis informed council that at the next meeting similar fate though to a less degree. of the body he would be in the "land of the Dakotas," and consequently the mem-bers would have to select one from their number to temporarily fill the chair.

LAWN TENNIS AT HARRISBURG.

The Lancaster Boys Score a Victory. The match game of lawn tennis, played at Harrisburg yesterday afternoon between John Dickey and W. R. Brinton of the Lancaster tennis club, and Messrs. H. Mc-Cormick and Joe. Lynch the champion Harrisburg players resulted in a victory for the Lancaster boys by a score of four series to two.

The first series, which was very good and hotly contested, resulted in a victory for Lancaster; score, 6 games to 3. The second series was won by Harrisburg by a score of 6 to 1. The third series was one of fine playing on both sides and resulted in favor of Lancaster; score, 6 to 3. There were several beautiful and difficult plays at the net between McCormick and Dickey in this series. The fourth series was one of the best and hardest fought, being won by Lancaster; score, 7 to 5. In this series there was some fine swift base line volleying between Lynch and Brinton. The tifth series was easily won by Lancaster; score, 6 to 2. The last series was stubbornly fought and resulted

in favor of Harrisburg; score, 6 to 4.

The fine serving of the Harrisburg players was a leading feature of the game, but the sure and steady playing of the Lancaster boys won them the victory. Mr. Charlton umpired the game very well and satisfactorily; and the Lancaster boys were very kindly treated in every way. This is the first defeat the Harrisburg club has sustained since their visit to Philadelphia two years ago.

ACCIDINT AT MECHANICSBURG.

Two Men Precipitated From a Roof and On Tuesday Luther Berg and James Connelly, painters, were at work on a scaffold which was built against the cupola of John Baer's tobacco house at Mechanicsburg, Upper Leacock township, when the scaffolding broke, and the men fell first to the roof of the tobacco house and thence to the ground, a distance of twenty-five feet. Berg had one leg broken in three places, one of the fractures being below and two above the knee. His cheek bone was also fractured, as were also two fingers of his right hand, and he sustained besides, serious internal injuries. He lies in a very critical condition. He is a son of Rev. Berg, of Mechanicsburg, is an industrious man and a good workman. He has a wife and one child. Connell had no bones broken, but is suffering from internat injuries.

College Re-opening.

The fall term of the Franklin and Marshall college began this morning with an encouraging number of accessions, the freshman class comprising twenty-six members and the old students having re turned in full force. The opening address was delivered in the chapel building at ten o'clock by Prof. Stahr, and a full abstract of his very scholarly and interestng production is printed on our first page o-day. The customary announcements were made by the several members of the faculty, and the institution on "the hill," is launched on another year of effort with fair prospects that will no doubt return good results by the time commencement tide has rolled around.

Fell From a Step-Ladder. Isaac Alexander, while engaged this morning in hanging the shutter of an upstairs window at Hagers & Brothers, fell and was seriously injured, and made a narrow escape with his life That be might reach the upper hinge of the shutter, he stood upon a step-ladder placed inside the window and reached out so far that the step ladder slipped from under him, and he fell with the small of his back across the window sill. He then fell from the sill to the floor inside. Had he fallen outside he would probably have been killed. He suffers a severe concussion of the spine and some internal injuries. He was taken to his boarding house at Mrs. Connelly's in the western part of the city. Dr. M. L. Herr attends him.

THE POOR DIRECTORS.

Why do they Transact Business in Secre On Friday the INTELLIGENCER printed an item stating that " it had leaked out " that the board of poor directors had re quested George Spurrier, superintendent of the county hospital, to resign. The Examiner of yesterday states that the request was made on the 26th of August, and that the board had contemplated making it several weeks previously; that Mr. Spurrier was informed of their action and was given until September 2 to consider the matter; and on that date he wrote the directors a note. stating that their action was a surprise to him, and asking them to furnish him with the reasons which led them to make the unexpected demand. "The board took no further action at that time, nor are any of A further action at that time, nor are any of the members now prepared to say what cigar store.

matter was settled." Now the Intelligencer does propos o give to the public the official action of public officers if such action is of public mportance. Hence reporters have been sent to the meetings of the board of direc tors of the poor when matters of importance were to be considered; but the board has transacted its business in secret session and furnished the report ers only such information as they chose to make public when they adjourned Even the Examiner could not get from members of the board their action in the Spurrier case, but obtained it from a leaky riend of the office. We hold that these public officers, being mere representatives of the people, have no right to shut their doors against the people, when they are transacting business affecting the people's interests. What would be thought of the city councils, the school boards or other public bodies sitting with closed doors The day of star chambers and boss rule is about ending.
