THURSDAY MVENING, DEC. 14, 1869 SOFTLY THE NIGHT IS SLEEPING A CREISTMAS HYMN.

Sortly the night is sleeping On Bethlebem's peaceful hill; Silent the shepherds watching, The gentle flocks are still. But hark! the wondrous music Falls from the opening sky ; Valley and cliff re-echo Glory to God on high!

Glory to God, glory to God, Glory to God! It rings again, Peace on earth, good will to men.

Day in the East is breaking : Day o'er the crimsoned earth: Now the glad world is waking. Glad in the Saviour's birth! See where the clear star bendet! Over the manger blest: See, where the infant Jesus Smiles upon Mary's breast!

Come with the gladsome shepherds, Quick hastening from the fold ; Come with the wise men, pouring Incense and myrrh and gold. Come to Him, poor and lowly, Around the cradle throng;

Come with your hearts of sunshine. And sing the angel's song. Weave ye the wreaths unfading. The fir tree and the pine; Green from the snows of winter.

To deck the holy shrine; Bring ye the happy children ! For this is Christmas morn : Jesus, the sinless infant. Jesus, the Lord, is born.

Household Recipes.

Boomerang. To remove oils, varnishes, resins, tar oyster soup, currant jelly, and other se-lections from the bill of fare, use benzine soap and chloroform cautiously, with whitewash brush and garden hose. Then hang on wood pile to remove the pangent effluvia of the benzine.

To clean ceilings that bave been smeared by kerosene lamps or the fragrance from fried salt pork, remove the ceiling, wash thoroughly with borax, turpentine and rain water, then hang on the clothes line to dry. After, pulverize and spread over the pie-plant bed for spring wear.

To remove starch and roughness from flat irons, hold the iron on a large grindstone for twenty moments or so, then wipe off carefully with a rag. To make this effective the grindstone should be in motion while the iron is applied. Should the iron still stick to the goods when in

use, spit on it. To soften water for household purposes put in an ounce of quick lime in a certain quantity of water. If it is not sufficient use less water or more quicklime. Should the immediate lime continue to remain deliberate, lay the water down on a stone and pound it with a baseball

To give relief to a burn apply the white of an egg. The yolk of the egg may be eaten or placed on the shirt bosom, accaren or placed on the shirt bosom, according to the taste of the person. If the burn should consider the person of the person of the person. burn should occur on a lady she may omit the last instruction.

To wash black silk stockings, prepare a tub of lather, composed of tepid rainwater and white soap, with a little amonia. Then stand in the tub till dinner is ready. Roll in a cloth to dry. Do not wring but press the water out. This will necessitate the removal of the stockings.

If your hands are badly chapped, wet them in warm water, rub them all over with Indian meal, then put on a coat of glycerine, and keep them in your pockets for ten days. If you have no pocket convenient, insert them in the pocket of

Woolen goods may be nicely washed, i you put half an ox gall into two gallons of tepid water. It might be well to put the goods in the water also. If the mixture is not stong enough put in another ox gall Should this fail to do its work, put in the entire ox, reserving the tail for soup. The ox gall is comparatively useless for soup and would not be preserved as article of

Manuring Trees. Germantown Telegraph.

We notice frequently outlandish recom-mendations, agriculturally and horticulturally, which must lead to failure and discouragement. We have nave now before us one of these for stimulating the growth of trees, by boring holes in the ground and pouring in liquid manure about the roots! How the roots are generally to be got at in this way we cannot see. What better can be desired than applying the same liquid uniformly over the ground and let it soak in? If the surface is very hard it should be loosened. Or, what we contend is still better, top dress the surface as far as the branches extend with good manure, and the substance will soon find its way uni-formly to the roots with the assistance of the rains. Our own judgment and practice has always been to treat the soil in which the trees, fruit and ornamental, grow, as far as can be done, the same as soil that is cultivated for vegetables or general farm crops, and we have always been satisfied with the result. As some evidence of the effect of such application we will mention this instance: Some years ago a hemlock soruce had a rusty appearance and at last fell much behind the others in depth of color. It was about twelve feet in height, and must have been set out at a spot where the soil was not as affluent as that where others were planted. At anyrate two wheelbarrow loads of good manure, spread out as far as the extremity of the branches restored it perfectly the first year, and it was among one of our handsomest trees.
