will keep down instead of promoting the

The increase of the for meanly all over the country scenas to be monack de. There is scarcely a section where fixes Weat is High Farming. The subject of what is commonly called high farming is seldom out of the columns abound but that their multiplying is or agricultural journals, and is always respoken of. At some points the y play haves with the position. garded as an unsettled subject. In this as in ocarly all halling topics affecting the great branch of the workl's industry, there are two sides. It must be clear to The present is in excellent lime tarx-maine the labels attached to fruit trees.

every one that if there are any means by Unless plenty of space is given for the which we can permanently double the branch to expand, the wire to which the label is attached will cut into and injure amount of the crop from any given quat-tity of land without too much outlay of capital to accomplish it, we arrive at the

Nearly \$11,000 000 worth of cattle are very height of successful farming. The now grazing in whit six years ago was trouble with most of the increased crops is obsolutely Indian country in Texas, "Grazing " is becoming a popular as it is a very proficable pursait, and from the that it costs too much to obtain them. Either there is required a great expenditure of money, or what is just as bad, a rate at which it is increasing our supply of largo investment of labor, and it often beef will be greater than ever in comparturns out that the man with but moderate son with population, and the price must crops makes more aloney than some people me down and stay down.

with larger on s. Still, this is not always so; and it is just here that successful ag-riculture comes in. We have to know not Notice is given in New Jersey that ap-plication has been made to the Legisla-ture of that state for a law to regulate the only how to get superior crops from the size of fishing nots in that state and proland, but have to flad out what these inlubit the use of any nets in the waters of creased crops cost. The truth is, we need that commonwealth having a mesh less many more facts than we are familiar with in the matter of the draining, in regard to

eter. This is a wise measure. the profit and cost of underdraining. There Mr. W. S. Cole, in his "American Proit seems to be no doubt that in many cases Book," an interesting little work of thirty there has been prefitable results from the years ago, says : "A farmer would not practice. plant an orchard under the belief that he

But on the other hand, we know that it is generally only the successes that get into plat. These who fail pocket the loss and say nothing about it. We know would not live to cat the fluit. His son was of like mind. But a grandson planted for pesterity; and both tather and grand-father enjoyed the fruit for years, plong many instances such as these. We know with the more considerate gran ison that the auswer is, from those who succeed, that those who do not have not done

A very nice way to use the kidney of beet is to boil it for hait ou hour, chop ap it right; but however that may be, they seem to be men of as good intelligence as very line, removing all fat and gristle, add two onious chepped very fine, and dress it these on the other side. That land which is wet can be made dry by underdraining with oil, vinegar, sale and red popper. The nit, salt and popper should be added first and thoroughly mixed before the vinegar is is of course beyond all question. That comparatively dry last is best then for vegetation, and will produce heavier crops, is also andisputed. What is added. The same play a topted with cold boiled means of any kind is vary nice. wanted are the figures as to the yield be-Where good onve oil is not on hand, good Lick create may be used instead; fore the underdraining, the cost of the operation and the subsequent produce. If hand which yielded say two tons of hay

The distinction of prairie-chickens is before underdraining yields four tons afterwards, and will continue to do this for years with no more outlay annually

Silk novelties innumerable and indescribable. Everything FACTS I that ladies or dressmakers have occasion for in matching, decorating, combining. What we are remarkable for, more than for anything else in silks, is variety; or, at least, we are reputed so. You hear it said by everybody: "If you want to match anything, or find a rare silk, even an unexpectable one, go to Wanamaker's."

The other peculiarity that everybody expects to find here is less pleasant to speak of; lower prices. We put it second, because there are people who don't credit us with lower prices. Still, we imagine that if one should assert the contrary, almost everybody in Philadelphia would believe it.

Oftener we speak of other aspects of our trade; aspects less obvious or less recognized. It is well occasionally to give old news.

Next-outer circle, south entrance to main building.

Warm skirts for ladics, and leggings for ladies, girls and little girls. The warm skirts are satin, satin-and-cloth, satin-andfelt, satin-and-Italian-cloth, and Italian, all guilted; cloth, flannel and felt prettily trimmed, not quilted, warm enough without. The leggings are all sorts; one very useful and fairly pretty sort, woven, at two-thirds value, For sale wholesale and retail by H. B. Cocil-RAN, Druggist, 137 and 139 North Queen 25 to 65 cents.
