There was a glass case full of bottles, washes and wigs, and a regular dentist's chair that suggested a world of comfort. To me presently came a dapper little man in a velvet cutaway coat and whose face wore a complacent smirk. I bashfully suggested the dimple question and asked for some points. I really wanted a dimple in my arm and told him so. But I insinuated my disbelief in his ability to produce the necessary article. Whereupon he convinced me by

This is how it is done : My arm being bare and the exact spot indicated, be placed a small glass tube, the orifice of which was extremely small, upon the spot. This tube had working within it a piston, and was so small that when the handle was drawn up the air was exhausted from the tube, and it adhered to the flesh, raising a slight protuberance, Around this raised portion the oporator daintily tied a bit of scarlet silk, and then took away his suction machine The little point of skin that was thus raised he sliced off with a wicked-looking knife, bringing the blood. I tried hard not to scream, but it was so unexpected that I

Then he bound up the arm, placing over the wound a small silver object like an inverted cone, the point of which was rounded and polished. This little point was adjusted so as to degress the exact centre of the cut. Then he told me to go away and not touch the spot until the next day. When I came at that time he dressed my arm again, and this operation was repeated for five days, when the wound was healed. The silver cone was removed, and there sure enough beneath it was the prettiest dample in the world And all I had to pay was \$10.

BROWN'S IRON BITTERS.

TRUTHS

The blood is the foundation of life, it circulates through every part of the body, and unless it is pure and rich, good health is impossible. If disease has entered the system the only sure and quick way to drive it out is to purify and enrich the blood.

These simple facts are well known,

and the highest medical authorities

agree that nothing but iron will restore

blood to its natural condition; and also that all the iron preparations hitherto made blacken the teeth, cause headache, and are otherwise injurious. Brown's Iron Bitters will thoroughly and quickly assimilate with the blood, purifying and strengthening it, and thus drive disease from any part of the system, and it will not blacken the teeth, cause headache or

Wanamaker's.

Silk novelties innumerable and indescribable. Everything that ladies or dressmakers have occasion for in matching, decorating, combining. What we are remarkable for, more than for anything else in silks, is variety; or, at least, we are reputed so. You hear it said by everybody: "If you want to match anything, or find a rare silk, even an unexpectable one,

go to Wanamaker's." The other peculiarity that everybody expects to find here is less pleasant to speak of; lower prices. We put it second, because there are people who don't credit us with lower prices. Still, we imagine that if one should assert the contrary, almost everybody in Phil-

adelphia would believe it. Oftener we speak of other aspects of our trade; aspects less obvious or less recognized. It is well occasionally to give old news.

Warm skirts for ladies, and leggings for ladies, girls and little girls. The warm skirts are satin, satin-and-cloth, satin-andfelt, satin-and-Italian-cloth, and Italian, all quilted; cloth, flannel and felt prettily trimmed, not quilted, warm enough without. The leggings are all sorts; one very useful and fairly pretty sort, woven, at two-thirds value, 25 to 65 cents.

West of south entrance to main building. Furs have to be thought of. We're busy enough as to making. If we advertise at all, we ought to say what will not oppress us with too much making. Perhaps thisit is. A great many seal coats and fur-lined circulars are ready-made. More sizes are ready-made here than anybody expects; especially the unexpected sizes. Ready-made work we can make in July. Why shouldn't we make all the shapes and sizes ready-made?
