Voluntary Tributes of Gratitude for Benefits Received.

DEAR SIR,—Please allow me the privilege of giving my testimony regarding the wonderful curative properties of your invaluable medicine, Hunt's Remedy. During the past six or seven years I have been a great sufferer from Kidney disease, and during a great part of the time my sufferings have been so intense as to be indescribable. Only those who have suffered by this dread disease know of the awful headache, and pains of all kinds, accompanied by great weakness and nervous prostration, loss of force and ambition which invariably attend it. I had all these troubles intensified, and such a bad condition of mind, that I could not get up out of my chair except by putting my hands on my knees, and almost rolling out before I could straighten up. I tried the best doctors, and many kinds of medicines, but all failed to help me, and I experienced so long endeavoring to get cured that last spring I was in very poor shape, and in seeking for relief my attention was directed by a friend to the remarkable cure of Kidney disease, etc., which were being accomplished by Hunt's Remedy. I was induced to try it, and began to take it, and very soon "limbered up" as it were; my severe backache and the intense pains had subsided, and I experienced relief, notwithstanding I had been bothered with this complaint so many years.

When I began to take Hunt's Remedy I was considerably run down in general health and therefore also from loss of appetite. Ever since I have been taking the Remedy, however, my improvement has been most marked; my former complaints, aches, pains, etc., have disappeared, and I now feel like my former self, hale, hearty and sound in health. I shall always keep Hunt's Remedy with me, and would most earnestly recommend all those who are sufferers from Kidney or Liver disease, or diseases of the Urinary and Genital Organs to use Hunt's Remedy, and take no other.

Yours, very truly,
HERBERT H. SHELDON,
No. 289 Westminster St., Providence, E. I.

"In the lexicon of youth, etc., there is no such word as 'Fail.'" That "lexicon" is now found in the laboratory of Hunt's Remedy. It knows no such word as—Fail.

THE TARIFF.

AS VIEWED BY "THE WORLD."

The Demands of "Metallic Industries"—The Results of Home Competition—The Number of Iron Masters.

New York World.

If an American railway buys in Wales a ton of steel rails for \$35 on board, brings the rails to New York and pays a duty of \$23, which is the present rate, these \$38 go into the treasury. That tax is a "revenue" tax, and if it needed by the government it is a proper tax. But if an American buys a ton of domestic steel rails, and the price of these rails is increased by an ad valorem placed by Congress in the way of importing similar rails from Wales, that increase of the price is a "protective" tax which the buyer and consumer pay, not into the Federal treasury at all, but into the pocket of the maker of the steel rails.

That "protective" tax finally, however, falls on the people who use the purchasing railway.

The "metallic industries" denounce the Senate bill because it has been framed, they say, on the idea that "protective" taxes are not such benefactions and favors conferred upon the taxpayers as the "metallic industries" insist that these taxes really are. The query places in metallic argument that a "protective" tax will, in normal circumstances, cheapen and is intended to cheapen the price of the fabric protected, and therefore that the Senate bill is to be condemned because it will tend, by reducing the taxes on metals, to enhance the price of metals. And yet these funny fellows argue, in the next breath, that they must have the Chinese barrier of "protective" taxes kept up in order to save them from being destroyed by foreign competition, which threatens to close our iron mines, stop our iron and steel works, reduce wages, and play havoc generally!

Now for a few facts and figures!

In the first place, the conditions of the capital invested in iron mills or in steel mills are not identical in every state of the United States. The time will soon come, even if it has not already come, when the workers in iron and steel in the West and the mountains must find it impossible to compete with the workers southward and westward of the mountains. The time will soon come when the iron and steel "interests" of Ohio and Pennsylvania will cry more piteously for protection against Southern pig-iron and steel than they now cry for protection against Great Britain.
