MEDICAL.

TAKE

Simmons' Liver Regulator

For Dyspepsia, Costiveness, Sick Headache, Chronic Diarrhoea, Jaundice, Impurity of the Blood, Fever and Ague, Malaria and all diseases caused by Derangement of Liver, Bowels and Kidneys.

SYMPTOMS OF A DISEASED LIVER.
Bad Breath, Pain in the Side, sometimes the pain is felt under the shoulder-blade, mistaken for Rheumatism; general loss of appetite; bowels generally costive, sometimes alternating with diarrhoea; the head is troubled with pain, is dull and heavy, with considerable loss of memory; feet cold or burning; a sensation of leaving nodules considering which ought to have been done; a slight, dry cough, and sometimes a hoarse, husky, rattling cough, often mistaken for consumption; the patient complains of weariness and debility; nervous, easily excited; feet cold or burning; sometimes a prickly sensation of the skin extends to the face, and dependent, and although satisfied that exercise would be beneficial, yet one can hardly summon up fortitude to take it in fact, and every remedy several of the above symptoms attend the disease, but cases have occurred when but one or two of them exist, and when attention (as has been shown the Liver to have been extensively deranged).

It should be used by all persons, old and young, whenever any of the above symptoms appear.

Persons suffering with Unhealthy Localities, by taking a dose occasionally to keep the Liver in healthy action, will avoid all Malaria, Bilious attacks, Headaches, Scurvy, Dropsicalness, Depression of Spirits, etc. It will invigorate like a glass of wine, but is not intoxicating, and will not excite.

If you have eaten anything hard or digestion, or feel heavy after meals, or sleepless at night, take a dose of the Regulator in the evening, and your sleep will be sweet. Time and Doctors' Bills will be saved by always keeping the Regulator in the house.

For whatever the ailment may be, a thoroughly safe purgative, alternative and tonic can never be so useful. The remedy is harmless and does not interfere with labor or pleasure.

It is a PURELY VEGETABLE.

And has all the virtues of the jalap, colocine or Quinine, without any of the injurious after-effects.

A Governor's Testimony.

Simmons' Liver Regulator has been in use in my family for some time and I can testify to it as a valuable addition to the medical cabinet.

Hon. Alexander H. Stephens, of Ga., says: "I have derived much benefit from the use of Simmons' Liver Regulator, and wish to give it a further trial."

"I have used many remedies for Dyspepsia, Liver Affection and Debility, but never have found anything so successful as the Regulator. Simmons' Liver Regulator has, I sent from Minnesota to Georgia for it and would send further for such remedies and would advise all who are similarly affected to give it a trial as it seems the only thing that never fails to relieve."

P. M. JANNEY, Minneapolis, Minn.
Dr. T. W. Mason says: "From actual experience in the use of the Regulator in my practice I have been an ardent admirer and prescriber since a purgative medicine, and take only this on my regular prescriptions on the wrapper the RED TRADE-MARK and SIGNATURE OF J. H. ZEILIN & CO."

For sale by H. E. Cochran, Druggist, 137 and 139 North Queen Street.
FOR SALE BY ALL DRUGGISTS.

KIDNEY-WORT.

SAID HE, "THIS IS HORRIBLE, BLOOM'S Spring Weather."

Said she, "I know it, almost everyone, no matter how well ordinarily, needs a thorough course of physic in the spring to cleanse the system of the accumulated impurities of the winter months; no other remedy is so good as Kidney-Wort for this purpose. It is a mild, cleansing, and refreshing agent, and enables them to perform their duties perfectly. Headache, Biliousness, Jaundice, and all such spring diseases yield at once to its restorative power."

Said he, after arguing awhile, "KIDNEY-WORT! YES, I WILL GET IT AT ONCE."

Said she, "Dr. Ballou says it is the best of all family medicines, for the following good reasons: Because it is a remedy that acts on the Liver, Bowels and Kidneys at the same time, making each organ doing nature's part, and throwing off disease. Because it is a wonderful tonic and renovator. It expels the poisonous humors of the blood, cleanses the Liver, regulates the bowels, restores the kidneys to their normal action, and drives out the despondency and gloom of ill health. Because it has been tried and proved. Its enormous sale is not caused by extravagant advertising and the persistent pushing of its name by the vendors, but because it has been created by its own virtues, and the thousands of remarkable cures it has performed.

If you have trouble with your Kidneys, Liver or Bowels, you will find it the remedy you need."

Said he, a week later, "Mary, You are an Angel for urging me to get that Kidney-Wort. It has done for me just what you told me it would. Everyone should use it as a SPRING CLEANSER."

It is a Purely Vegetable Compound!

The Safest, Surest and Best Remedy ever discovered for Kidney Diseases, Liver Complaints, Female Disorders, Piles, Gravel, Constipation, Rheumatism, Gout, Dropsicalness and Debility.

PHYSICIANS ENDORSE: HEARTILY!
"I have found Kidney-Wort to cure a man who, doing all that is claimed for it. After using it several days he writes to me, 'I feel better than any remedy I ever used.'"
H. E. Clark, M. D., South Hero, Vt.

DANGEROUS KIDNEY DISEASE.
"A stroke of paralysis prostrated me, also dangerous disease of the kidneys, and the doctors failed. But Kidney-Wort cured me!"
E. Slade, 18 Blackstone St., Boston, Mass.

KIDNEY TROUBLE AND RHEUMATISM.
"Two of my friends had my trouble," says Mr. Eldridge Malcom, of West Bath, Me. "I had a severe attack of Rheumatism, and my kidneys were so affected that I was unable to walk. We all had Kidney Disease and Rheumatism. Mine was of 20 years standing. Kidney-Wort has entirely cured all three of us."

A SAFE MAN SAVED!
"I had kidney-trouble for many years. Kidney-Wort cured me."—J. M. Dray, of Diebold Safe Co., 25 Canal St., New Orleans.

"Please tell my brother, and the public, too, of my success in curing him, through the St. Louis Globe-Dem. and Home and Health, which have given me the credit of my liver disorder which I had for 20 years."
—J. M. Dray.

PREPARATION OF BLADDER.
"Two years duration, was my wife's complaint," writes Doctor C. M. Sumner, of San Hill, N. H. "Her urine was bloody, and she was sometimes bloodily. My wife's prescription only cured her. The specific medicine I sold by all druggists at \$1 per package, or six packages for \$5, or will be sent free by mail on the receipt of the money. My wife, however, has entirely cured her."

Sold by all Druggists. 137 and 139 North Queen Street.

KIDNEY-WORT FOR SALE AT H. E. COCHRAN'S DRUG STORE, 137 AND 139 NORTH QUEEN STREET.

GRAYS SPECIFIC REMEDY.—THE GREAT CURE FOR IMPOTENCY, AND ALL DISORDERS THAT FOLLOW LOSS OF MEMORY, GENERAL LASSITUDE, RHEUMATISM, AND ALL AFFECTIONS OF THE VISION, PREMATURE OLD AGE, AND MANY OTHER DISEASES THAT LEAD TO DEBILITY OR CONSUMPTION AND PREMATURE GRAVE. Full particulars in our pamphlet, which we desire to send free by mail to every one. The Specific Medicine is sold by all druggists at \$1 per package, or six packages for \$5, or will be sent free by mail on the receipt of the money. My wife, however, has entirely cured her."

Sold by all Druggists. 137 and 139 North Queen Street.

THE GRAY MEDICINE CO., N. Y. apr 31 1883

FARM AND GARDEN.

HINTS FOR THE HUSBANDMAN.

For Tillers of the Soil—Spring Notes—Seasonable Suggestions—The Market for Breadstuffs.

We find in the April number of the Agricultural Register, an elaborate essay on free trade, written by a gentleman who hails from the state of Iowa, and who seems to labor under the delusion that the principal markets for the products of western agriculture is to be found in Europe, and this in fact is the fact that our exports of cereals amount to less than ten per cent., while the home consumption is fully ninety per cent!

In the course of his labored effort to prove this, he asserts and assumes as a fact that the Eastern states, meaning thereby the New England and Middle states, are very nearly self-sustaining with regard to food. Now, any such statement as this is simply based on ignorance. The state of New York is not only not self-sustaining, but depends upon the West for fully four-fifths of her breadstuffs and more than half of the meat she consumes. The case of New England is still stronger. Here in Pennsylvania, we do, it is true, make a much better show than this, but our case is gradually becoming assimilated to that of New York, for the simple and obvious reason that the Western competition against us is absolutely overwhelming.

The Peach Prospects.

The tone of letters received within a few days from "peach centres" in Delaware and Maryland, is in the highest degree favorable for the prospect of a large yield of peaches ever grown. Everything will depend, however, upon the absence of sharp, damaging frosts from this time out. The only other fear now is that from the great superfluity of buds the trees may be so crowded as to interfere with the size, and as the thinning-out the fruit would be a herculean work where the plantations are extensive, it would probably not pay, and we believe it is seldom done.

A farmer in the adjoining county of Montgomery told us the other day that he raised last year's crop of peaches, he saw during the whole of last year's past season, which he sold in the neighboring towns at a good price, thus bearing out what we have repeatedly said, that as good crops of peaches can be grown in Pennsylvania as any where else.

Horse-raising at Exhibitions.

We desire again to call the attention of our agricultural societies proposing to hold exhibitions the ensuing autumn, to the offering of a good, solid premium for the best horse-raising. We are very certain that if our suggestions are presented some weeks ago, were to be carried out generally by our societies, it would exert a vast influence upon skillfulness in shoeing, and would secure the usefulness, if not save the lives of thousands of horses every year. We are pleased to see that a number of our leading agricultural societies as well as other journals have endorsed our recommendation by publishing the article to which we allude, which was condensed as much as possible in order that it would be spread as widely as possible in our general publication. We refer to it again that it may not be overlooked in making up the lists of prizes which are now being prepared.

Tomatoes and Egg-Plants.

While tomato plants can be set out any time now, if they are protected against frost, and whenever they may likely be a frost, the egg-plant should not be set out before the last week in May, and then should be protected during cool nights. They are one of the most difficult vegetables to grow, and require all the pains and attention that the space occupied by the roots being very small, they require the richest soil and heavy manuring from the barnyard. Both plants should be well mulched. To afford them certain protection, prepare boxes of rough half-inch lumber, about ten inches wide at bottom, and five or six inches at top, from twelve to fifteen inches high, made of four pieces, and open at top, as there need be no fear of the frost disturbing the plants through this aperture. With care in sowing them away in the yard when not needed, they will last fifteen to twenty years, and are a sure protection for any tender plants.

Clear Up and Cleanse Your Premises.

The warm weather is here, and it behooves every citizen to cleanse his premises of all offensive matter in order that they may become perfectly clean and healthy. There is no doubt at all that a great deal of the sickness visiting families proceeds from filthy cellars, sinks, yards, outhouses, styes, &c. These things are neglected by many as are other duties from pure carelessness, while others never dream of paying any attention to them, not thinking it worth while. There are several remedies for this bad, unhealthy condition of things that can be easily applied. The first is to put one pint of the honor of chloride of lime in a bucketful of water, and sprinkle over decayed vegetable matter. For this purpose nothing surpasses it; indeed, it is a perfect deodorizer. The second is to take four ounces of sulphate of iron, one quart of water, and dissolve it in a bucketful of water. This will in most cases prove a sure remedy in destroying all offensive odors. The third is to take simple chloride of lime and sprinkle in damp cellars, over outside heaps of fish, thirty yards, or thereabouts, before they are taken to a place where a general cleaning-up, removal of everything offensive or nasty, to a place where no harm can arise. These chemicals can be purchased at the druggists, and as prices go are not dear.

The labor of cleaning out premises by either one of these remedies is trifling, and either one is not worth mentioning. If it were ten times greater, both the labor and expense should be willingly incurred. But perhaps the best procedure is to clean up the cellars, yards, outhouses, styes, &c. systematically. Especially should the cellars, sinks, and everything about the house be kept free of all offensive matters at all times. Cellars should be thoroughly cleaned out twice a year, and every year, once at least. Sinks and outhouses should be particularly attended to by once a week pouring into the pipes a quantity of boiling water. Privies can be rendered completely inoffensive by the application of fresh earth from time to time.

Protect the Partridges.

There was a meeting of agriculturists held some time since in the West, at which the question of preserving partridges upon our farms and in our gardens to destroy insects and vermin generally was presented and facts were shown that they are very destructive during the growing season of the enemies of our plants, flowers, fruits and grain. One speaker said that in view of these services the partridge ought to be protected against the hunter, and the farmer and his boys as well; that no bird is more harmless and none more useful; that to shoot or trap it for stewing, broiling or making potpies, was vented if possible; and that it was the

only bird that remained with us through the winter, after being deserted by all others. But this is easier said than done. Human nature, we are a little apprehensive, will desert a trifle of change and educating before this partridge millennium arrives.

To show, however, how useful this beautiful and harmless domestic bird is, it was at the same time stated that a flock of partridges were seen running along the rows of corn in spring, and as seeing them engaged at something which was believed to be pulling up the young plants, one of them was killed and its "crop" examined, which was found to contain one cutworm, 21 striped bugs, and over 100 other insects. Another related that he had adopted measures to protect the bird, and that they had become so numerous and so tame that hundreds of them, after falls of snow, could be seen in his barnyard with the fowls where they were fed. As a result of their presence upon the premises, his wheat crops were usually abundant, while in many other places not far off the chinch bug and other insects had destroyed half the crop.

This suggestion is worthy the consideration of farmers, and if practicable it ought to be adopted. It is, however, the first, while in many other places not far off the chinch bug and other insects had destroyed half the crop.
