ON WE GO.

WONDERS OF MODERN SCIENCE.

The Speed of the Sun-The Wild Race Our Entire Solar System.

N. Y. San.

It is customary to look upon the sun as if it were the centre of the universe, an immoveable flery globe around which the earth and other planets revolve while it remains fixed in one place. Nothing could be further from the truth. The sun, is in fact, the most wonderful of travellers. He is flying through space at the rate of not less than a hundred and sixty millions not less than a hundred and sixty millions of miles in a year, and the earth and her sister planets are his fellow voyagers, which, obeying his overpowering attraction, circle about him as he advances. In other words, if we could take up a position in open space in advance of the sun, we should see him rushing toward us at the rate of some 450,000 miles a day, chased by his whole family of shining worlds and the rast swarms of meteoric bodies which the vast swarms of meteoric bodies which obey his attraction. The general direction of this motion of the solar system has been known since the time of Sir William Herschel. the time of Sir William Herschel. It is toward the constellation Hercules, which, at this season, may be seen in the northeastern sky at 9 o'clock in the evening. As the line of this motion makes an augle of fifty odd degrees with the plane of the carth's orbit, it follows that the earth is not like a horse at a windlass, circling around the sun forever in one beaten path, but like a ship belonging to a flect whose leader is continually pushing a flect whose leader is continually pushing its prow into unexplored waters. The path of the earth through space is spiral, so that it is all the time advancing into new regions along with the sun. She is on a boundless voyage of discovery, and her human crew are born and die in widely separated tracts of space. Think of the distance over which the travels of the sun have borne the earth only since the beginning of human history! Six thousand years ago the earth and sun were about a million of miles further. were about a million of miles further the charge that he was insane. The testimony on the rehearing was very conflicting, but it was shown that the philosopher was not dangerous; so he has once more returned to enjoy his communion with whole human race has been making a voyage through space, in comparison with which his longest vo, a, o was as the foot-step of a fly. Thus the great events in the history of the world may be said to have occurred in different parts of the universe. An almost inconceivable distance separates the spot which the earth occupied in the time of Alexander from that which it occupied when Casar invad ed Gaul. The sun and the earth have wandered so far from their birthplace that else. the mind staggers in the attempt to guess some common centre, but if so, no means has yet been devised of detecting the form or dimensions of his orbit. So far as we can see the sun is moving a straight line. Since space is believed to be filled with some sort of ethereal medium, curious consequences are seen to follow from the

globe like the earth rushing at great speed bargains:

Bainass, \$1.23, and \$1.50, \$1.75 and \$2, and upwards. These come from our own work rooms.

Ladies' Rough-and-Ready but still the earth rushing at great speed through such a medium will encounter wards. These come from our own work rooms.

Ladies' Rough-and-Ready but still there will be correspondingly small, but still there will be resistance. If the medium be exceedingly rare, as it must be in fact, the resistance will be correspondingly small, but still there will be resistance. If the medium be exceedingly rare, as it must be in fact. The some resistance will be correspondingly small, but still there will be resistance. If the medium will encounter wards. These come from our own work rooms.

Ladies' Rough-and-Ready Bonnets and Hats, all colors or but around the sun would encounter the continuous some resistance. If the medium will encounter the distribution of the plane of its axis to the plane of its orbit around the sun, would encounter the continuous and the sun work rooms. orbit around the sun, would encounter the resistance of the ether principally on its ers at 25c a spray for millinery and corsage. These are about the earth, this law of distribution is changed, and from summer to winter the There is a new counter for ploughs through the other with its summer, although the resistance of the two hemispheres, yet it is still fest princi-pally in the northern hemiphere, and the south pole remains practically protected. It follows that the southern hemisphere,

and particularly the south polar regions, are more or less completely sheltered the whole year round. It might then be suposed that the impact of the particles of e ether shouldered aside by the earth n its swift flight and the compression preduced in front of the advancing globe would tend to raise the temperature of Only first-class workmen can the northern hemisphere as compared make them, and, as yet, we have south pole, being more or less directly in not been able to make sufficient the wake of the earth, and in a region of rarefaction of the ether, would constantly

ossess a remarkably low temperature. Now, it is known that the south polar regions are more covered with ice and snow han those of the north, and that the temperature there the year around is lower. Whether this difference is owing to the effects of the earth's journey through the ether is a question

The sun, too, moves with his northern emisphere foremost, and it is worthy of remark that it has been suspected that the northern hemisphere of the sun radiates more heat than the southern.

But, whatever effect it may or may not have upon the meteorological condition of New India Silks, black the carth, the fact that the solar system is thus voyaging through space is in itself exceedingly interesting. Not the wildest traveler's dream presents to the imagina-tion such a voyage as this on which every inhabitant of the carth is bound. A glance now for 75c., and quite a good at a star map shows that the direction in which we are going is carrying us toward a region of the heavens exceedingly rich that of the region of space in which he now is. The inhabitants of the globe at that distant period will certainly behold new and far more glorious beavens, though

the earth may be unchanged. AN ECCENTRIC PARMER.

How He Lives in Unlifornia. A case in Los Angeles, California, has excited much attention because of the difficulty of drawing the line between eccentricity and insanity. Frederick M. Shaw, who lives in the Cahuenga mountains, nine miles from Los Angeles, was declared insane by the superior court, but on a rehearing the judgment was set aside and he was released. The charge who, it is shrewdly suspected, coveted his land. Shaw's history is so peculiar that it is well worth recalling briefly. He is a relative of Chief Justice Shaw, of Massa-

ains, made himself a house in a tree top, and every night ascended to his aerial tenement and pulled up the ladder after him. He dressed in peculiar style, wearing only a flannel shirt and trousers, and lived upon fruits and nuts. The fruits of this communion with nature were a series of letters on the creation of the human species and the best methods of securing health, which were printed in the Los Angeles newspapers and gave him a local reputa-

which were printed in the Los Angeles newspapers and gave him a local reputation of half philosopher, half crank. His fame even spread beyond the coast, and among those who became deeply interested in the philosopher was a New Jersey schoolmistress, Margaret Garey Wright.

A correspondence sprang up between the two. Shaw proved to be an impassioned letter-writer, and the wooing which he carried on at long range was approprihe carried on at long range was appropriately ended by a marriage by telegraph on June 4, 1879. A dispatch was sent to Shaw by the Rev. C. S. Coit, of Newark, N. J., saying: "Will you take Margaret Garey Wright, of this city, now present to be your wedded wife?" To this Shaw responded: "I will;" and two witnesses being at each end of the line, the marriage was accomplished. The bride was very slow about joining her husband, but at last, after he had given up all hope of seeing her, she appeared one day in Los Angeles and was taken out to the recluse's mountain attents. mountain retreat by a mutual friend. The latter went on in advance to prepare the bridegroom, whom he found clothed only in a shirt and cap, gathering honey. He was prevailed upon to don a pair of trousers to meet his bride. The meeting was rapturous and the couple set up housekeeping in a shanty which Shaw had built under the branches of his favorite built under the branches of his favorite tree. To the bridegroom's store of walnuts and honey was added the gift of a box of raisins from the mutual friend. In this primitive fashion the couple lived for two years, when the woman grew weary of fashions in fig leaf and an ascetic diet, and took up her residence in the town. Shaw grew more eccentric, and some of his atterances in the presence of some of his utterances in the presence of a neighbor who had worried him led to

Wm. McCartney, 8s Lloyd street, Buffalo, N. Y., 'ell and sprained his ankle. His employer, H. Anderson, 94 Main street, procured some Thomas' Eclectric Oil and he says that a few applications enabled him to go to work as usual. For sale by H. B. Cochran, druggist, 137 and 139 North Queen street.

We Challenge the World. When we say we believe, we have evidence to prove that Shiloh's Consumption Gure is decidedly the best Lung Medicine made, in as much as it will cure a common or Chronic Cough in one-half the time and relieve Asth-Cough in on e-half the time and relieve Asthma, Bronchitis, Whooping Cough, Croup, and show more cases of Coasumption cured than all others. It will cure where they fail, it is pleasant to take, harmless to the youngest child and we guarantee what we say. Price, 10c., 50c and \$1.00. If your Lungs are sore, Chest or Back lame, use Shiloh's Porous Plaster. Sold by H. B. Cochran, druggist, Nos. 137 and 33 North Queen street.

Physical Suffering. No one can realize, except by personal experience, the anguish of mind and body endured by sufferers from dyspepsia, indigestion, constipation, and other diseases of the stomach. Burdock Blood Bitters are a positive cure for this direct of all diseases. Price \$1. For sale by H. B. Cochran, druggist, 137 and 139 North Queen street. 139 North Queen street.

A Dangerous Counterfeit.

There are dangerous counterfeits in circulation purporting to be "Walnut Leat Hair Restorer." The strongest evidence of its great value is the fact that parties knowing its great efficacy try to imitate it. Each bottle of the genuine has a fac simile of a walnut kalblown in the glass; and a Green Leat on the outside wrapper. The "Restorer" is as harmless as water, while it possesses all properties necessary to restore life, vigor, growth and color to the hair. Purchase only from responsible parties. Ask your druggist for it. Each bottle is warranted. JOHNSON, HOLLOWAY & GC., Philadelphia, and HALL & RUCKEL, New York. A Dangerous Counterfeit
