THE PRESBYTERIAN AND LUTHERAN. The General Assembly at Saratogo,-The Ministerium in Norristown-What

Was Done.

In the Presbyterian general assembly in Saratoga yesterday Dr. McLain's appeal was heard but not decided; Rev. Dr. Geo. D. Baker read the annual report of the board of home missions. The great field of work, the report stated, is beyond the Mississippi, among the Indians, the Mormons and the Spanish speaking people and along the Northern and Southern Pacific railroads, and in Alaska. There are 1,387 missionaries supported by the board and 133 teachers by the Women's Auxiliory societies. The report recommends the general assembly to ask pastors and sessions of churches to raise \$100,000 for the imperative matters of the board during the coming year. The receipts last year were \$504,000. Rev. Dr. Henry Kendall, secretary of the board of home missions, followed in a lengthy address describing that field of labor, the work accomplished and what work now confronts the board. report was adopted after having been amended by striking out a recommenda tion that President Arthur and the secre tary of the interior be asked to establish The civil government in Alaska and to grant aid to the schools established there by the board. The report of the committee on church polity was made the second order for next Thursday morning. The unfinished business, the amendments to the book of discipline, was made the second order for Wednesday afternoon. Last evening a large meeting was held in the First Presbyterian church in the in

The question of erecting new seminary buildings was thoroughly discussed. They are to cost \$100,000, and every member of the synod was directed to raise on an average of at least \$1 from each member of his congregation. The power to sell the present seminary grounds and buildings was given to the officers of the synod, and to the board of directors authority to select and purchase a new site and to commence building operations immediately after the payment for the grounds and the subscription of \$30,000.

The snyod pledged itself to pay annually to the widow of the late Prof. Krauth, of the theological seminary, \$500 during her life. The family of the deaceased protessor gave his valuable library to the seminary. It was resolved not to start a publication house.

Auschler, of Bavaria, and J. H. R. Wendell, of Wurtemburg. The session was to have closed to-day, but press of business makes it necessary to prolong the proceedings into to morrow.

Dr. A. Spacth, when the report of the committee on German hymn books was presented complained that an index which he prepared had been wholly ignored by the publisher. Being a member of the committee, he felt that he had been treated with disrespect, and that the action bad been irregular.
Dr. W J. Mann arose to inform the

A DESTRUCTIVE FIRE.

rraim's Lock Works Again Destroyed. The lock works of Fraim & Bro., which were situated on the Park avenue, in the rear of the Lancaster cemetery, were entirely destroyed by fire between 4 and 5 o'clock this morning. The building was a two-story brick, size 72x32, with a base ment cellar and flat roof, and nothing is left standing but the walls. The fire was the work of an incendiary and was started in the shipping room in the eastern part of the building. It was discovered by a lowing awards to property holders, to be man named McCutcheon, who lives near paid by the city and county: by and he says when he arrived at the building the door leading into the shipping room was open. An alarm was struck from box 46, at Frederick and Duke street at 4:30 o'clock by Private Watchman Shuebrooks, and the firemen were promptly on hand. The fire had gained great headway, as it had probably been burning some time before it was discovered, and the building was soon destroyed with its contents. The firemen worked hard, and succeeded in saving a small frame dwelling near the works, a blacksmith shop and several other buildings. A stable, which was only 15 feet away, was somewhat damaged, as it had a window on a level with another in the lock factory. The raine and his wife. It was a very enjoy hay in the stable caught fire, but the flames were extinguished. Two sets of harness were burned and two sleighs badly damaged; four horses were save i. In the lock works there were several thousand dozen of locks in stock and in course of completion, and of course, these are afternoon the company assembled in the either ruined or badly damaged. The parlors, where, after singing by some of machinery is all wrecked and lying in the basement of the building.

The Messrs. Fraim estimate their loss at from \$17,000 to \$20,000. The insurance | which the company wended their way to is as follows : On the stable and contents, in the Sun fire office of London, H. R. Breneman, agent, \$1,475; Bausman & Burns have \$8,700, \$1,000 of which is on the building in the Merchant's company of Newark. The remainon the stock as follows: Union, of Philadelphia, \$1,000; Commercial, of London, \$2,000; City of London, \$2,000; North British and Merchants of London, \$2,200; New York Bowery, \$700. Of the last named amount \$500 was on Rote's patent stay belt cutter, which was Rote's patent stay bolt cutter, which was manufactured at these works. The machinery for doing this work was very valuable and was worth at least \$5,000. Six men were engaged on this work. With Allen A. Herr & Co. the insurance on the building was as follows: in the Guardian of London, \$1,250; London Provincial, \$1,250.

That the fire was the work of an incendiary there is not the least doubt, as there was not a particle of fire in the building. The engine and boiler used by the works are in a small building some distance away. All of the paints, oils, varnishes, &c , are kept in a separate building.

These works were destroyed by fire on September 25, 1882. They were at once rebuilt and occupied in November. About the ruins and are not damaged, will be county and state.

Old Money.

Postmaster Marshall has a lot of curious old paper money in his possession, which was sent to him by the postoffice department. Among the lot is a 50 cent note of the Farmers' bank, of this city, bearing the date, June 16, 1815, with the signature of G. Clarkson. The most of the other pieces are Lancaster city loans of different dates as far back as 1834. A number bear hymn book without his knowledge, and the signature of William Mathiot, mayor. They are for from 5 cents to 50, and a 121 cent note is in an excellent state of preservation. Although there are quite a number of these notes the face value of the whole lot is but \$2.921. This money was taken from letters which arrived at the dead letter office in Washington, where it had been accumulating for years, the owner having never been found. It is sent here in order that it may be converted into money of the present day, if possible, and the value received will be placed in the sous who look up old money.

the Texas meteor. Why Uncle Joe Did not Like fler.

N. Y. World. Uncle Joe Mills is said to be a very great

looking girl through the Central Park, and the next day when he was seen in Wail street a friend slapped him on the back ard said: "I saw you driving through the park yesterday, Uncle Joe, and must congratulate you on the beauty of your companion. Who was she ?" "Oh, pshaw!" was the answer, "she

don't amount to nothin'. She ain't got no eddication, and what's was, she ain't voracious, and I hate a person who aint

THE BLUE AND THE ORAY Rebel Yells and Yunkee Cheers at Nisgara Falls.

At Niagara Falls one of the most nota ble reunions of soldiers since the war of the Rebellion is that now in progress-the meeting of the 5th Virginia regi-ment with the 28th New York volunteers. The Confederates who had fought the New York men at Cedar Mountain and other fields, received a perfect ovation. The band played "Dixic tunes being greeted with rebel yells and Yankee cheers. The feature of the reunion was the presentation by the Virginians to the New York regiment of a flag which the former captured from the latter at Cedar Mountain.

Features of the Calcutta Exhibition. The Calcutta exhibition, which will open on the 5th of December, will be a remarkable chiefly for the marvellous collection of precious stones that will be going up, and bricks and a revolver were the Nizam, Seindia, Holkar, the Gaikwar and the Maharajas of Jaipur, Patiala, and Travancer are especially rich in diamonds, rubies and emeralds; and it is said that some of the magnates of Bhepal can, if they so choose, cover themselves with pearls. Indeed, the wealth of India in er, "Antares," with a crow of seven has precious stones is so immense as to appear Reported by J. B. Long. fabulous to Western minds.

France and the Pope.

Cardinal Lavigerie, archbishop of Al giers, has been authorized by the pope to call the attention of the French govern ment to the difficulty the pope has in pre-

venting the tension between the Vatican and France from becoming an open rupture, and to show it how impatiently the enemies of the Republic await such a result. The government has made an amicable reply to the cardinal's communication.

Hints for Husbandmen.

A gentleman told us the other day that

From the Germantown Telegraph.

last year he had constantly for several months green peas upon his table of his own raising, and that they lost nothing of go steadily on with their plantings through the season; but few will do it on their own account, as it adds to their labor. The way, however, to raise the ings, to plant them deep and mulch them, so that the soil they root in is always cool and moist. In the careless manner in

It is so with raising what is called the snapshort beans. They are seldom planted deep enough, and as a consequence have no more flavor than a piece of Indian rubber, and about as tough. But the beans planted in September, and in due time are for sale in our markets, are really delicious in flavor and fairly melt in the mouth. This is the result of cool soil. But were these beans planted three or four inches deep, as we have more than once suggested, throughout the season, and mulched in the hottest portion of it, we could have, as with the peas, these vegetables at all times up to November in perfection. Budding.

much less trouble than grafting, but it can scarcely be described how to do it sufficiently well to enable one to perform it successfully. The season for the purpose is June and July, when the new buds are fully developed. With a sharp knife remove a bud carefully by inserting the knife about an inchabove the bud and passing it down about an inch below the bud, taking at the bud a little of the wood. Remove it with an ivory, horn, or very smoothly prepared wooden knife, from the stock without injury. Then make a cut in the stock where the bud is desired to grow, about three-fourths the length of the removed bud, make a cross slit near the top of the other slit, thus, t, then raise carefully up the bark at the sides, and less at the top and bottom, the Buddhists of those parts than the place the bud in it, and wrap round it white elephant. It is supposed to be animated by the souls of dead heroes. It averts national calamatics. The national standard is a white elephant on a deep taken and the one on which it is placed, should be from three-fourth to an inch and a-half in diameter, and both nearly the same size.

A half column directions, as we notice in some journals, as to how budding is to be done, is only confusing and will not serve to impart the information so well as this brief account. It is better, however, to see it done, and two minutes ought to be long enough to teach one all about it. Two-Whested New England Carts.

mayl-T.Th.F&w RESCUED FROM DEATH. The following statement of William J. Cough in, of Somerville, Mass., is so remarkable tout we beg to ask for it the attention of our read ers. He says: "In the fall of 1876 I was taken with a violent bleeding of the lungs, followed by a severe cough. I soon began to lose my appetite and flesh. I was so weak at one time that I could not leave my bed. In the sum-mer of 1877 I was admitted to the City Hospital. While there the doctors said I had a hole to my left lung as big as a half-dollar. I expend ed over a hundred dollars in doctors and med leines. I was so far gone at one time a report west around that I was dead. I gave up hope but a friend told me of DR. WM. HALL'S EALSAM FOR THE LUNGS. I laughe at my friends, thinking my case incurable, but I got a bettle to satisfy them, when to my surprise a d gratification, I commenced to feet better My hope, once dead, began to revive, and to lay I feel in better spirits than I have the past three years. "I writethis hoping you will publish it, so

that every one afflicted with Diseased Lungs will be induced to take DR. WM. HALL'S BALSAM FOR THE LUNGS, and beconvinced that CONSUMPTION CAN BE CURED. I have taken two bottles and can positively say that it has done me more good than all the other medicines I have taken since my sickness. My cough has almost entirely disappeared and I shall soon be able to go to work. Sold by H. B. Cochran, 127 North Queenstreet
