HOP BITTES.

RELIABLE TESTIMONY

PHILADELPHIA, PA., Sept. 6, 1882.

Hop Bitters Co. I am 74 years old, have lived 34 years in Philadelphia and well-known among Germans. I have been troubled 12 years with a white swelling on my right foot, and getting worse every year, and very painful, and breaking out in hot weather. I consulted several doctors and they told me it was incurable and I would have to take it with me in the grave. Some time ago I lost my appetite, was costive, had headache and fever, in fact was very sick. I saw in the German Democrat that Hop Bitters was what I needed. I got a bottle, took it one week and was as well again as ever, and to my greatest surprise right from the first, my swelling went down gradually and I taking another bottle got entirely well of it. The wife of my neighbor had two such swellings on her legs and three bottles cured her. I think this is a great triumph for your Bit-JOHN STOLL,

No. 4 Young's Alley, above Willow St. STIPPSHILL, Ind., Nov. 13, 1881. DEAR SIES-I have read so much about Hop Bitters and always being afflicted with neu raigia, weakness, diseased stomach, never having much health, I tried a couple bottles;

it has strengthened and helped me more than any medicine or doctor. I am now on my third bottle and am thankful that it has helped me. I will advise all that are afflicted LUCY VAIL.

Beat the World.

ROCKVILLE, CONN., March 6, 1882. I have been taking your Hop Bitters for seral weeks, and they beat the world.

Lewis' axles machine.

LEETONIA, PA., April 13, 1882, Hop Bitters Co.

I have not been well for three years, tried almost all kinds of patent medicines and no less than seven doctors, one of Elmira, N. Y., none have done me any good. I finally tried your Hop Bitters and found them just the thing. I have praised them so highly there is a great number here who use them with great

nefit and satisfaction. Very Respectfully, Yours,

GENTLEMEN-The "Hop Bitters" meet with large sales and give general satisfaction, one case in paarticular you should know of, Mr John B. Green, 728 Spring Garden street, Philadelphia, Pa., has been, suffering from kidney affection, which superinduced rheumatism He tried physicians and remedies in vain. He was obliged to take morphine to induce sleep; his trouble was so great. Reading your ad vertisement in the "Christian at Work," he was prevailed upon by one of his daughters to try it. Three bottles effected a cure and nov he is an enthusiast for "Hop Bitters." He is one of the oldest residents in the locality named; and known as a gentleman of unusual probity. HENRY TOTTEN,

OFFICE JELLOWAY MU. A. ASSOCIATION, JELLOWAY, O., Mar. 18, '82. Hop Bitters Manufacturiny Co.

672 North 1eth St., Philadelphia, Pa.

I have been using your Hop Litters and find them what you recommend them to be for kidney disease, (viz., superior to all others.) J. L. HILDERBRAND.

Vertigo, Dizziness and Blindness OFFICE UTICA MORNING HERALD,

I have been troubled with vertigo since las July, and have suffered greatly every night after any considerable exertion from dizziness and blindness, I tried two bottles of Hop Bitters, and since then have been entirely relieved. Respectfulty yours,

J. J. FLANIGAN.

June 15, 1881. I have been suffering five years past with neuralgia, liver complaint, dyspepsia and kidney complaint, and I have doctored with foureen different doctors who did me no goo !. At last I tried Hop Bitters, and after used a few bottles I received a great benefit from them and if I had used Hop Bitters regularly would have been well before. I know them to be the best medicine in the world for nervous

diseases of all kinds. JAMES COONTS, Beelington, Barber County, W. Va.

"I believe it to be all wrong and even wicked for elergymen or other public men to be led into giving testimonials to quack doc tors or patent medicines, but when a really meritorious article comp sed of valuable remedies known to all, and that all physicians use and trust in daily, we should freely commend it. I therefore cheerfully commend Hop Bit ers for the good they have done me and my triends, firmly believing they have no equal for family use. I will not be without

REV. B. R., Washington, D. C. A good Baptist clergyman of Bergen, N. Y. a strong temperance man, suffered with kinney trouble, neuralgia and dizziness almost to blindness, over two years after he was advised too straggling, makes one of our best tnat Hop Bitters would cure him, because he was atraid of and prejudiced against the word hardy. As a quickly available tree, it has bitters." Since his cure he says none need tear but trust in Hop Bitters.

My wite and daughter were made healthy by the use of Hop Bitters, and recommend them to my reople.—Methodist Clergyman,

I had severe attacks of Gravel and Kidney trouble; was unable to get any medicine or doctor to cure me until I used Hop Bitters, and they cared me in a short time.-A distinguished lawyer and temperance orator of

THE FARMERS.

MEETING OF AGRICULTURAL SOCIETY.

Small Attendance-Crop Reports-Essay b Casper Hiller-Delegates to State
Agricultural College, &c.

The Lancaster County Agricultural and Horticultural association held a stated meeting in their room in city hall yesterday afternoon.

The president being absent, H. M. Engle was called to the chair, and John C. Linville acted as secretary.

ville acted as secretary.

The following named members were present: Messrs. Calvin Cooper, Bird-irghand; Henry M. Engle, Marietta; Casper Hiller, Conestoga; Levi S. Reist, Oregon; Eph. S. Hoover, Manheim; Wm. H. Brosius, Drumore; John C. Linville, Salisbury; J. Hoffman Hershey, Salunga; Wm. C. Pyfer, city; Frank R. Diffendersfer, city; J. M. Johnston, city; C. H. Gast, city; Peter S. Hershey, city; John R. Buckwalter, Salisbury; C. L. Hunsecker, Manheim township; A. B. McCachran, Salisbury; Daniel Myer, Bird in-Hand. Bird in-Hand.

Crop Reports. Casper Hiller reported that the wheat between Lancaster and Conestoga looks very well, though in some fields where it very well, though in some fields where it was preceded by tobacco, the wheat is too rank and in some places lodged. The grass looks well everywhere; trouble has been had with the young corn, and some farmers are not yet done planting; there will not be a full crop of apples, but the pears and cherries promise well, while the peaches are well set; small fruit promise well; a small yellow crested bird, known as the cedar, bird is very troublesome about the time cherries ripen; they come in great flocks and fairly strip the trees. Calvin Cooper said that Mr. Hiller's re-

port would answer for his neighborhood; the grass never looked better than now; the wheat was admirable; the young corn owing to cold nights, looked rather sickly the tobacco farmers who have been praying for moist weather have it at last and are busily engaged in setting out the plants; peaches look better than last year, and plums and gages promise admirably, there being as yet but little trouble from the curculio.

Levi S. Reist, agreed with those who had preceded him, except that in some fields in his neighborhood the wheat was badly injured by the fly and there would not be much more than half a crop. Most kinds of fruit look well, but apples will not make a full crop—the Astrachan and the Maiden's Blush being exceptions and

promising full crops.

John C. Linville said that in his neighborhood wheat will fall back fully oncfourth compared with last year's crop apples promise fairly; cherries and small fruits abundantly; grass excellent; oats and corn backward.

Reist reported nearly everything except wheat and apples as giving extraordinary promise, and even the wheat may make a full average, as the fields that have escaped the ravages of the fly are far above the average. The grass is extraordinary. and the corn that is up looks well; oats are uneven, but the outlook is good; ap ples and pears are not so promising, but there is an abundance of peaches and cherries. The fine rains of Saturday night and Sunday have set everybody to planting tobacco.

J. Hoffman Hershey reported that everything in his neighborhood looked lovely; the wheat looks magnificent some of it a little too rank and ledged by Sun day's heavy rain storm; apples are not over abundant, but the peach trees are very full; there appears, however, to be something the matter with the trees as the leaves are looking sickly and curl up. The tobacco that was planted a week ago is growing finely, and to-day (Monday) almost every tobacco patch is crowded with men, women and boys setting out the young plants. All kinds of small fruits

Promise an abundant yield.

President Engle could add but little to what had been said. In his neighborhood there were very few bad wheat fields; some of them are growing too rankly, but the cool weather we have had has been very favorable to the wheat crop, and there will be a full average unless an excessively hot spell should now follow; the grass never looked better and the clover is as good as ever was grown; corn is backward and infested with cut-worm there will be a full crop of early potatoes, the fields being almost free from the potato beetle. He had noticed that this pest was disappearing; he had not seen a dozen of them this season, and very few cabbage moth; he could not agree with Mr. Cooper, however, as to the curculis; he had found them very numerous, and they were badly cutting the cherries as

well as the plums. Paulownia Imperialis. Casper Hiller read the following paper "This magnificent tree is not receiving the attention in this country that it merits. Its large blue, sweet-scented flowers are beautiful. The tree, if severely shortened in when young to keep it from becoming trees for ornament. The tree is perfectly no equal It far outgrows the Catalpa or the Ailanthus. The last named tree is perhaps the next tree in value, but the smell of the bloom is so objectionable that it should not be planted near a dwelling. The Paulownia wood, for durability is not exceeded by anything, unless, perhaps, the locust. The lumber is said to be first-

class for cabinet work. To give an idea of its growth, we cite a tree growing in Independence square. Philadelphia, 35 years old, measuring Bet in circumference and about 60 feet

A tree, 18 years old, that I had occasion to remove about 8 years ago, measured 18 inches in diameter. Some of this wood was left lay around purposely to test its durability; it is to day as sound as locust would be under similar conditions.

This growth exceeds the locust by far. The locust, too, is subject to borers and other insects, while the Paulownia is so far insect proof.

This tree is well adapted for planting on hillsides. It should be planted thickly, say from 4 to 6 feet apart, to make them grow straight and upright. If the trees, when two or three years planted are cut off near the ground, there will be no diffi culty in growing straight stems, as they then make shoots of 10 to 15 feet long in

come barren wastes, and are already eye-

abandoned its cultivation. He knew nothing as to its durability.

Mr. Hiller in reply, said he had grown these trees for twenty-five years and none of them were ever injured by winter weather. They can readily be propagated from the seed, and as to the durability of the wood there can be no question.

Mr. Engle said it seemed almost incredible that this rapidly growing wood should be so durable. The generally accepted theory has been that the slow growing woods are most durable; but facts are facts, and the well-authenticated durabilities of the Catalog and Paulownia seem to ty of the Catalpa and Paulownia seem to disprove our preconceived notions. He asked Mr. Hiller whether he thought the tree would grow on poor, worn out and

worthless lands. Mr. Hiller answered that he believed it would grow wherever anything else would

Referred Questions Mr. Engle said he could not answer the question which had been referred to him at last meeting, namely, "What is the most remunerative crop for the farmer?" He said that everything depended on circumstances. Sometimes tobacco has proved very remunerative; so have celery, onions, strawberries and many other crops. He would not attempt to give an answer to the question.

John C. Linville answered affirmatively the question referred to him as to whother the self binding reaper had proved a suca grand success. He had one in use last year, and he would not use any other reaper if it were given him for nothing. A single reaper is sufficient for three or four small farms. It will cut lodged grain, hind much better and much better bind much better and make much better sheaves than can be made by hand or by the ordinary reaper. He believes it is destined to come into universal use. The instrument used by him is the Osborne twine binder; it is said there are better ones—the Buckeye, Deering and McCor-mick, but he had not used them. A sixfoot reaper will cut and bind twelve acres

of wheat per day.

Mr. Engle said it was claimed that the Deering reaper was of the simplist con-struction, and the most effective, and that its manufacturers had challenged all other makers to a competitive trial.

Belegates to State College. Calvin Cooper called attention to the fact that this society is entitled to send delegates to the annual meeting of the state agricultural college, on the 27th of this mouth, and to have a voice in the election of trustees. This privilege had not been exercised for several years past, but he thought it well to exercise it now. He moved that the chair appoint three delegates, of whom Hon. A. S. Mylin be one, to attend the meeting. The motion was agreed to and the chair appointed Hon. A. S. Mylin, W. H. Brosius and

Calvin Cooper. Calvin Cooper presented the following question for consideration at next meeting, and asked that it be referred for answer to W. H. Brosius: " Have the essions of the Lancaster County Agricul tural and Horticultural society, and the subjects discussed at its meetings been of any benefit to the community? And if so, why do not those interested in agriculture and horticulture attend to its meetings and participate in its deliberations?"

The following question was also submitted and referred to Casper Hiller: Would it be advisable to cultivate Southern varieties of apples in this section for winter use ? A resolution was adopted that a premium of one dollar be paid by the society

for the best collection of apples, one dol lar for the best collection of peaches, and one dollar for the best collection of pears to be exhibited at the August meeting of the society; and that 50 cents premium be paid respectively for the best plate of peaches, pears and apples exhibited at the same time.

The society then adjourned to meet on the first Monday in August, it being deemed unadvisable to hold a meeting in

July, in the midst of harvest. Advertising Chests!!! " It has become so common to write the beginning of an article, in an elegant, interest

ficent Paulownias, they would become a thing of beauty to the country and a joy to their possessors."

Discussion.

Mr. Cooper said he endorsed all that Mr. Hiller had said as to the rapidity of the growth of the tree named; but he thought it was not entirely hardy. He had some joung specimens, grown from the seed, in his nursery, and the young shoots had been winter killed, and hence he had been winter killed, and hence he had
