ASTRIKE FOR LIBERTY.

Breaking the Locks of the Lockup. As stated in yesterday's INTELLIGEN CER John Brimmer and Frank Kilchrist were arrested in Harrisburg and brought to this city by Officer Leman. They were confined in the two rear cells on the east side of the lockup and George M. Ayres, arrested for burglary, occupied the rear cell on the west side. During the night they made a desperate attempt to regain their liberty. Brimmer cut his way out of his cell and broke the lock much in the same way that he did when he made his escape some weeks ago This let him into the corridor, and there he used lis endeavors to break the lock of Kilchrist's cell and assist him to escape. Meantime Ayres had with his heavy boots battered the lower padlock from the iron door of his cell, and was working hard to break the upper lock, when the officers in charge were aroused by the noise. A visit to the cells informed them of the condition of affairs, and they at once proceeded to handcuff the prisoners, thus putting a stop to their further efforts. The prison ers laughed heartily this morning over their almost successful undertaking.

Slight Fire. This morning between 8 and 9 o'clock an alarm of fire was struck from box 16 at the corner of West King and Water streets, and the firemen were quickly on hand to see what was the matter. It turned out that a small coal oil lamp, used for the purpose of lighting the cellar of Weaver's grocery store, at Prince and West King streets, had been accidentally upset and set fire to an old cracker barrel that was filled with dry wood, and this in turn had set fire to the cellar stairs. A stream was put on the flames by company No. 1 and they were soon extinguished Considerable damage was done by the water to sugar, &c., which was in the cellar. The fire could not be lecated at once and more water was thrown in than otherwise would have been. It was in very close proximity to some barrels of coal oil. The store is a great headquarters for tire works and it was full of all kinds of, inflammable articles. It was an encouraging place for a fire, and the small boy knew this, for he was out in force to

see a free display of fireworks. St. Joseph's fair closed last night and the tellowing is the result of the voting with the lucky ones : Organ - Annie Hess, 2,978}; Lena

Baseball.

Owing to the very unfavorable appearance of the weather last night, the Iron sides baseball club agreed not to visit Pottsville to-day to play the Authracite club. The Ironsides have heard nothing definite from the York club in regard to the proposed game on Saturday, although they have written and sent a number of telegrams. One day is positive, and that is the Fourth of July, when the Harvey Fishers, of Duncaunou, will return and play the second game. On the following Saturday a club from Philadelphia will be here. Manager Specce went to York this afternoon to see the managers of that club and try to arrange positively for a game

PACITEMENT ON 'CHANGE,

The Chicago Markets Suffer Another Bad

CHICAGO, June 28 .- The markets on change suffered another bad break this morning, and the forenoo session was warked by uneasiness and at times great excitement. The depression in prices extended to provisions and grain as well, but was more especially felt in pork and wheat. Pork has shown a steady and heavy decline the past three days and this morning took another tumble of 421(a) 20s. Lard declined 71(a) 171c, making the quotation for the July option less than touched on the day of the failure of Mc Geough. Wheat, which has displayed weakness for a week past, dropped 11/a 21/2 per bushel in addition to day. These declines renewed all the uneasi

ness of the pass two weeks, and the announcement was made at noon that H. O. Kenyon & Co. and John Sinclair had succumbed. They have been dealing in grain, but were not rated as very extensive dealers. One cause assigned for the unusual weakness displayed by the market is the bad showing made by the firms of McGeogh, Everingham & Co., and M. S Nickols & Co, and particularly the latter firm from whom a better report as to assets had been anticipated.

A Preventive of Inlant Mortality. Science in its last issue states, on the authority of a German scientific journal, that milk preserved by what is known to chemists as Scherff's process possesses certain qualities which make it exceptionally useful for sick infants. This process consists in simply putting new milk without any addition into glass bottles, stop-pering and then heating by steam for one

or two hours to a temperature from 212 to 248 degrees under a pressure of from two to four atmospheres. The London Chemical News, in announcing last year Martiny's examination of the milk thus treated, said : 4" The milk is thus not not merely rendered capable of preservation, but the caseine is peptonized, so that in contact with the gastric juice it is converted into fine, easily divisible and digestible flocks, as in the milk of a non-ruminant animal.' Another excellence of Scherff's milk is that the virus of food and mouth disease

and tuberculosis, with all germs, is destroyed by the heating. PORT SAID June 28.-An order has The caseine of human milk is slightly alkaline and coagulates in light flocculi in the infantile stomach, so as to be readily acted on by the digestive fluids, while cow's milk, even when fresh, is feebly acid and is apt to form large and firm coagula. Rome says : "The pope is indisposed. He Cow's milk treated by the Scherff process, however, according to the German au thority quoted, is not coagulated by rennet, and even where acidified or allowed to sour yields "a fine grauular coagulum" which the infant can digest without distress. It is apparent that this new milk is the nearest approximation now known to nature's food for infants; and when the latter is wanting, and it too often is, the former should be the best substi-

The terrible infantile mortality during the "heated term" in our large cities is undoubtedly owing largely to the injudicious use of cow's milk and to the impure quality of the article. But the simele process of rendering cow's milk harm; ess seems to offer a summer diet for infants which, while not expensive, would, if generally used, greatly reduce the death rate. "The good results obtained by its use for sick children," says this foreign journal, "are ascribed to the granular co agulum which it yields in the stomach and its freedom from germs."

lational Republican. P. D. Armour is of sturdy Scotch Pres; oyterian stock. He was born in one of the central counties of New York, on a farm among the hills. It was the highest ambition of his boyhood days to earn money enough to buy the farm adjoining his father's. When the gold fever broke out he was still stripling; but full of youthful enthu siasm, he started for California, driving a wagon across plains and mountains. He remained there three or four years and He remained there three or four years and in that time saved a few thousand dollars.
He had cash enough to buy that farm and settle down. He had no sooner reached home than he experienced a sudden revulsion of feeling. The streets of the village looked narrow, cramped and dull. The house appeared mean and dingy. only remained on the farm two or three days, and then took himself to Cincinnati. Later he drifted to Milwaukee, and at the close of the war he sold a great lot of pork at \$40 a barrel, and bought it again at \$18 to \$19, realizing a profit of about a million. To day he ranks as the wealthiest man in Chicago, being rated by those who knew some-thing of his business at \$25,000,000 or \$30,000,000 His transactions are colossal. Pall Mall Gazette. The city of Paris has just refused a subvention to the African Indies company, which proposes nothing less than to make a fief of France a territory of 35,000 leagues situated between the equare lakes on the east, Congo great on the south, the Atlantic on the west, and Sahara to the north-simply to take possession of a fourth of Africa. The minister of foreign affairs has granted to the company a subsidy of 10,000 francs; the minister of public works has lent a mining engineer; the minister of finance has promised gunpowder and tobacco at reduced prices, and, lastly, the minister of marine, not satisfied with grant. ing a subvention of 10,000 francs his colleague of foreign atfairs, has promised the first expedition by a government steamer, and to grant the services of a uaval officer and twelve men to protect the station to be established on the border of the Central Soudan. Real Laces, as intimated some time ago, are now put on a counter by themselves. The fact is worth mention in three ways. First, the convenience of having them together, with no mixture of others; second, the avoiding the throng that gathers about the imitation Laces; third (but this concerns us quite as much as you), the fact that our trade in real Laces has come to occupy a whole counter. You may recall, if you like, that we have been selling general merchandise but six years, and that we began under some

difficulties. It was quite a jump for men's and boys' clothing to Laces and such things. Is it any wonder that a good many people have looked on and waited to see whether we were going to do our new business as well as our old? Every now and then some little incident shows whether we are finding out how to cater for la-We have been enlarging and enriching our Lace stock and

adding to our salespeople. It is made easier now by this little change to see what sort of a stock of Real Laces we have. Second counter from Chestnut-street entrance | left of main aisle.

JOHN WANAMAKER.

For a month past we have been selling at 50 cents two different makes, in black and colors, of Lisle Thread Half Hose; one article is of English birth, and has the stoutness and solidity of our British cousin.

The ther maker is away off in the heart of Germany-clever and rather Frenchy in variety of colorings and ribs. It has been so long since we presented these goods at 50 cents that we had almost forgotten them but for a newspaper paragraph accounting them bargains. Arcade, west.

JOHN WANAMAKER.

You would hardly suppose that Ribbons could become scarce, yet certain makes in Black Velvet are very scarce. All the numbers are on our counters. White Straws in Jewel Bonnet and in Langtry Turban are here at 25 cents. There is a special bargain now in Black English Milan Strawsat 50 cents that used to be sold for three and

four times that amount. Snow Balls and Daisy Wreaths are the newest things in flowers, 25 cents a bunch of a dozen.

Chestnut street entrance, right side. JOHN WANAMAKER. The traveling season has begun in good earnest, if our trunk

sales are an index. Beginning with a packing trunk for one dollar, we have:

So. & Leather Trunks, Leather Trunks, Zinc Covered Trunks, Wooden Trunks,

Some have enough compartments to astonish a bachelor.

Lower floor, Market-street front, from centre to Juniper-street stairway.

JOHN WANAMAKER. Ladies going to the mountains will be glad to read this paragraph. We are turning our large dressmaking room to their service in a way that only the dull season allows. We forget, for the time, what it costs to make dresses. Indeed, we leave out of the account many of the essential costs. We prefer to keep our workroom busy, even at a loss, for shortly we shall need it, with its organization unbroken. We are making plain flannel dresses of four qualities, suitable for mountain or seaside wear, at \$6, \$7.50, \$9 and \$10. They will be ready-made, but if a lady does not find a fit among the ready-made, instead of altering to fit, we shall take her measure and fit her-not so carefully as in costlier work, but carefullyenough for such dresses; carefully enough to guarantee satisfaction, as usual.
