The gardens, which have been much beautified, were visited by many outsiders and the handsome fountain in front of the hall much admired.

Description of the Mail.

The building occupies a commanding position on North Prince street and the approach to it from the front is by three entrances, two of which consist of wide gates, and the other of a gate somewhat narrower. Over one of the gates is the inscription "The Lancaster Mæanerchor." The lawn in front of the hall has been freshly sodded and is handsomely laid out, containing beautiful shade trees and a fountain in which are gold and silver fish, the gift of Joseph Wacker. These adornments were under the supervision of Christian Gitlich. The hall itself has a front of 112 feet and a depth of 60 feet and is two stories high The tower to the north has a height of 76 feet, its dimensions are 24 by 14 feet, and it contains four stories.

Above the entrance in the tower is the inscription in marble "Mænnerchor Hall, 1883." A red and green balcony runs along the entire second story front as far as the tower, and it has a very handsome railing, the work of William Wohlson. The entrances in front are three in number, folding doors in the tower, folding doors midway between the north and sou'h ends of the building, and a small door at the extreme southern end. There is also another door at the north end leading to the communication to the building from Water street

Tarrod and Feathered.

Tar and feathers have come into fashion again. This curious and interesting method of personal and primitive decoration was largely in vogue with our Western ances-tors but threatened to die out with the innovation of the pistol and the rope. It was revived the other day at Castleton, a Hudson river town about fourteen miles from Troy. An objectionable German named-Voss, who had committed some breach of propriety, was taken by the citi. zens, giving a coat of quicklime, then a coat of tar and finally a top-dressing of feathers and marched out of the town. This, it will be observed, is a great improvement on the oldfashioned methods. Quicklime shows the advance in methods. It is a powerful caustic and consumes human flesh. The advantage is at once apparent. If the officers of the law or the victime friends ever overtake him and succeed in getting the feathers off, they will find nothing but
