Western Union Stocks. The president of the Western Union telegraph company has just returned from a visit to Europe and informs an inquisitive reporter that he went there entirely for his health's sake, and not at all to help the sale of stock in his company which Jay Gould sent his son George over to negotiate. He admits, however, that he informed London capitalists, who inquired where they could buy some Western Union stock, that Mr. Gould would furnish them with all they wanted, and dectares that their negotiations for its purchase failed for the very good reason that they were not willing to pay Mr. Gould's price. Mr. Gould has had a prolonged trouble in persuading customers to bid him his price for this particular lot of goods. In Huntingdon a question also pre sents itself and the lawyers there are puzzled, it seems, to know whether or not they have a constitutional judge and district. Altogether it is manifest that in flying to ills they knew not of, the members of the Legislature who passed the judicial apportionment, did them selves no credit and the commonwealth no benefit.

THE Record asks the members of the Legislature to unanimously resign their seats and give the people a chance to pass upon the questions about which the Senate and the House differ by electing new members this autumn. The Press on Judge Black. Considering that Judge Black was so eminently a disputant, and that in the many controversies which marked his public career he expressed his radical opinions of men and things with such freedom, the unanimity of kindly feel discuss the dead more indulgently than that Democratic newspapers and conventions everywhere manifest their esteem for a great counsellor of their party; nor that the flags of the at talf-mast for one who had who came within the range of his social charms should mourn their loss. Philanthropists, young business men, a well as those who have retired from active pursuits, and all grades and varieties of politicians, confess its allurements. Indeed so absorbing has the baseball issue become that it would be unsafe for either of the great national parties to antagonize it in the presidential campaign that is near at hand. All this proves clearly that baseball has a strong hold on the national heart. But the wildest of enthusiasts would scarce have dreamed of the inroads the game has been making of late with the gentler sex. Tennis, croquet and archery, it was thought, would keep the feminine muscle sufficiently busy, while horny-handed man retained exclusive control of the diamond. But this state of affairs is to exist no longer. On Saturday last, at Pastime park, Philadelphia, the new era of equal baseball rights for woman was ushered in, by the appearance on the field of two nines, composed of the daintiest little maidens arrayed in the most bewitching costumes. To be sure, during the course of the game they developed a remarkable agility in getting out of the way of swift balls, but all things must have a beginning. It may be confidently predicted that in the near future the " horrid men " will be driven from the bases and their places occupied by the woman that is to be, who will then have discovered her true mission. In those already pregnant, broken fingers and dis. colored eyes will be more valued than jewels beyond price.

### ENDORSING THE GOVERNOR. A Siguificant Sign of The Times.

elaware County Record, Rep. The Concordville Farmers'club is mainly omposed of earnest, wide awake outspoken Republicans, who know commendable things when they see them, and are possessed of courage enough to condemn pernicious things when they find them. The members thereof are fullgrown men, and have a knack of accurately gauging men and measures, and of calling things by their proper names. True it is, there are those who think and even say the club is a very meddlesome institution, and that it should confine its deliberation to matters of the barn yard, crops, fertilizers and things, and that, above all things else, it should not meddle in politics. The peculiar thing about these critics is that they are politicians, and evidently desire to monopolize the whole political arena to themselves. In their estimate of the Concordville club they evidently measure it by their own standard: for being of no earthly use except as politicians, they reason that far-mers cannot be good farmers if they meddle in matters political. But the broad, well cultivated acres of Concord and vicinity; the fruitful hills and smiling valleys; the well-fed kine; the commodious barns; the well-equipped appliances; the cosy comfortable homes; and above and beyond all else the general intelligence; keen discrimination and good hard sense of these yoeman, all alike furnish the best answer to the heresy that because they are farmers and lead a somewhat isolated life, they are illiterate, unthinking and unreasonable men. In this very isolation lies the farmer's greatest weakness. There is unity of thought, of interest and of desire, but in most agricultural districts there lacks the necessary intercourse to crystallize this common sentiment. A farmer's club meets this great want, by its provision of the facilities of freer intercourse interchange of thought, and contact of mind with mind. In this way individual views are liberalized; the mental vision strengthened and broadened and much resultant good accomplished. Such organized sentiment becomes a power in any Brooklyn, and John W. Simpson, Herbert community, and especially where their L. Terrill, Walter Katte and James E. official doings can be publicly promulga-

A case in point is furnished by the official action of the Concordville Farmers' club, at the last meeting, when the fol lowing resolution was passed:

"Resolved, That in common with our fellow citizens, alike of town and country, ted satisfaction in the history of Pennsylvania, so far as the commonwealth possesses a governor who has the acumen to detect and the courage to refuse his official sanction to bills passed by the present Legislature, unconstitutional, fraudulent or subversive of the general rights of those whom it is intended to succor."

We have said the members of the club are mainly Republicans, but whilst such, they are none the less citizens, and en dowed with good, hard common sense. They recognize that, as all government is of human agency and control; that, as parties are but a means to a given end, to wit-good government, that end can only be consummated and the public weal promoted by the elevation of good, representative, well tried and proven men to public place. When they find such a man they are not afraid to commend him, even though it be not politically orthodox so to do, and mortally offensive to the "machine" powers that be. Hence the club's official approval and manly endorsement of Governor Pattison's administrationa tribute all the more worthy because the spontaneous, unsolicited expression of men who dare own themselves and openly express their convictions of even a political opponent. The old dogma of party infallibility possesses no longer charms for such a class of men; the shackles of prejudice are broken and the vision undimmed by partisan clarior. There is but one true meaning to Republicanism-the good of the many to the least detriment of the few-and when men can rise to the full statue and dignity of Republican sovereignty and get out and above and beyond the chrysalis stage of partnership, it is a healthy sign of the times, and a plain indication that true Republicanism possesses within itself the means of curing all minor and inherent weaknesses.

# KNIGHTS TEMPLAR.

The Grand Procession of the Conclave The grand procession of Knights Templar in San Francisco yesterday was admitted to have been an unqualified success. The entire population of San Francisco and 70,000 strangers have declared so, Cheers were heard along the entire route. At half-past nine command eries began to arrive and take up the positions assigned to them in the streets off Market, which were reserved for that purpose. At 10 o'clock all had arrived, and at that hour the scene presented from the gallery of the Baldwin hotel was one not to be readily forgotten by those San Franciscans who had the good fortune to witness it. On one side there was a mass of decorations extending as far as the triumphal arch, and on the other 4,000 richly clad knights, represent ing every state and territory in the Union To the old California pioneer it was something beyond realization. His mind reverted to the sand hills and he was dazed.

Grotwald, junk dealer on the commons, where, Grotwald testified, they had been sold by the defendant. The defendant denied having stolen the articles, and testified that Grotwald, had purchased the harness at the prison and was familiar with the place where the harness was kept. Roberts, constable of Rockhill township, who was in court with a warrant for the men. Com'th vs. John Welsh alias Lee. The defendant was charged with stealing a lamp, the property of the Pennsylvania railroad company and an umbrella from Alice Akers of 329 North Christian street. There was no evidence whatever to convict the man with the larceny of the lamp. As to the umbrella it was shown that the defendant walked into the house of Mrs. deaired, there being plentiful space to Akers on the day that Forepaugh's circus store ammunition and provision for exhibited here, and took an umbrella, but a lengthened voyage. The boat alupon seeing the lady he returned and hung it up in its place. The lady who lost the used by Rev. Dr. Clarence E. Woodman umbrella stated that she did not bring this in his perilous running of the St. Lawsuit, but it was the alderman who conduct ed the affair. She was merely subpresed to appear at the bearing as a witness. In charging the jury the court took occasion to severely criticise the alderman for encouraging the bringing of patty cases just for the purpose of making costs for themselves and officers. The jury rendered verdicts of not guilty. In the case of com'th vs. Andrew Hauck,

of not guilty was taken. Com'th vs John Johnson, colored. The defendant was charged with stealing a horse, the property of Albert McCardle, and a buggy and a set of harness from Howard Hess, of Drumore township. For the defense Johnson testified that he knew nothing of the stealing of the property; he saw Green driving the team about the Welsh mountains and believed it to be his. On the day he was arrested witness had merely gone with Green for the purpose of getting work in harvest, and knew nothing about the largeny. The jury rendered verdicts of not guilty.

Samuel Baily and John Green, both olored, were charged with stealing a bag of wheat, on the night of the 11th of March last, which belonged to Evan Walters, of Bart township. The wheat was traced to the mill of Franklin Reed, in a bag containing the name of "Brinton Walters." The wheat was ground, but before the flour was given the accused Mr. Walters appeared and stated that he had missed wheat and at once identified the bag, which defendants had brought re, as it corresponded with some others he had in his barn, secutor went to the mill because he had been informed that the accused, with a herse and wagon, were seen going to-wards Reed's mill, on the morning of March 12.

The defense denied that they had stolen the wheat, but claimed that they had obtained it from the mother in-law of Bailey. It was taken into the mill in a bag, but not in the one marked "Brinton Walters." as alleged by the commonwealth.

At 6:00 about 50 persons wended their way to Shank's mill, about 2 miles from camp, where, in the stream, Elder Getz, of Bainbridge, baptized, by immersion, four converts added to the church at this campmeeting. A BEAUTIFUL CANDE. Handsome Addition to Lancaster Boating

Probably one of the handsomest and most complete outfits in the line of sailing grafts ever seen in this vicinity is that pos sessed by Mr. Harry Woodman, of the Fulton cotton mill. It is a small, decked, lap streak cance, fourteen feet in length and in width twenty-seven inches. The little vessel is built of white cedar, with a deck of red Spanish cedar, and its equip ment is admirable. Air tight compartments are placed at either end of the boat, making a capsize next to an impossibility . A socket in the forward part is fitted with a small main mast, to which is attached a neat triangular sail, to be used when any wind is going. The beauty of the arrangement of this latter apparatus consists in its being so placed that in case of an overturn, it will disengage itself from the boat and float away, thus leaving the bold mariner unencumbered. The centre poard is in soimeter form, its extremity pointing rearward, and the rudder also has its forward portion rounded, so as to be enabled to glance off any obstructions

it may meet with in its passage The steering apparatus is worked by means of pedals into which the feet are fitted, and a double bladed paddle, weighing scarcely three pounds, is used for propulsion in calm weather. The name of the stanneh little craft is "Stella Maris," and its entire weight, fully rigged, is not more than fifty-five pounds. Its internal

Drunk and Disorderly. Wm. Ream, the seissors grinder who

was arrested for drunken and disorderly conduct on complaint of his wife, was given a hearing before Alderman Samson this morning. It appears that the accused had been on a bender for more than a week past, during which time he had abused his wife, broken up the household things, and threatened to hang himself, but no other complaint was made against him than one of drunken and disorderly conduct. The alderman sent him to jail

for 20 days. Charles Lenhart and his wife Ellen were also committed for short terms for drunken and disorderly conduct.

Elizabeth Williams, colored, arrested for drunken and disorderly conduct, was taken before Alderman Alex Donnelly this morning and committed to jail for 31

There were several fights in different parts of the city last night, by noisy, drunken men, who managed to evade arrest.
