VAST FOREST FIRES. BOSTON SUBBOUNDED BY FLAMES.

### Many Acres Burned Over-No Rain for Weeks and Things as Dry as Tinder in New England.

Boston is surrounded by a cordon of flames. From the south shore, stretching around to the west and reaching eastward until met by Massachusetts bay, there is not a town within fifty miles of Boston that has not one or more force first first that has not one or more forest fire which are beyond control. There has been no rain for weeks. A water famine is feared and everything is as dry as tinder. Fur-ther away among the pine trees of Maine, the granite hills of New Hampshire, the green mountains of Vermont and the out-meg groves of Connecticut, the trees, shrubbery, meadows and peat bogs are many of them in flames. These fires are set in a variety of ways, but are most of them the result of carelessness. The locomotives and the small boy are the most

active agents and careless smokers and hunters second them In Massachusetts they are very extensive. About 5,000 acres of the meadows in Cauton and Norwood have been burned over during

five days, with a loss of over \$100,000. There has been no such fire in that vi cinity for fifty years. A fire started some two weeks ago in the woods at West Rox bury. Its progress has been only partially checked and the burnt district now embraces over 4,000 acres. It was checked

by setting fire to belts of hand in the track of the main fire and guarding them until they went out. The loss will exceed \$10,000. The fire burned most fiercely on the brush covered ledges of the Blue hills of Milton, eating away the bears' bread moss and all vegetable matter until it

came down to the solid rock. The whole A special to the Times from Greensborterritory for several miles presents a black ough, Ala., says that Frank Shelton (colened, desolate appearance, the pines and ored) was hanged at that place for the spruces standing in rusty sults of brown, munder of his wife Friday. The trap was sprung at 11:45 o'clock. His neck was reasted grapss hanging from withered vines, and nothing but sooty stalks and broken by the fall. The body was cut curled foliage left to represent the sumac, laurei and barberry bushes that grew down at 12:10 o'clock, life being extinct. The execution was private. The prisoner there a few days ago. In Hyde park the made a few remarks, saying that he was tire was controlled yesterday, although at prepared to go to God, who would do him great cost to the town. Ponkapoag woods, in Milton, and Moosehead woods, in ustice. He met his fate without a tremor. He prayed just before the trap fell. His Sharon, Mansfield and Foxboro have all spiritual advisers were with him on the severely suffered. At least one thousand cords of wood were barned to ashes. scaffold. A large number of negroes were in town, eager to see the hanging, but were forbidden admission. This was the Foxboro firemen worked over thirty hours and in Walpole the mills closed and all of first hanging in Hale county.

the male help turned to the woods. In Dedham Centre, West Dedham and Isling-ton there were about two hundred acres HOP BITTERS destroyed. The Maldon fire department had been called out nearly every day for a

week to subdue the peat fires in the marshes at Edgeworth and Oak Grove. The peat is still burning. The brush and grass fires called out the firemen of Sau gus and Wakefield three times in one day this week. Between Reading and Wilmington a large tract of woodland has

been burned over. The extensive forest fires which have raged on the South Shore branch of the Old Colony railroad have burned over thousands of acres. In Scituate, Marsh field, Duxbury and Plymouth innumerable

instances of narrow escapes are cited. So rapidly did a fire run in the central woods yesterday that Miss Clara Barton, superintendent of the women's prison, applied to the South Framingham fire depart ment for aid, A force remained on daty

execution, has been carefully but rigidly enforced this year, as it was last. No enforced this year, as it was last. No person living in polyamy has been permit-ted to vote at any election or to be voted for for any office, and, while only three convictions in prosecutions against polyg-amy under the act of 1862 have been secured, nearly or quite fifteen thousand persons have been disfran-chised on account of polyamous practices. Prophylactic chised on account of polyamous practices. Through the operations of the law, as administered by this commission, ten suits for damages have been instituted against the commission by certain Mormons, whose names were rejected at the first registra-tion and who were not permitted to vote at the election in November, 1889, because they refused to comply with the rules and regulations prescribed under the law by the commission for the proof of the eligi-bility of all voters. It is understood that these suits have been brought for the purposes, primarily, of testing the constitutionality of our acts thereunder. The first hearing in these cases will be had early in October. It is deemed advisable to withhold our regular report until the court here shall have heard and passed upon these cases. Moreover, certain phases of the general situation here have presented themselves through the recent election and in other ways in the present year which will require to be carefully considered before the commission will be prepared to make the full and comprehensive report which the president and Congress will undoubtedly desire and the commission will wish to make. Such a report will be prepared and forwarded in ample time for the use of the president in communicating with Congress at the commencement of its session in December next.
