

Lancaster Intelligencer.

MONDAY EVENING, OCT. 29, 1883.

The "Press" and Hutton.

The editor of the Philadelphia Press has a controversy with the first assistant postmaster general, on a charge said to have been made by the latter that the editor had been a party to a "steal" which cost the government some eight hundred thousand dollars; the thing done being to establish an early revenue train from Philadelphia to Harrisburg ostensibly to carry the mail, really to carry the newspapers. The editor of the Press is apparently not sorry to get into a newspaper controversy on this subject with the first assistant postmaster general. It is not a bad advertising scheme for the Press, which really shoulders the responsibility of getting the government to pay for a train to get its newspaper early into the country. We cannot say that it was an unjustifiable piece of enterprise. Uncle Sam has for a long time been carrying the New York papers southward on an early mail train; which, however, is a through train from Boston and would run probably if it did not carry the mail. That mail is undoubtedly a great public accommodation. The morning mail from Philadelphia is one to a smaller extent and no doubt the Press editor when he persuaded President Arthur and Postmaster general James to start it was a good deal more interested about getting his newspaper out than about the mail. But it is only an artifice, not a steal; and if the first assistant postmaster general thinks it a steal, he ought to be able to persuade his superiors of the fact, when they should stop it. The Press editor calls on the postmaster general to kick his first assistant out; and it seems that something should be kicked either Hutton or the early mail; possibly Hutton; still he may not merit any such treatment. He has suggested to the Press editor that he will call for a congressional inquiry into the facts attending the putting on of the early mail train from Philadelphia; and that is a very fair proposition, indeed, and shows that Mr. Hutton is not afraid of an elucidation of the matter. It seems that this train would really have cost the government but \$16,000 a year. The department, however, did not have an appropriation to cover it; so it is charged that Mr. James ordered a reweighing of the mails on the Pennsylvania road, in consideration of which Vice President Cassett agreed to put on the train for nothing. The government mails are weighed, he said, every four years, and had been weighed the year before. As they increase greatly every year it was decided to weigh the Pennsylvania road to have its mails reweighed. Its gain in this case is put at \$200,000. Then the other roads demanded a reweighing and got it, resulting in a very great total increase of the cost of the mail service. It would seem, under these facts, that a congressional inquiry would be in order; what the department could not do directly, even if it was a laudable thing to do, at a cost of \$16,000, ought not to have been done indirectly at a cost of hundreds of thousands of dollars.

As predicted by the INTELLIGENCER, ex-Governor Hoyt did not speak at the Republican meeting in his old home, Wilkesbarre, on Saturday evening. It is true that he was confined to his room in Philadelphia and was unable to go, but he never had any intention of going nor making any such speech as he was billed for. Chairman Cooper knew that he would not be there, but held out the promise of his presence as an attraction to secure an audience for himself. Ex-Governor Hoyt sent no letter or regrets for his inability to be present, nor of sympathy with the cause that Cooper advocates. His friend, Gen. McMichael, made no sign; his political associate and confidant, ex-Attorney General Geo. Lear, did not go, though invited. The attempt to make it appear that the Independents are reconciled and all the Republicans harmonious is a dismal failure. We want Lively beaten; Levi Bord Goff the candidate for lieutenant governor on the Stewart ticket last year, is now out spokenly for the Democratic ticket. Col. Wm. McMichael, late Independent candidate for congressman at large, has nothing to say for the regular Republican nominees. After industriously drumming through the state for a week and sending out telegraphic appeals for authority to append names to the tea address, Wharton Barker succeeded in getting only about a half-score of names appended to it. The Republican party must go.

MARY ANDERSON'S great triumph in England is very gratifying to her admirers in this country, who can prize all who have ever seen her, save only the professional critics of the metropolitan press, who derided her on her first appearance and have never since ceased to sneer at her. The very strong and unanimous verdict of approval which she has now received in England is very gratifying to the very wise dramatic critics, who could not discern the merit which was obvious to all other men. No more graceful, natural and true delineator of human emotion can be found among the actresses of any age; the testimony of the two English speaking nations of the earth affirms this.

ANOTHER good looking young woman has been found drowned in Connecticut with wounds upon the body showing foul play. She was a gay wife, not fond of her home which she left after a quarrel with her husband. If it is not a case of suicide it seems to be one of murder. Connecticut has achieved a most unenviable notoriety as a woman killing state. The victims are all young women, who have been slain apparently because they have been obedient to their husbands. In Connecticut, their lives and reputations appear to be of little value. This, however, is not surprising in a state which has more divorces in proportion to population than any other.

THE CAMPAIGN.

GRAND MEETING IN PHILADELPHIA.

Reynolds and Gordon discuss the issues. The Ex-Speaker's Views on National Topics. The first large Democratic demonstration of the campaign in Philadelphia was held on Saturday night in Horticultural hall, under the auspices of the local committee. The stage was filled with local celebrities and Select Councilman A. Haller Gross, of the Eighth ward, presided over the gathering. The large hall was crowded and the galleries overflowed. Mr. Gross, upon taking the chair, made a neat speech. When he finished his remarks he introduced James Gay (Gordon), member of the Senate from the Third district, who was received with great applause. He spoke in a deliberate manner and mentioned the fact that last time he had the opportunity to speak in the same hall it was in the interest of the man who was now governor. He said that at that time the newspapers were at the heels of the candidate and that he had not the opportunity to speak from doing his duty. "To-day," said the speaker, "the whole pack of hounds is at his heels as then, and he minds it just as little." Then the senator said that the people will approve the action of the governor upon Tuesday week. "You have an honest controller," he said; "a man who will make dishonest contractors disgorge their ill gotten gains. You have an honest and clear headed government in that office to-day, and the thieves cannot get at the money. There is no need of more money than the controller can use. Why was Mr. Jeffries repudiated in 1870? Has he not the same backers now, and do not the same men desire to control the office? Why do these men desire to control it now? Mr. Pugh stands a great deal regarding the deposit of the public money, and declared that it should be placed in reliable banks. By a scratch of his pen and his vigilance he has saved the city of Philadelphia \$150,000 a year."

WHEN the internal revenue tax on cigars was reduced from 50 to 30 per cent, the manufacturer got better profits, the cigarmaker got better wages, and the consumer got cheaper cigars. The entire abolition of the revenue tax would, to a much greater degree, work all these benefits. A vote for the Democratic ticket this fall is a vote to abolish the internal revenue tax. A vote for Niles and Lively is a vote to continue it in order to raise \$100,000,000 of revenue that is not needed for any purpose except to give employment to 1,500 officeholders at \$3,000,000 salaries and expenses.

GEN. BEAVER is infatuated with the Wharton Barker idea of dividing the surplus revenues among the states. He calculates that Pennsylvania would get five million dollars as its share of the divide, but as Pennsylvania pays in about nine millions of this surplus, it is difficult to see where the profit to this commonwealth would come in. But then Gen. Beaver is a blind leader; last year he predicted that if he were not elected governor, oil would drop to 50 cents a barrel and now it is about \$1.11. "Dear Beaver, don't talk!"

THE Republicans are on the run. They are puny and have determined to get in all their work this week in Allegheny and Philadelphia. But sometimes a man who tries to pull himself out of the mud by the bootstraps only gets in more deeply.

A VERY convenient fitness overlook ex-Governor Hoyt when the mass meeting was held in Wilkesbarre on Saturday night. Daguer for the "grand old party" is probably at the root of the trouble.

NOSE should be absent from the mass meeting which the Democrats will hold in Mechanics hall on Saturday night when Randall, Hay and others will discuss the issues of the campaign.

JOHN STEWART advocating the Wharton Barker scheme for distributing the surplus and Judge Kelley proposing to abolish the same surplus are among the petty inconsistencies to which Republicans will be treated during the coming week from the campaign platform.

GREAT is civil service reform? So at least Republican Mahone must think from the unobscuring boldness with which he assesses a Virginia postmistress for campaign purposes. This stand and order demand of the highway robber will not arouse the sleepy civil service commission to action, for the reason that they have construed a demand by letter as simply a "request for voluntary contributions." In short they are keeping the wolf from the door but breaking it to the bone.

THIS is the last week of the campaign and it becomes the duty of every Democrat who has at heart the success of his party to labor earnestly, if he has not already done so, to get out the full Democratic vote. The issues have been distinctly presented to the people, and doubtless all who will cast their ballots on the first Tuesday in November have ere now made up their minds how they will vote. Let the present week therefore be devoted to the reminding of Democratic voters of their plain duty to exercise the right of suffrage in the coming election. Let it not be forgotten that a full Democratic vote means a clean Democratic sweep.

AN interesting decision in reference to the rights of tenants claiming damages for injuries done their business has been recently rendered in New York. Two tenant physicians brought suit against the Manhattan and Metropolitan elevated railroad companies for loss of patients in consequence of the noise, dirt, smoke, and the obstruction of light and air, caused by the construction of the railway over the sidewalk within eight inches of the building occupied by the plaintiffs. The case occupied some time in its trial and the jury have recently returned a verdict of \$20,000 damages for the plaintiffs. It has long been popularly supposed that although the owners of a building had a good claim for damages in consequence of any obstruction, the tenant could not ask compensation for an injury done to a mere easement. The present verdict disproves this assumption and its righteousness will not be questioned. It may be taken as a direct notice to grasping corporations that even tenants have rights capable of enforcement by the laws of the land.

COLUMBIA NEWS.

OUR REGULAR CORRESPONDENCE.

Events Along the Susquehanna—Items of Interest in and Around the thorough Frichest up by the Intelligencer Reporter. Employees of Susquehanna rolling mill were paid on Saturday. A goodly number of youths were in the lock-up Saturday night—Henry Louca, victim of the late railroad accident here, buried yesterday. A male with a head 30 inches in length, larger than a flour barrel, was seen on the street, Saturday—Conestoga lodge, No. 105, K. of C. Company C; Susquehanna Lodge, No. 1, I. O. O. F. and Rev. side lodge, Ladies' Home Commenment, met to-night. Moon & Breeman's gigantic mimsrels, for an entertainment in Central hall, Marietta, on Saturday evening, performers from Lancaster; "Frauds" is the Marietta expression applied to them.—Stricker property on Second street was sold to Mr. John Paine for \$6,230.—Two teams were thrown into a ditch which the borough cut across the Washington and Columbia, torpiko near the Susquehanna rolling mill on Saturday night. A narrow crossing over the ditch had been provided, but neither watchman nor danger signal light were at the place to warn travelers; board of supervisors likely to be sued for damages.—Joseph Fisher, a one-legged man, will have a hearing before Justice Patton to-night, to answer to the charges of drunken and disorderly conduct, malicious mischief and injury to the peace, the complainant being Samuel Turner, who keeps an eating saloon on Front street. Fisher came into the place on Saturday night, and was ejected by the proprietor for being disorderly. "Josie" then demolished the store windows with his crutch.

LOCAL SCIENTISTS. The Lincum society met on Saturday afternoon in the museum, President J. P. Wickham in the chair and nine members in attendance. Dues were collected and a report of the previous meeting read. The donations to the museum consisted of a bottle of insects collected near Collins Station, on the P. R. R., by Dr. Rathvon. Mr. John Peterman, of Paradise township, donated a beautiful specimen of a small black snake, collected in the mountains of the Blue-plummet of nickel; box of cocoons of Nectus Vestigiatus (curtain saw fly); and also specimens of another Hymenoptera insect; also specimens of the cocoons of a singular pondant spider; a bottle of water, containing a small black snake, from the mountains of the Blue-plummet; large specimens of fungus; fragments of granite from the new Mormon temple, donated by Mr. Hawkins, of Ogden City, Utah; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable, of Maytown; a specimen of a large orange colored spider, from the mountains of the Blue-plummet; a bottle containing a male and female specimen of the spectrometer, from Mr. W. W. Ballou, of Mountville; also two specimens of Staphylinus tridentatus from Mr. J. B. Gable,
