SOLE AGENT FOR THE  
**Knox Silk & Derby Hat.**

THE ONLY Hat Manufactory in Lancaster. Boys' Caps from 18c. up. Men's Caps of all kinds greatly reduced in price. Repairing neatly and promptly done. Old silk Hats made fashionable.

## JOHN SIDES,

Successor to SHULTZ & BRO.

**ALL ABOUT BEING DOWN.**  
The snow came down, and in its purity looked as soft and fleecy as down. The boys all came down with their sleighs and down go the girls to the jingle of the merry bells. Many people have been down on the slippery sidewalks, and consequently feel rather down in the mouth. We have also come down very considerably in the prices of our stock of Winter Caps, Gloves, Fur Collars, Seal Caps, etc. No one need go about shivering with the cold because we have warm comfort giving articles at reduced prices to meet the possibilities of the most limited pocket-book. Come down to our store and get down to a real bargain.

## SHULTZ'S ONLY HAT STORE,

No. 144 NORTH QUEEN STREET, (GUNDAREK'S OLD STAND.) LANCASTER, PA.

**MEDICAL.**  
DARBY'S  
**PROPHYLACTIC FLUID.**

A Household Article for Universal Family Use.  
**Eradicates**  
**MALARIA.**

ing on the skin should use it freely. Scarlet Fever has never been known to spread where the Fluid was used. Yellow fever has been cured with it after black vomit had taken place. The worst cases of diphtheria yield to it.

**SMALL POX**  
and other eruptions prevented by bathing with DARBY'S FLUID.

A member of my family was taken with small Pox. I used the Fluid; the patient was not delirious, was not pitted, and was about three weeks and no other work but to keep the patient cool, and to give him plenty of fluid.

**DIPHTHERIA**  
PREVENTED  
By the use of DARBY'S FLUID.

Physicians here have been greatly benefited by the use of DARBY'S FLUID.

The eminent Physician, J. M. JOHNSON, says: "I am convinced that DARBY'S FLUID is a valuable disinfectant."

**SCARLET FEVER**  
PREVENTED  
By the use of DARBY'S FLUID.

DARBY'S FLUID is a valuable disinfectant. It is used for the purpose of preventing the spread of disease.

**RHEUMATIC SYRUP.**  
**A Limb Saved**  
And a Family Made Happy.

Mr. Philip Moore, of West Webster, Monroe County, N. Y., says: "I was afflicted with rheumatism in a very severe form. One year ago it settled in my knee, since which time I have been unable to touch my foot without suffering the most excruciating pain. My limb was fast growing out of my socket, and I was doing for relief, when I was advised to use your Rheumatic Syrup. I bought a bottle, and used it as directed. I am now able to walk with perfect ease, and my limb is as good as new."

**Rheumatic Syrup**  
Is the greatest Blood Purifier known, and will do what is claimed for it, send for pamphlet and testimonials, read of those who have been cured by its use.

**Rheumatic Syrup Co., Rochester, N. Y.**  
For sale by druggists. Price \$1.00 per bottle, or 6 bottles for \$5.00.

**PAPER HANGINGS, &c.**  
**PHARES W. FRY.**

We are making almost daily additions to our stock of

## WALL PAPERS.

The styles are beautiful and we have them in elegant assortment, from the common brown to the most embroidered gilt one, two and three hand finishes. Decorative designs in elegant designs, centre pieces to match.

**CREAM AND WHITE LACE CURTAINS, BEDDING, PILLOW SHAMS, TABLES, AND LAZARUS' PILLS, COGNAC, MILK, &c.**

## PHARES W. FRY,

57 NORTH QUEEN ST.

**GRAND SPECIFIC REMEDY.—THE GREAT ENGLISH REMEDY.** An unending cure for Impotency and all Diseases that follow loss of Memory, Universal Languor, Pain in the Back, Dimness of Vision, Premature Old Age, and many other diseases that lead to Insanity or Consumption and a Premature Grave. All particulars in our pamphlet, which we desire to send free by mail to every one. The Specific Medicines, sold by all druggists at \$1 per package, or six packages for \$5, or will be sent free by mail on receipt of the money, by addressing the name to

H. B. COCHRAN, Druggist, Nos. 127 and 129 North Queen Street, Lancaster, Pa.

On account of counterfeits, we have adopted the following wrapper as our genuine.

THE GREAT ENGLISH REMEDY, Buffalo, N. Y.

**AGRICULTURAL.**  
HOW TO WINTER HORNEED CATTLE.

The Tobacco Question—Protection Demanded—Election of Officers—Delegates.

The annual meeting of the Lancaster county agricultural and horticultural society was held in their room in city hall yesterday afternoon.

The following named members were present: Messrs. Henry G. Rush, New Danville; Henry M. Engle, Marietta; John C. Linville, Gap; Calvin Cooper, Bird in Hand; S. P. Eady, Gap; Daniel Smeyel, city; M. D. Kendig, Greenleaf; Henry Shiner, Bird in Hand; Frank H. Dillender, city; J. P. Witmer, Paradise; Johnson Miller, Litz; J. M. Johnston, city; John H. Landis, Millersville; Wash. L. Hershey, Chickies; Peter S. Reist, Litz; Dr. W. W. Bollinger, city; John Ginter, East Hempfield; Frank S. Clark, Drumore.

The reading of the minutes of last meeting was dispensed with. E. C. Elen Laidwin, of Salisbury town ship, was elected a member of the society.

The committee appointed to examine competitive essays on the wintering of home cattle presented the following report:

Your committee find the two essays handed in for competition of much merit. They go over the same ground very nearly and contain many valuable suggestions. They recommend that the first premium be awarded to the one marked "A" and the second premium to the one marked "B."

J. M. JOHNSON, S. P. EADY, F. R. DIFFENDERFER, Crop Reporters.

H. M. Engle said it was hardly worth while to talk about the crops at this time of year, everything is snowed under, and it is impossible to tell what may be the prospects for next year's crops. He reported the rainfall for November to be seven and a half inches, and for December, including melted snow, at 2 inches and six sixteenths.

Peter S. Reist said it was important to have the tobacco crop discussed. A large portion of it is in the hands of farmers, and there are reports of tip out, and other damage. He was anxious to hear the report of the condition of the crop, and as to the best way of stripping, assorting and preparing it for market. So far as he can learn the quality of the tobacco is good.

Peter S. Reist said that some farmers in his neighborhood who had suffered from tip mould out of the damaged part of the leaf with shears.

S. P. Eady said he had two and a half acres of tobacco, and under direction of Peter S. Reist had cut out the damaged tips and baled the tobacco as usual.

J. H. Landis said that in his neighborhood the growers were making separate grades of their tobacco; the perfect was carefully separated from that which had mouldy tips and many of the growers were doing so.

M. D. Kendig regarded it as being very important to keep the good leaf separate from the damaged. He asked whether it was better in very wet weather, such as that which we have had, to keep the tobacco house open or shut up. His own opinion was that it is better to keep the house open. He had noticed that the tobacco was not so early and was the drier tobacco more from tip rot than the later tobacco.

John H. Landis, of the same township, said this experience was exactly the reverse—the early cut tobacco escaped and the late suffered from tip rot.

Peter S. Reist said that the best tobacco was that which he had hung over his lay-mow, and his worst that which he hung in a shed near the ground. With one of his neighbors the case was exactly the reverse. He had hung his tobacco in the hay mow, while that which was hung below near the ground was the best.

He believed that tobacco hung near the ventilators was more likely to be damaged by mould than that which hangs further away from them.

Mr. Eady said that he had seen a number of this society to look after the tobacco interests of this county, which are now menaced by the importation of Sumatra and other tobaccos grown on cheap lands and cultivated by cheap labor, with which we cannot compete. He thought that our tobacco out of the market unless it received the protection to which it is entitled. He thought something should be done to prevent the evasion of the law by the importation of Sumatra tobacco.

Mr. Eady agreed that some act should be taken speedily, and that this society should take the initiative.

Mr. Kendig said a change should be made in the tariff law, which designed to protect us, but does not protect us. He urged early action.

Johnson Miller advised that the society call a meeting of the tobacco growers and get an expression of their sentiments on the tobacco tax question. It might be well to have a committee appointed to confer with the authorities at Washington and to suggest the shipping of legislation in the tobacco growers interest.

F. R. DIFFENDERFER, only hope is in having the secretary of the treasury reverse his recent decision by which Sumatra wrappers are allowed to be imported at 35 cents when baled with 30 percent of stem. Relief cannot be secured for the tobacco growers.

Johnson Miller moved that this society recommend that the farmers of Lancaster county assemble in the court house on Monday next at 10 o'clock to take action on the question.

Some expressed doubts the propriety of calling such a meeting in the court house. Our experience in calling special meetings has not been very encouraging. He believed that the society's meeting room would hold all who would attend. He moved to amend by holding the meeting in the society's room.

Joseph F. Witmer said that the New York and New England delegation of tobacco men were to call upon the secretary of the treasury tomorrow. He advised that a telegram should be sent to that secretary, endorsing their action and seconding their efforts to have the secretary's decision reversed.

Peter S. Reist said that this society, as a society, should protest against the Sumatra fraud. In this we represent the thousands of tobacco growers in this county. He did not have much faith in calling together a mass meeting of farmers.

F. R. DIFFENDERFER advised that a memorandum should be forwarded by telegram to our congressmen, A. Herr Smith, to be presented by him to the secretary of the treasury, when the New York and New England delegation call on him.

Johnson Miller withdrew his motion for a mass meeting, and on motion Mr. Diffenderfer and S. P. Eady were appointed a committee to draft a memorial.

**Competitive Essays.**  
John G. Linville, the author of the competitive essay marked "A" which was awarded the first premium of \$5, read the essay as follows:

The best method of wintering horned cattle.

As the term in this latitude during which cattle must be fed on dry rations, lasts from five to six months, it is a matter of great importance to know how our stock can be best and most economically wintered.

The first requisite is good and sufficient food, and next shelter. As our winters are cold it requires a large amount of food to keep up the animal heat even when the stock is warmly stabled. Feed rich in carbohydrates is thus proper thing to sustain intense combustion and also to fatten the animal. Corn is such a feed and fortunately is raised here in as great perfection as in any part of the world. The animal's nervous and muscular and bony structure must be maintained, and to have symmetrical and healthy development must have phosphorus and nitrogen. Bran, shorts, clover, hay and insect cake contain these elements, and in addition to corn make a perfect ration. Science indicates that a mixture of two parts, by measure, of corn and one part of bran would be a good proportion for fattening cattle, and corn and bran half and half or corn and oats for heavy cows or young growing stock. The experience of practical feeders and stock growers confirms the theories of the chemist.

Animals like a change of feed, too. Cornfed and hay may be given alternately and an occasional feed of potatoes, mangolds or even turnips is much relished. These roots are from ninety to ninety five per cent water, and yet the avidity with which cattle eat them in winter is almost incredible. They are useful for a change and probably assist in the digestion and assimilation of dry feed. Of course all animals should have water at least once a day.

As regards the value of ensilage for stock I have not had any practical experience, but am inclined to think that it will be a means of keeping a larger number of animals through the winter months. Any one who has been watching the discussion of the ensilage question in the agricultural papers cannot help but see that the advocates of the system are invariably those who are using it and can speak authoritatively and the opponents are almost invariably mere theorists. Chemists who are reiterating their assertions that well cured hay contains the same elements as grass and that the water, ought to know that grass fed on grass only will make a much larger quantity of butter and of better quality than the same cows fed on hay only.

Every farmer knows that cows changed from dry feed to grass immediately increase the production of milk and butter and vice versa. I cannot see why properly preserved green feed may not produce the same result.

Most of the cattle feeders in this county give their cows a ration of meal in the morning, but I have not known dairymen to feed meal to their cows more than twice per day. It is all important that animals should be fed at stated times. When the time comes they are restless until fed and frequently do not eat their food.

It is not on mild days to let stock of all kinds leave at least an hour or two to sun themselves. Sunning is as essential to animals as to plants. I have not mentioned the old English system of "pit feeding." I think it has never found favor in this country. A pit is dug large enough to permit the animal to turn around and to move freely. The material is then lowered into it. Bedding is thrown in every day, and feed and water lowered as often as necessary. The depth of the pit and the daily allowance of bedding are so proportioned that when the animal is fed the bedding is not soiled.

The best quality, in this way the beast is kept in perfect quiet and is said to increase in weight very rapidly. I would not advise any one to attempt this mode of feeding his stock, but it should be reported to the society for the protection of civility to animals.

Henry M. Engle read another of the competitive essays marked "B" which was awarded the second premium of \$4. It took substantially the same view of the subject as Mr. Linville's.

**Winter Questions.**  
The most profitable books for farmers to read?

M. D. Kendig answered that Johnson's Elements of Agricultural Chemistry; Charles Darwin's Animals and Plants under Domestication; How to Grow and How to Plant, by W. W. Johnson; Farm Implements and Machinery, John J. Thomas; Barry's Fruit Garden; Downing's Fruits and Fruit Trees of America; and Downing's Landscape Gardening were his favorites.

Joseph F. Witmer would add to the list Allen's American Farm Book, Henderson's Gardening for Profit, Prof. Lewis' Farmer's Veterinary Advice and Joseph Harris on Manures.

John G. Linville recommended Rural Studies; and My Farm at Edgewood, by Donald G. Mitchell; also, Herbig's Spenser's works.

Henry M. Engle had no doubt all of the above were good works, and there were hundreds of others that might be read with profit. He advised, however, that farmers procure some good work on entomology and study it also, for there will be little use in learning how to raise good crops unless we learn also how to protect them from the ravages of insects that prey upon and destroy them. He commended Dr. S. S. Rathvon for what he had done in this important field of science, and regarded it as a shame that his labors had not been more highly appreciated. He had written an excellent work which ought to be printed and placed in the hands of every scientific farmer.

Mr. Diffenderfer, from the committee to prepare a memorial on the tobacco question, presented the following:

Resolved, That this society in common with the thousands of tobacco growers in this county and elsewhere, have learned with surprise and regret the recent decision of the secretary of the treasury regarding the introduction of Sumatra tobacco. This is the largest seed leaf producing county in the union; its tobacco product in a single year has exceeded three millions of dollars; the value of barns and machinery employed is more than a million; all this is jeopardized by the introduction of Sumatra tobacco at a duty of less than 75 cents. They therefore earnestly request that a rehearing in the case be had, and the proper relief be afforded to protect the interest of our tobacco growers, now imminently jeopardized.

The resolution was unanimously adopted, and the committee was directed to telegraph it forthwith to Congressman A. Herr Smith.

**Election of Officers.**  
The following named officers were elected for the ensuing year:

President—Henry G. Rush.  
Vice Presidents—Jacob B. Garbar, H. M. Engle.  
Recording Secretary—John C. Linville.  
Corresponding Secretary—John H. Landis.  
Treasurer—M. D. Kendig.

Managers—W. H. Brosius, Calvin Cooper, Cooper Hiller, Joseph F. Witmer, F. R. Diffenderfer.

On motion the treasurer was ordered to pay John C. Linville \$5 and Henry M. Engle \$4, respectively for their competitive essays.

Messrs. Engle and Linville thanked the society for the honor, but as they had not written for the money, they donated the premiums given by them to the society.

A vote of thanks was then extended to the librarians, who were ordered to pay the bills amounting to \$5.30, contracted by the librarians, were ordered to be paid.

The treasurer, M. D. Kendig, presented his annual report. A committee of three was appointed to audit it and reported the receipts for the year to have been \$215.00, the expenditures, \$25.67; and the balance in the treasury, \$189.33.

The report was received and approved and the committee discharged.

John C. Linville, M. D. Kendig and Calvin Cooper were appointed delegates to represent the society in the annual meeting of the state horticultural society which assembles at Harrisburg on the 17th of January inst.

**For Next Meeting.**  
"Is pork raising profitable?" Referred to Joseph F. Witmer.

After a desultory discussion as to the propriety of offering premiums to the boys who grow the best crops of cereals, in the county, and also the propriety of paying premiums for the best exhibition of fruits, cereals, &c., presented at each monthly meeting of the society, an adjournment took place.

"Are you lonely to-night Miss Ada?" "No Sir! I wish I were lonelier." He bade her good night and she took a strange dose of Dr. Bull's Cough Syrup, leaving her by manner had given him a cold.

**Home Items.**  
"All your own fault. If you remain sick when you can get hop litters that never fail."

"The weakest woman, small of child, and sickest invalid can use hop litters with safety and great good."

"Old men tottering around from rheumatism, kidney troubles or any weakness will be almost new by using hop litters daily."

"My wife and daughter were made healthy by the use of hop litters and I recommend them to my people.—Methodist clergyman."

Ask any good doctor if hop litters are not the best family medicine on earth.

"Malicious fever, ague and biliousness, will leave every neighborhood as soon as hop litters are used."

"My mother-trove the paralysis and rheumatism all out of her system with hop litters."—Ed. Overseer Sun.

"Keep the kidneys healthy with hop litters and you need not get sickly."

"Ice water is rendered harmless and more refreshing and reviving with hop litters in each draught."

"The vigor of youth for the aged and infirm in hop litters."

"At the change of life nothing equals Hop litters to allay all troubles incident thereto."

"As an best prophylactic for ladies to take monthly and from which they will receive the greatest benefit is hop litters."

"Mothers with sickly, fretful, nursing infants, will cure the children and benefit themselves by taking hop litters daily."

"Thousands die annually from some form of kidney disease that may have been prevented by the timely use of hop litters."

"Indigestion, weak stomach, irregularities of the bowels, cannot exist when hop litters are used."

"A timely \* \* \* use of hop litters will keep a whole family in robust health a year at a little cost."

"To produce real genuine sleep and child like repose at night, take a little hop litters on retiring."

"That indigestion or stomach-ache at night, preventing rest and sleep, will disappear by using hop litters."

"Painful nervous, tremulous old ladies are made perfectly quiet and sprightly by using hop litters."—Ed. Overseer Sun.

"The Artificial Eye Glasses are the most perfect relief to the human eye known to science. Try a pair and be convinced. For sale by all leading Jewellers and Opticians."

Dr. J. Marion Sims, N. Y., endorses Darby's Prophylactic Fluid. See advertisement.

**Over the Hills to the Poor House.**  
A person with impaired or impoverished blood needs the restorative properties of Dr. Buck's Blood Purifier, which cleanses and enriches the circulation, repairs the tissues and builds up the system. For sale by H. B. Cochran, druggist, 127 and 129 North Queen Street.
