SNOW-CAPPED MARS. A Map of a Planetary Neighbor.

Perhaps the most interesting celestial event of the year will be the opposition of Mars at the end of the present month.

There is as much about this remarkable planet that suggest a close resemblance to the earth, and so many of its surface features and of the natural processes occurring upon it are visible with the telescope, that every time it comes to opposition, it is quite into a line with the earth and the sun, the earth being in the middle, a battery of telescopes is turned upon it with eager expectation of interesting views if not of important discoveries.

At opposition Mars appears with small telescopic power like a full moon of a ruddy tinge. As the magnifying power is increased one detail after another of the diversified surface of this distant world comes into view, until it hangs in the field of the telescope a real globe, marked plainly with continents, ocean, and islands and partially covered with clouds.

The first physical features of Mars that come into view are the snow caps surrounding his poles. The southern pole is now inclined toward the earth, and a small telescope, say of three inches aperture, will plainly show the circular, gleaming patch of snow that covers the antarctic region of the globe of Mars.

The dark ring surrounding the snow field, and sometimes called Phillip's sea, is almost equally distinct, and some of the other seas, or spots that are believed to be seas, can be seen with the same telescope.

With a larger telescope more details are visible, and with the largest and best all the various features of Martian geography which are represented on the maps, are wonderfully complete maps of Mars that have been constructed can be seen.

Another interesting thing about Mars which can now be studied is the mysterious network of so called canals which cover a large portion of the planet's surface, particularly in the equatorial regions.

Somehow in Georgia there is a church, which is called "The Sister's Church," all the members are women. The work of this missionary society is to send Dr. Bull's Cough Syrup to the Indians, who suffer largely with coughs and colds.

In Small Pox, Scarlet Fever and Diphtheria Darby's Prophylactic Fluid will stop the spread of the infection.

Let us all pull out of this sea of sickness and despondency, and get onto a rock foundation of good, strong health. Burdock Blood Bitters are the thing to pull for. They are one of the most renowned liver restoratives ever manufactured.

Shall We Let the Child Die? A hard-headed political economist, looking at a pale and puny child feebly gasping at his own pillow, says that the child might as well die. It is so weak and poor that its life will never be worth much anyhow.

KIDNEY-WORT. BROWN'S SKIN CURE. A LADY SAID. 'Tis those horrid pimples! No, I cannot go. Please Present My Excuses.'

Probably two-thirds of the ladies in society and homes of our land are afflicted with skin diseases of various kinds, to do away with which, if it could be done without injury, would be the happiest event of their lives.

To improve this appearance great risks are taken: arsenic, mercury, or high-sound tinned named articles containing these death dealing drugs, are taken in hopes of getting rid of all skin troubles. In many cases death is the result. No alleviation of the burning, itching, itching and inflammation is given.

By the discovery of new things, but nothing has ever proved the test like Dr. C. W. Benson's Cream and Glycerine Pills. They really do cure skin diseases, Nervous Headache, Neuralgia, Nervousness, Sleeplessness, Indigestion, Paralysis and Melancholy.
