Mr. Milne, the agent of the American Bible society who has passed from the Atlantic to the Pacific, across the continent of South America, gives most interesting reports of his work in Peru. On the 26th of last November he was at Iquique, meaning in a few days to take a steamer for Valparaiso. Of a consigment of 3,000 volumes he had remaining only seventy testaments and 300 Portions, which would soon be disposed of. At Tacna, notwithstanding the poverty and distress caused by the war, there were sold in eighteen days 164 bibles, seventy-nine testaments, and 185 Portions, for \$193 90. Many persons were found who had long wished to obtain the scriptures, but had not known where to procure them. No opposition was encountered either from the civil authorities or the clergy, and not an instance occurred of a purchaser regretting his bargain and desiring to return his

The devotion of the Countess of Russell, who is still living. and the Countess of Beaconsfield, had something of romance. Mrs. Glad stone, who is nearly the same age as the premier accompanies her husband, as did lady Beaconsfield, every where, and frequently remains in the ladies' gallery to the close of the nights sitting. Lord Palmerston, more than perhaps any other first minister, however, was indebted for his position and its maintenance to his wife, who was physi cally and mentally a remarkable woman. Up to her death in 1869 at 85, four years ofter her husband, she could read without glasses, and talked with all the fire and stergy of a young woman of 20. N. Y. Timas. The rival gang of deacons who are quar-reling over the particularly living body of Dr. Newman have shown signs that at least some of them are not indisposed to make "a deal." Four deacons connected with the Newman "machine" have proposed to the deacons forming the Ranney 'machine' that the former should be admitted to the council called by the latter. This is equivalent to an abandonment on the part of the Newman gang of their claim co powerful to be ignored.

> A State Reformatory. Philadelphia Ledger.

The efforts of Governor Hoyt to secure the new prison new being built at Huntingdon some of the methods enforced at Elmira, may revive the interest of our itizens in the success claimed in the last report of the New York state reformatory. It is now well established, and its experience and results show that it is no longer an experiment. First offenders, between 16 and 30, are now sent to Elmira for imprisonment, not for fixed terms, but on

the contract system; and besides the op portunity of learning a trade, education is one of the important branches of discipline.

release after six months or more of good performance while at large, 274 are still on parole, 60 were brought back for violating their parole, 57 were discharged by expira-tion of their sentences, 8 died and 20 are again in prison. The result is claimed to show that over 91 per cent. are no longer a danger to society, while eighty per cent-are living honestly after an average imprisonment of seventeen months. The question of cost is settled by liberal appropriations from the state treasury, and is not in any way affected by any desire to make the prison pay-a damaging element in the work of prison discipline and reform. The nature and extent of the education at Elmira are fully set forth in the report, and it is gratifying to see how much is done to instruct the men in something more than merely elementary knowledge. If our Huntingdon county reformatory is to do its work well, that at Elmira ought to be thoroughly studied by our own state authorities.

SICKNESS A DISGRAUE.

Beverages and Frogs the Great Foe of

Dr. Felix L. Oswald, Popular Science Monthly, says: "All bodily atlments are more or less urgent appeal for help, nor can we doubt in what that help should consist. The more we fully understand the nature of any disease the more clearly we see that the discovery of the cause means the discovery of the cure. Many sicknesses are caused by poisons foisted upon the system under the names of tonics beverages or remedial drugs; the only cure is to eschew the poison. Others by habit more or less at variance with the health laws of nature; to cure such we have to reform our habits. There is nothing ac idental and rarely anything inevitable about a disease; we can safely assume that nine out of ten complaints have been caused and can be cured by the sufferers (or their nurses) themselves. 'God made man upright ;' every prostrating malady is a deviation from the state of nature. Statistics show that among the Caucasian races men of thirty have more hope to reach a good old age than a new born child has to reach its second year. The reason is this: The health theories of the average Christian man and woman are so egregiously wrong that only the opposition of their better instincts helps them—against their con

New York Witness, August 15, 1880. "I find that in addition to the pure spirits ontained in their composition, they contain the extract of hops and other well known and highly approved medicinal room, leaves and inctures in quantities sufficient to render he article what the makers claim it to be, to wit, a medicinal preparation and not a bever-age—unfit and unsafe to be used except as a medicine.

" From a careful analysis of their formulawhich was attested under oath-I find that in every wine glass of Hop Bitters, the active nedicinal properties, aside from the distille spirits are equal to a full dose for an adult, which fact in my opinion, subjects it to an in ternal revenue tax as a medicinal bitters."
