REMOVED FROM DEATH. The following statement of William J. Coughlin, of Somerville, Mass., is so remarkable that we beg to call for the attention of our readers. He says: "I was afflicted with a violent bleeding of the lungs, followed by a severe cough. I soon began to lose my appetite and flesh. I was so weak at one time that I could not leave my bed. In the summer of 1871 I was admitted to the City Hospital. While there the doctors said I had a hole in my lung as big as a half-dollar. I expended over a hundred dollars in doctors and medicines. I was so far gone at one time a report went around that I was dead. I gave up hope but a friend told me of DR. WM. HALL'S BALSA FOR THE LUNGS. I bought at my friends, thinking my case hopeless, but I got a bottle to satisfy them, when to my surprise my gratification, I commenced to feel better. My hope, once dead, began to revive, and to say I feel better spirits than I have the past three years."

"I write this hoping you will publish it, so that every one afflicted with Diseased Lungs will be induced to take DR. WM. HALL'S BALSA FOR THE LUNGS, and be convinced that CONSUMPTION CAN BE CURED. I have taken two bottles and can positively say that it has done me more good than all the other medicines I have taken since my sickness. My cough has almost entirely disappeared and I shall soon be able to go to work." Sold by H. B. Cochran, 137 North Queen street.

MEDICAL.

BROWN'S IRON BITTERS.

BAD, BAD, BAD BLOOD. Some blood is bad because it is poor and weak. Some is bad because it contains impurities. Some men have such bad blood that the wonder is it does not poison the mosquitoes who come to bite them. The rich red color of good blood is owing to the iron which is present. Blood which has not enough iron in it is always unsatisfactory. The person in whose veins it circulates can not be said to enjoy good health. The efforts of expert chemists to produce a preparation of iron which can be assimilated with the blood have resulted in that perfect preparation which is an important part of Brown's Iron Bitters. It is the only one which freely enters into the blood. It is the only one which accomplishes the desired good. Weak, poor, thin blood may be made rich and strong, and impure blood may be purified by the use of that Great Iron Medicine, Brown's Iron Bitters.
