The Falls of the Genesee and Fam Patch's Fatal Leap---One of Its Business Houses and Its Great Magnitude,

Great Magnitude,

(Waterloo, N. T., Observer.)

The present floods, which are either devastaling or threatening the country in every direction, are justly cause for apprehension. No matter whether they come suadenly or by slow degrees, they are, in either case, a great evil and much to be dreaded, and yet America will always be troubled by those spring overflows. Probably one of the most disastrous that was ever known, occurred in Rochester, N. 1., about twenty years ago. The Genesee river, just above the falls, where Sam Patch made his final and fatal lesp, became completely blockaded by tee, forming an impassable dam, and the water coming down the wenese river overflowed the principal portion of the city of Rochester. This catastrophe would have been repeated the present year had not the energy and foresight of the city authorities prevented it. The writer happened to be in Rochester at that time and was greatly interested in the manner in which this great catastrophe was averted. Every few moments, a rear like the peals of thunder or the booming of cannon would be heard, and in order to see this fee bleating process, the writer went to the top of the new Warner building, which overlooks the Genesee river. From here he was not only enabled to see the process uninterruptedly, but also the magnificent building which has just been completed. This is unquestionably the fluest building devoted to business and manufacturing purities in America, being entirely fireproof.

Langle Stories night and containing over four and quarter acres of flooring. Mr. Warner transity of the course of the conversation said:

"We are doing a tremendous business and are far behind in our orders. This is the season (Waterloo, N. T., Observer.)

treated your correspondent very courieously and in the he course of the conversation said:

"Weare doing a tremendous business and are far behind in our orders. This is the season of the year whea people, no matter how strong their constitution may be, feet, more or lars, the pain and indisposition, the head-sches, colos, neuralgia, rheumatism, duit pains, sore threats, coughs—all the 1.00 fils that firsh is heir to come this time of the year, if at all. It is natural, therefore, teat we should be very busy. This is specially true of our safe Rheumatic Cure, and it is crowding us very sharply for a new remedy."

"Singular, but I had forgotten that you do not advertise to cure all diseases from one bottle, as is done generally by many other medicine men; but I supposed Warner's safe Cure was for the cure of rheumatism."

"And so it has been until our ramedy which was especially for rheumatism and neuralgia, was introduced. We have been three years perfecting this new remedy. Study first taught us there were certain powerful elements in Warner's Safe Cure, better known as Warner's Safe Risiney and i fver Cure, that made wonderful cures in chronic and acute rheumatism, but during our investigation, we learned of a remarkable cure at a celebrated springs, and put experts to investigate and found that the springs did not contain any valuable properties, but the course of treatment that was being given there was performing all the benefit. By carefully combining the active orinciples of this remedy with our Safe cure, we have produced our safe Rheumatic Cure, and the cures it is effecting are simply cure, we have produced our Safe Rheumatic Cure, and the cures it is effecting are simply wonderful, and I do not doub it will become as popular as our Safe Cure."

"You seem to talk freely in regard to your remedies and appear to have no secrets, Mr. Warner."

"You whatever. The physician with his

"None whatever. The physician with his hundred calls and one hundred diseases, is necessarily compelled to guess at a great deal. We are enabled to follow up and perfect, while physicians can only experiment with their hundred patients and hundred diseases. With the ordinars physician, the code binds him down, so that if he makes a discovery, he is bound to give it to the other physicians, which, of course, discourages investigation, to a great extent. This is why the great discoveries in medical science of late years have been made by chemists and scientists and not by physicians, and it in a measure accounts for the great value of our remedies and for the remarkable success of all those doctors who make a specialty of one or two discases."

"None whatever. The physician with his hundred diseases, is necessarily compelled to guess at a great deal. We are enabled to follow up and perfect, while physicians can only experiment with their hundred calls and one hundred diseases, is necessarily compelled to guess at a great deal. We are enabled to follow up and perfect, while physicians can only experiment with their hundred patients and hundred diseases. MEETING OF THE SCHOOL BOARD Amenament to the Rules-New School Brouse to be Built-City Superin-

tendent's Report. A stated meeting of the Lancaster school board was held Thursday evening in common council chamber. The follow-

ing named members were present : Messrs, Baker, Brown, Byrne, Cochran, Darmstetter, Eberman, Evans, Gast, Hartman, Johnston, Johnson, Marshall, McComsey, Morton, McCormick, Oblender, Ochs, Raub, Reimensnyder, Richards, Ringwalt, Samson, Schwebel, Slaymaker, Smeych, Spurrier, Levergood-president, The minutes of last stated meeting were

ead, corrected, and adopted. Mr. Evans, from the floance committee, presented the following bills which were approved by the committee and ordered by

the board to be paid:
Charles H. Barr, books and stationery,
\$32 24; Barbara Urban, error in paying
school tax, \$1 50; Lancaster Freie Presse, advertising election, \$4.12; Henrietta Harkins, four months teaching in night school, \$100.00 ; A. R. Stamy, teaching in night school from Jau. 8, to Feb. 8, \$27 50; D. B. Couzzins, four months teaching night school, \$110; Steinm n & Hensel, printing and advertising, \$27; Myers & McLain, building chimney, Chestnut street school, \$4.43; Casper Weitzel, cleaning school houses, \$10; New Era, advertising and printing, \$7.45.

Mr. Slaymaker, from the property committee, called attention to the dispute relative to the line separating the property of the board on New street from that owned by Mr. Reiner. The matter had been referred to the judiciary committee some time ago, but they had not yet reported.

Mr. Baker said it appeared that Mr. Eshbach, from whom the board purchased the property, sold to the board a small triangular piece of ground that is claimed by Mr. Reiner, and Mr. Reiner had set back the fence to the line claimed by him. It was a matter that should be settled be tween these two men, though the board, having bought the ground, could bring an action of ejectment. If the disputed ground belongs to Mr. Reiner, Mr. Eshbach must make good to the board the

On motion of Mr. Hartman the matter was left in the hands of the judiciary committee with power to make an amica ble settlement, if they can, and if they can not, to bring suit against Mr. Eshbach for the whole of the ground. The bight Schools.

Mr. Wm. Johnson, from the committee on night schools, reported that the attendance at the girls' school had fallen off to twenty scholars, and the committee advised that the school be closed. The boys' school had fallen off to fifty Mr. Slaymaker moved that the girls'

night school be closed, and that one of the three teachers in the boys' night school be dropped. The motion was agreed to, but the action was reconsidered, whereupon Mr.

Byrne moved that the night schools be closed forthwith, in accordance with the resolution of the board by virtue of which they were opened in September last. Alderman Sparrier hoped the boys re fifty boys attending it.

amend Mr. Byrne's motion so that one of the teachers be dropped. Mr. Byrne said that thought the attend ance might number lifty at present, it would fall off as soon as good weather sets

Mr. Hartman moved further to amend, that the school be continued as long as there is an average of forty-five pupils, Mr. Spurrier accepted the amendment. After further debate the question was called on Mr. Spurrier's amendment, as amended by Mr. Hartman, and it was

The question was then taken on Mr Byrne's motion to glose the school, and it also was lost. Mr. Darmstetter moved to close the

chool on the 15th inst. Mr. Spurrier moved to amend by drop ping one teacher immediately; and if the number of pupils falls off the committee shall have power to drop a second teacher, or close the school at their discretion. Mr. Darmstitter accepted the amend ment, and his motion as amended was adopted.

Amendment to Rules. The amendment to rule 39 of the "Rules and regulation of the common schools of Lancaster city," came up on third reading, and after discussion was adopted. As amended the rule reads as

follows : "To discontinue the connection between the board and any of the teachers, one month's written notice shall be given by the party desiring the separation, except

at the end of the school year. " The board, however, reserves the right to dismiss without such notice, any teacher for incompetency, negligence, cruelty or immorality, or for intentionally violating any of the regulations of the board," Mr. McComsey presented the following

To the President and members of Lancaster GENTLEMEN. - Your joint committee to whom was referred the question of " the advisability of erecting a school building in the southern part of the city" respectfully report that on examination we find a large and populous outlying dis-trict south of Conestoga street, extending to the southern limit of the city, including on the east all of South Queen street from Middle, and bounded on the west by Hoffman's run and a part of the Eighth ward, within which limits there is now no school accommodation.

In this d strict there are now over four hundred families whose nearest and only schools are those on Dake street, Rockland street, West Vine street and Manor street. Eurolled in these schools we find only 135 primary children from this dis-trict, while there is still sufficient accommodation for at least one hundred and fifty more.

The comparatively small number of children now attending school in proportion to the large number of families living in this district, together with careful inquiry into the matter, developed the fact that many primary children are unable to attend through the want or proper school accommodations more conrepient to their homes.

The increase and diffusion of population now reaching in some directions to the extreme limits of the city, renders access to some of our present schools very diffioult and necessitates an increase of more convenient accommodations.

This is expecially true of the district under consideration. In view of these facts, as well as the fact that wherever new school buildings have heretofore been erected in outlying districts the primary departments are already crowded, your committee unanimously agreed to recom-mend the erection of a four room school building in the southern part of the city. Respectfully submitted

WM. MCCOMBEY. JOHN B. WARFEL, LUTHER RICHARDS, C. REIMENSKYDER,

H. E. SLATMAKER, JOHN I. HARTMAN, THOS. B. COCHRAN, PETER McCONOMY.

CHRIST. ZECHER. Mr. McComsey said, the question referred to the committee, was one requiring careful consideration, in order to reach a proper conclusion. From a casual glance it the subject, there would seem to be no necessity for a new building in the southern part of the city while there are so many vacant seats in the schools intended for the use of this district. But the situation has greatly changed since the erection of our old school houses, thirty years ago. Then these schools conveniently accommo dated all, from the centre to the circum ference of population. Now, much of the central part of the city is used for trade and business, and large centers of popula tion have grown up too far beyond these old schools to be any longer available, hence the necessity for the erection of new buildings nearer these new centers of population for their accommodation

This necessitated the erection of the Rockland street building, the New street building, the James street buildings; and this is why a new building is needed in the southern part of the city. The report of the committee

otion accepted. Mr. Oahs moved that the property com mistee be directed to select a site for the erection of a new school building in the southern section of the city, and to purhase the same if they can do so on favor

able terms Mr. Evaus said he could see no necessi for the proposed new school bouse here are ample accommodations for the hildren of the district named, in the Duke, line and Rockland street schools. There are very few improvements being made it that section of the city, and it will be years before a school house will be required there.

Mr. Morton said the reason the schools named by Mr. Evans were not full, was because the children of the southern end of the town had to walk a mile to get to

Mr. Sourrier said there were 448 voters in the Fourth ward south of Conestoga | Thanks to Hunt's Remedy for my restoration. street, 79 per cent. of whom are married and I highly recommend it to all who are men, and are the fathers of hundreds of children of school age-not counting the widows who have children of school age. Besides these, there are 39 houses on the east side of South Queen street, below Andrew, mostly occupied by families with children, who have no convenient school accommodations, and who would be accommodated by the erection of the proposed school house. Experience has shown hat wherever school houses are erected in outlying sections of the city, the percent

receive them. Mr. Byrne said he did not know much about the necessity for increased school accommodation in the southern end of the city, but he knew the gentlemen who had signed the report and had faith in their judgment. He would vote for the resolu-

tion. Mr. Ochs' resolution was then adopted by the following vote. Yeas-Messrs. Baker, Brown, Byrne, Darmstetter, Eber-Alderman Spurrier hoped the boys' man, Gast, Johnston, Johnson, Marshall, school would not be closed as long as there McComsey, Morton, McCormick Oblender, John, Raub, Reimensnyder, Richards, Ringwalt, Samson, Schwebel, Smeych, Sparrier, Levergood, president-23.

Nays-Evans, Hartman-2. Messrs. Cochraa and Slaymaker delined to vote. City Superintendent Buehrle presented

he following report : LANCASTER, Pa., March 6, 1884. To the Board of School Directors:
GENTLEMEN. - Your city superintend ent submits the following report of the public schools for the month of February: The whole number of pupils enrolled was 243 in the high schools, 1,071 in the secondary schools, and 1,893 in the primary schools, making a total of 3,207, to which should be added 74 in the night

schools. The average attendance was 231 in the high, 961 in the secondary, and 1,560 in the primary schools, making a total of 2.278, to which 68 in the night schools should be added as before. The average

percentage of attendance was 86. The number of visits made by the city superintendent was 77. The number of visits made by directors was 74, as follows :

W. McComsey 30, H. E. Slaymaker 11, S.'W. Raub 9, Dr J. Levergood 3, C. Schwebel 6, Jos. Samson, esq., 9, J. M. Johnston 1, Wm. Johnson 3, A. J. Snyder I, George Darmstetter 2, to which should be added for the night schools D. Smeych 1 and Wm. Johnson 1.

As showing the actual increase in the number of pupils attending our schools, it may be interesting to know that three years ago just previous to the occupation of the building on West James street, (the first of the recently erected new buildings) our eurollment for February exclusive of the German and English and the African schools was 208 in the high schools, 692 in the secondary, and 1,727 in the primary; the average attendance was 198, 600, and 1,287 respectively. Comparing the figures for average attendance as being reliable and therefore best for the purpose, with those given above, it will be seen that the increase in the high schools has been 17 per cent., in the secondary 40 per cent., and in the primary 13 per cent. crease in the number of teachers has been only 7, being 11 per cent. of the number then employed, thus bringing about a considerable reduction in the cost of tuition, while at the same time, a much larger number of pupils are attending the higher schools. This increase being principally in the secondary and high school grades, also proves that our pupils make more rapid progress in the primary and secondary grades. Nor should it be forgotten that both book keeping and physiology were then but just introduced, into the secondary grades, and that the kind of work required in drawing has been much advanced. To make the course more practically useful, language lessons have taken the place of grammar, and efforts have been made to cultivate a love for literature as well as to train pupils to habits of research and investigation.

So also the course of study in the high schools has been considerably advanced. Natural history, chemistry, physics, geol-ogy, astronomy and moral science in the boys' department, and natural history, geology, astronomy, Eng. literature, constitution U. S., Latin and German in the girls' department, have since been added. As to the last named branches of study, namely, Latin and German, notwithstanding that the pursuit of them is optional we have 38 young ladies studying the former and 51 the latter. Our schools have ceased to be the schools

for the poor only, and are rapidly as-suming their true position as schools for the people. By the erection of new and comfortable buildings at points easy of access, and supplied with suitable furni-ture, the board has endeavored to meet the wants of the people, and has made it pos-

avail themselves of the advantages offered by sending their children to the public

Respectfully,
Your obedient servant,
R. K. Burnner. Mr. Ringwalt, from the committee on soldiers orphans, presented the application of Elizabeth Ruhl, widow of Mi-chael Ruhl for the admission of her three children — George, Wil-

and John - into the soldiers orphans school. The applications being accompanied by all the necessary proofs, the children, were on motion, recommended

It is said the Langury garter is getting to be fashionable and much worn; how this may be, we do not know, but we do know that everybody is using Dr. Bull's Cough Syrup, for all catarrhal affections.

Mr. A. S. MERRILL, the popular expressman

EXPRESSMEN LIABLE.

as follows: Having been severely afflicted for about two years with inflammation of the kidneys and bladder, so called by my physiclans, I suffered with distressing pains in my back and retention of urine, caused by stop page of the neck of the bladder, and a com plication of other diseases. I was pardly able to attend to my business, and at times would be completely prostrated. I was also affected with incontinence of urine to an alarming degree; indeed, it demanded my attention fifteen or twenty times per night, and at times it would seem impossible for me to ride down to the depot on my wagon, for every jar from the wagon would almost seem to take my life. Having falled to obtain relief from my doctor, I finally consulted our druggist, Dr. Merryman, of Brunswick, and requested him to furnish me with the most reliable and speedy cure for such sickness, for I was suffering too much for human nature to endure long. Th doctor recommended me to use Hunt's Re-medy, as it had been used with remarkable success in a good many cases in Brunswick and vicinity. I purchased a bottle, and reseived sne : great relief that I continued, and had not used two bottles before I began to improve beyond my expectations. The pains in my kidneys and loins disappeared, I gained strength, and my water began to pass naturally, and I was able to sleep soundly, and obtain the greatly needed rest which for a long time I could not. I am fully restored to good health, and can attend troubled with kidney complaints."

COULD NOT LIFT A POUND.

The above are the words of Mrs. Harris Balley, of Putnam Conn. She writes May 3, 1883: "I have been troubled with kidney and liver disease for two years. I suffered severely in the back and loins. Before taking your wonderful medicine, Hunt's Remedy, could not lift a pound. After giving to a fair trial, I began to improve, and can now truly say it was a 'Godsend to me,' as I am now able to do my household work and enjoy the best age of attendance of pupils lacreases. He of health. I have recommended Hunt's Rebelieved the new school house would be medy to two of my neighbors, who have been filled with pupils as soon as it is ready to greatly benefited by it. This letter I send voluntarily, with the hope that it will be the means of inducing some sufferer to use Hunt's Remedy, and to cured as I have been." m3-lwdM, W&F&W
