

HORTICULTURE.

THIRTY-TWO TO THE FRUIT GROWER. Revised List of the "Germantown Telegraph" for the Spring of 1884—What to Plant.

Our regularly published list is always more or less slightly changed, for various reasons, either in taking from or adding to it; but in regard to the list as a whole we can see no good grounds for disturbing it, though we should not hesitate to do so were any new things strongly recommended to us and sustained by the best authority. Indeed, we do not see how it can be improved for this section of country, or as a general list for all the Middle States. And this is the opinion of a number of fruit raisers who have spoken, or whom we have heard from. Some of each of the separate selections may not do well upon one promise that will succeed admirably on another, even if separated by only a single farm or a line fence. Hence, each grower must find out for himself the particular apple, pear, etc., especially adapted to his soil and climate. This can be easily done by inquiries of those who within a reasonable circuit are successful fruit growers and whose soil is somewhat similar to his own.

According to our present preference, we should select the following for our own planting, nearly all of which we have been growing more or less successfully: Standard Pears—1, Giffard; 2, Doyenne d'Été; 3, Early Catharine; 4, Bloodgood; 5, Summer Juliette; 6, Tyson; 7, Bran-dywine; 8, Bartlett; 9, Belle Lucrative; 10, Manning's Elizabeth; 11, Seckel; 12, Howell; 13, Anjou; 14, Sheffield; 15, Lawrence; 16, Reading; 17, Kieffer. For those who may desire a smaller number, we should select: 1, Giffard; 2, Early Catharine; 3, Bloodgood; 4, Tyson; 5, Bartlett; 6, Belle Lucrative; 7, Seckel; 8, Lawrence; 9, Reading; 10, Kieffer. They ripen in about the order they are arranged, except as to the three latter. The Lawrence, which begins to ripen, or can be made to ripen, early in November, will keep until April, it being the only winter pear which with us keeps beyond February.

In the above list, from No. 1 to 7 are summer varieties, from 8 to 14 autumn (early and late) and 15, 16 and 17 winter, thus affording a sufficient number for each of the periods of the best known sorts for this region.

We have dropped several pears heretofore in our list, as not coming up to the mark after a full trial. We would also add that the Brandywine, Belle Lucrative and Reading are not profitable market pears. As to the Kieffer, opinions differ greatly, but it is no doubt owing to the difference in the nature of the soil; the principal characteristics in its favor, and they are important, are its early and abundant bearing, and its excellence for canning, which make it a profitable pear to grow.

Desired Pears—1, St. Michael d'Archambault; 2, Bartlett; 3, Comice; 4, Ros-tizer; 5, Diel; 6, Tyson; 7, Belle Lucrative; 8, Lawrence; 9, Out; 10, Louise Bonne; 11, Bose; 12, Bussac; 13, Gout Moreau. The St. Michael, Belle Lucrative and Gout Moreau—the latter being a most desirable winter variety—blight so seriously that there is no certainty about them after fruiting from six to eight years, at least in this section.

Apples—1, Maiden's Blush; 2, Baldwin; 3, Smokehouse; 4, Northern Spy; 5, Smith's Cider; 6, Fallwater; 7, Cornell's Fancy; 8, Red Astrachan; 9, Wagner; 10, Porter; 11, Gravenstein; 12, Tompkin's King; 13, Roxbury Russet. Peaches—1, Crawford's Early; 2, Hale's Early; 3, Troth's Early; 4, Old Mixon; 5, Crawford's Late; 6, Ward's Late; 7, Smock's Late; 8, Admirable, late.

Grapes—1, Telegraph; 2, Concord; 3, Hartford; 4, Clinton; 5, Salem; 6, Excelsior No. 2; 7, Brighton; 8, Frontenac; 9, Pocklington.

The Prunella is, so far, the best of all white grapes. The Pocklington and Brighton the best out door varieties. Clinton is especially for wine. For a few varieties of the family of which we should mention the five last named in the list.

Cherries—1, My Bigarreau; 2, Belle de Chéry; 3, Black Tartarian; 4, Black Eagle; 5, Black Hawk; 6, Elton; 7, Downer's Lane; 8, Early Richmond; 9, Early Purple Gage; 10, Del. Bleeding Heart.

The ripening of the list will range from the earliest to the latest, thus carrying one through the whole cherry season. No one can go amiss in adopting this list.

Raspberries—1, Heron; 2, Heroline; 3, Brandywine; 4, Cuthbert.

The "Cuthbert," a new variety, possesses all the evidence of being a raspberry of decided merit. It is of good size, excellent quality, the case a strong grower, abundant bearer, and especially hardy without protection. We have heard of it for a year or two, but have been afraid to endorse it without satisfactory proof of its merit, which we now have. It ripens at about the usual time and bears marketing well. Hence, there appears no reason to be in the way of its taking rank as a standard fruit of more than average value.

Strawberries—1, Captain Jack; 2, St. Boyden; 3, Sharpless; 4, Titouphie de Gaud.

New kinds of strawberries are constantly appearing, and we could name half a dozen; but thus far we know of no improvements on the foregoing. These are good enough until better turn up, which we shall not be slow in announcing.

Currants—1, Black Naples; 2, Red Dutch; 3, White Grape.

These three varieties are the best among the different colors.

Gooseberries—1, Houghton; 2, Downing.

These are the two best gooseberries grown in this country for general use, so far as we know. They bear every year, heavy crops, are free from mildew, are of excellent quality, and are large enough for all practical purposes.

Blackberries—1, New Rochelle; 2, Mission Cluster; 3, Western Early; 4, Snyder.

The Snyder, a new Western blackberry, is highly spoken of at distant points, and from the very respectable endorser which it has we have no doubt of its value in the West. But we have not yet discovered any superiority over the others named in our list; indeed not even equal to them.

It is better that those who intend to cultivate fruit and have to make purchases, should take this list with them to the nursery, and adhere to it as far as possible, except in special cases in which their own individual wishes may be better satisfied.

In selecting fruit trees, or any others, be careful to choose those with smooth, healthy looking bark, have entirely sound roots, and have plenty of small fibrous roots. Trees on which the leaves remain after frost sets in, and stick to the branches in the spring, may be regarded as not healthy, and in some way lacking stamina.

This Dead Cat. New Orleans Times Democrat.

The other day a New Orleans man had occasion to go over the lake. On his way back, and when the train stopped at a bay, he noticed a man getting into the car in front of him with a little baby in his arms. After the train had got under way the conductor came and said: "Come with me; I want to show you the saddest, meanest, and most wicked man I ever saw. He is the man who has just killed the baby in your arms. He is the man who has just killed the baby in your arms. He is the man who has just killed the baby in your arms."
