Sanford's Radical Cure.

Respectfully, &c., J. K. SMALING. LANCASTER, March 19, 1883. mar19-19 W&S AN APPEAL FOR A WORTHY PURPOSE. The Committee on the New Astronomical

Observatory at the College Ask for the Utilizens' Cooperation.

The committee having in charge the matter of the erection of a new astronomical observatory at Franklin and Marmical observatory at Frankin and Mar-shall college, in the membership of which are included Rev. Dr. J. O. Miller, York, Hon. A. Herr Smith, Lancaster, Geo. F. Baer, esq., Reading, T. G. Apple, Lancas-ter, and Henry Wirt, Habover, make the following earnest appeal to the public spirited citizens of Lancaster. It has been made known in the periodi

It has been made known in the periodi cals of the city that Mrs. James M. Hood, residing in Frederick City, Md., recently made a donation of \$10,000 to erect and

equip an astronomical observatory on the grounds of Franklin and Marshall college, as a part of a more general scheme for college. This donation was made by the donor, under the impression that it would be quite abundant for the object named. The committee having the matter in charge had named a smaller sum, fearing perhaps that a larger amount could not be obtained, and believing that it would be better for the college to have an inferior observatory than none at all.

When this liberal donation was made for this object the friends of the college thought that it would not now be difficult for the college to obtain means sufficient to creet a first class observatory, and that the feeling of local pride the city might entertain for such an object might induce the friends of the college in Lancaster to

contribute what additional may be needed to erect and equip such an observatory. Different Scheme Proposed.

At a special meeting of the board of trustees, held in Lancaster on the 18th inst., three schemes were submitted for the observatory ; one for \$10,000, one for \$1,800 additional, and one for \$3,000 ad ditional. The second scheme contemplates simply the erection of an annex to the observatory, containing a room where reports, pamphlets, etc., may be kept, and also for the comfort of the operator and any visitors that may wish to see the ob-stricted their marital relations to one. It servatory, &c. The third scheme involves is quite possible that public opinion the getting of improved instruments, es- among the Mormons themselves is nearly telescope used in the colleges of this country, except the very large ones possessed by a few of the larger institutions, such as

Harvard, Yale, Princeton, &c. Such an observatory would be an honor o the college and an ornament to the city. It is of such practical importance that it is believed the friends of education in this city will be pleased to contribute to it. without causing more harm than good. city will be pleased to contribute to it. Other Improvements Contemplated.

In this connection we mention to the

FOR EDUCATION'S SAKE. and any case of oppression or harsh treat ment would be cagerly proclaimed. Again, polygamy as practiced by the Mormons must prove an expensive, if not troublesome, luxury. The following is the Mormon view of marriage as stated by George Q. Cannon, one of the president's counsel

ors, and formerly delegate to Congress Не влув : "There is an impression among the uninformed that the man who enters into

patriarchal marriage in Utah has but little any responsibility connected with it ; that upon his partners rest all the burdens and unpleasant features of the relation-ship; that they, in becoming his wives, become the creatures of his will, and that, therefore, their civil rights are interfered with. This view is wholly incorrect. It is the women, under the system of patriarchal marriage, who have liberty, and not the

men. When one marriage has taken place between the parties, be the woman ever so much an unprotected stranger in the land, the man who knows her takes upon enlarging the scientific department of the him a life long obligation to care for her and the fruit of their union. For a man to seek for a divorce is almost unheard of, the liberty upon this point rests with the woman ; and, as regards a separation, if her position should become

rksome, or distasteful to her even, and she should desire a separation, not only is the man bound to respect the expressal of her wish to that effect, but he is bound also to give her and her offspring a proportionate share of his whole property. They are no longer under his yoke ; but while he and they live, they have a claim upon him from which he is never com-pletely absolved.

"Surely it must be religion which prompts the Latter Day Saints to incur

such serious responsibilities at the risk of being pronounced felons, and being stripped of property and citizenship by being incarcerated in the penitentiary?" The influx of visitors and the ideas of the outer world introduced by the opening of railway communication have no doubt very much influenced the ideas of Mor-

mon men, and particularly of Mormon women, on the subject of polygamy, and it is said that many polygamists have

pecially a large telescope, one that will be ripe for some authoritative declaration by equal and even superior to the ordinary | the church, or revelation, that under the new circumstances polygamy is unneces sary and inexpedient. To Mormons brought up in Utah in the

old days, polygamy supported by the Old Testament examples may have seemed natural enough, and whatever their opinions may now be, it is not easy to see HOP PLASTER.

The Mormons advocate polygamy as a duty. They point to excess of females in reader, that the committee have in mind the Eastern states, to the greater waste of other improvements for the college, such male life than of female, to the evils of as a complete chemical laboratory, instru. prostitution so prevalent in old commun-ments for the department of physics, and ties, and for that matter also in young,

The man that succeeds nowadays is the live man, who is up to the times; and no better evidence of this is needed than the fact that every go-ahead housekeeper is never without Dr. Buil's Cough Syrup. FOR North Pole Expeditions, North Fold Expedition, Prize fights, lotteries, walking matches, and balloon ascensions are urnally humbugs of the worst sort. Dr. Thomas' kelectric Oil is not a humbug.
