The Warning of the Blot.

The warning of the Cincinnati riot is one to be improved. It was a riot such for party peace before the former's inas any day may be experienced in any auguration. There is nothing new in this discontent with the local administration accompanies it that Blaine was the marof justice ; and it is easy to conceive that plot whose seal in getting overything for a little cause may have a like effect in himself and his friends, led to the quarthem is to make the administration of of Garfield. Mr. Blaine is a natural justice worthy of respect and confidence. That it is not thus worthy generally, we cannot affirm. We cannot so declare in offensive than Conkling or any other are stationed at certain distances from our own county of Lancaster, which we of the so called Stalwart leaders with each other as a matter of safety, and the know best, and where there exists the whom he is quarrelled. He has never same occasion for popular discontent as stood for anything but Stalwartism and variously estimated from 1,600 to 2,000 prevails in Cincinnati. Probably this spoils, and a very large share of the fol- pounds. may be said of many places ; and no lowing he has is commanded by this very doubt it will continue to be said until circumstance.

such popular commotion as that in Cincinnati clears the moral atmosphere of the bench and bar, securing men of honesty, intelligence and capacity for not located in Cincinnati. judges, who will be capable of maintaining an honorable practice of the law at the bar, and of obtaining at least honest verdicts from the jury box. The good judge is the one thing needed for justice sake; for the judge's unlimited power can never fail to cause the scales of jus tice to hang in balance.

It is true that the action of the jur and not the judge around the anger o. Cincinnati ; and that the people put blame upon corrupt and collusive lawyers. The judge declared from the bench that the Berner verdict was an outrage ; but if it was a dishonest one the judge was himself responsible for the

outrage, in that it became possible under his administration of justice. If there were lawyers at his bar, or jurors or property were destroyed in the frenzy of a into which the nitro glycerine flowed officers of any degree, who corruptly lawless mob. But public sentiment was against the law's execution upon Nutt while demanding it upon Berner : so that this public sentiment upon which is founded public commotion, is not aroused by the violation done to the law, but by that done its inadequate sense of instice. In striking confirmation of this we see the Cincinnati rioters springing to arms through indignation at the fail doing murder. Their action was the tariff. Well, perhaps he will be there ;
