BUCOLIC WISDOM.

THE ROBIN AND BLACKBIRD.

THE LANCASTER COUNTY AGRICULTURAL SOCIETY held a stated meeting in their room in City Hall on Monday afternoon.

The following named members were present:

Messrs. J. C. Linville, Gap; Joseph F. Witmer, Paradise; Calvin Cooper, Bird in Hand; Casper Hiller, Conestoga; Daniel Smegeh, city; James Wood, Little Britain; Frank R. Duffenderfer, city; S. P. Eby, city; Dr. J. P. Wickersham, city; H. M. Engle, Marietta; C. L. Hurr, oker, Manheim township.

The president absent Vice President H. M. Engle took the chair and called the meeting to order.

Geo. B. Willson, of Wheatland, was proposed for membership and elected.

John Linville, from the committee on our culture, reported that there had been three entries for the premiums offered by the society for the best eighth of an acre of corn, to be planted, cultivated and garnered by boys not over fifteen years of age. The names of the boys were Frank Backwater, Owen Buckwater and Frank Hershey.

Joe F. Witmer, from the committee appointed to visit the state agricultural college, reported that he had not been able to attend the meeting.

Dr. Wickersham reported that all bills incurred by the institute had been paid. He presented the society a receipted bill for printing and postage amounting to \$39. Dr. Wickersham reported also that the state agricultural society had set apart a portion of the next annual report for the printing of the proceedings of the Farmers' Institute lately held in this city.

On motion of Mr. Cooper Dr. Wickersham was unanimously elected a life member of the society, and on motion of F. R. Duffenderfer the thanks of the society were tendered Dr. Wickersham for his disinterested labors in making the late Farmers' Institute a success.

Calvin Cooper reported the crop of wheat equal to that of last year both in volume and quality; the oats crop is the best grown in the county for several years; corn is not so promising as it was last year, but the quality is good, and the yield is good; apples look well; peaches very poor; from a trip through Chester county and the upper end of Delaware he thought that the corn was better there than here. The grass also he thought was better.

Dr. Wickersham thought the corn of Chester county was better than our's but that the wheat and grass were not so good.

Casper Hiller said the corn in the neighborhood of Conestoga was good, but it had in many places been greatly damaged by the washing rains and also by the corn looper. The apple crop is better than it has been for some years; the wheat crop is very good, but the ground is very dry, the south only a few while the north and west parts are very well.

John C. Linville said the corn was short and late in his neighborhood, and would not yield so well as last year; the wheat was good, but the quality was not so good as last year; the oats were very good; hay crop not very large but very good; tobacco growing finely. He gave it as his opinion that early plowing for wheat crops would be very dry, it is better than late plowing.

Joe F. Witmer reported the wheat crop the heaviest harvested for many years; the corn is uneven, but the ears are set low and early; tobacco a good crop; peaches a full crop; grapes will make a full crop; plums and pears a fair crop; tobacco growing finely; peaches very scarce.

Dr. Wickersham gave it as his opinion that the superiority of the Chester county corn was owing to the thorough cultivation and the planting of the hills further apart than is the practice in Lancaster county.

Calvin Cooper made reference to a very poor farm on Mine Hill, near the city of Georgetown, Pa., which was planted with five or six years had been made to yield very fine crops of corn and other cereals, by a judicious use of ground bone. For corn the farmer used 300 pounds of bone per acre, and for oats 300 pounds, the bone costing \$15 per ton.

To illustrate what may result from liberal and judicious farming Dr. Wickersham called attention to the fine farm of S. S. Spencer, near this city, and suggested that the farmer could not do better than pay Mr. Spencer a visit. He would guarantee them a warm welcome.

Mr. Engle said that the crop reports made by other members of the society would answer for Duergal and vicinity except that the average of the reports is better than the average reports from other sections; the wheat it as good as in other sections of the county, the berry being plump and heavy and the straw clean; good straw and good wheat generally going to the mill; the fruit crop is a failure, nearly all the fruit having dropped off.

S. P. Eby, esq., read the following paper:

A step in the right direction.

One cause of the failure of our fruit crop is the increase of noxious insects. And the multiplication of insects is owing in a great measure of the destruction and driving away of the birds that live on them.

As our timber is being cleared and the inhabitants of the woods, most of which are insectivorous, also leave for such parts where forests still exist. Some few are willing to remain with us, build their nests and bring up their young in our orchards and the trees and shrubbery about our buildings. They are not so numerous as they were, and the birds, among them are the king bird, night hawk, peewee, oriole, vireo, wood-pecker and robins.

The owners of the orchards and gardens are beginning to appreciate the value of their service over and above the small toll they levy of the fruit they protect.

The greatest enemy these birds have now is the idle boy strolling through the country with a gun. Nothing is safe from this most unmitigated nuisance. They trespass over field and farm without leave or license, and kill and frighten off the birds from the orchards, and even laws and shade trees close to the buildings.

There is a law to protect most of the birds we have named, but the trespassers are either bold and impudent, making it unpleasant for persons to order them off, or they do it slyly and hide their game, so that we hear many complaints but few or no arrests, and still fewer punishments.

Advertising Obtrusiveness! It has become so common to begin an article in an elegant, interesting style, and then run it into some advertisement that we avoid all such.

And simply call attention to the merits of Hop Bitters in plain, honest terms as possible.

To induce people

To give them one trial, which so proves their value that they will never use anything else.

"THE REMEDY SO favorably noticed in all the papers, religious and secular, is

"Having a large sale, and is supplanting all other medicines.

"There is no denying the virtues of the Hop Bitters, and the proprietors of Hop Bitters have shown great shrewdness and ability

"In compounding a medicine whose virtues are so palpable to every one's observation."

Did She Die?

"No!

"She lingered and suffered along, pining away all the time for years."

"The doctors doing her no good."

"And at last was cured by Hop Bitters the papers say so much about."

"Indeed! Indeed!"

"How thankful we should be for that medicine."

A Daughter's Misery.

"Eleven years our daughter suffered on a bed of misery.

"From a complication of kidney, liver, rheumatism trouble and Nervous debility.

"Under the care of the best physicians, who gave her disease various names,

"But no relief.

"And now she is restored to us in good health by a simple remedy as Hop Bitters, that we had abandoned for years before using it."

Father is testing Well.

"My daughter says:

"How much better father is since he used Hop Bitters."

"He is getting well after his long suffering from a disease declared incurable."

"And we are so glad that he has used Hop Bitters."

"A LADY OF UTAH, N. Y."

"None remain without a bunch of green Hop Bitters, and give them all the vile, poisonous stuff with "Hop" or "Hops" in their name."
