THAT BRUTAL ASSAULT

Uharles Wise Sittl a Fagitive from Justice... Officers on His Track.

Charles Wise, who committed the brutal assault on his wife yesterday afternoon, is still a fugitive from justice. The whole city was scoured by policeman all of yesterday afternoon and last night, buthe could not be found. Reports were made to several officers that he was seen in this or that locality but a search in the vicinity of the points designated failed to find him. This morning it was reported that he was seen at Dillerville and Policeman Specce went out there but did not get any trail of him. Shortly after committing the assault Wise met Special Officer Benner in the Eighth ward, and he said to him, "Arrest me; I have sottled her." The officer not having heard of the assault, did not understand what he meant and told Wise that he had no warrant for him and could not take him into custody. Benner heard of Wise's crime a few minutes afterwards and at once started in search of the crimi nal, but then gould not find him.

Mrs. Wise is much improved to-day and it is expected that she will be able to be about in a few days.

THE DRAMA.

Miss Perths Welby and a Lot of Amateur

Last evening H. A. D'Arey's company, with Miss Bertha Weiby as the star, appeared in the opera house in the play entitled "Lady Clare and the Ironmaster." This piece is one of the best of its kind, and the people here have had the pleasure of see-ing it well presented by Miss Maude Granger and her excellent company. Last might, however, they were disappointed.

Miss Welby is an actress of ability and
promises to do well in the character of
Clare in the future. Her support is bad,
Mr. John Hazelrigg being the only person in the company who is worthy of notice, the company who is worthy of notice. He made a very acceptable Philippie. The others all acted like amateurs and made a number of ugly mistakes. The small audience almost roasted, but they remained to see the piece out.

"Temple Sketchre "

Mr. Henry Latchford, A. B., of London, proposes delivering a lecture in this city at an early date upon the subject of "Temple Seetches; or, How Lawyers are Made in England," Mr. Latchford lived for some years in the Temple, as a law student, and is familiar with the inner life of that historical lustitution. He is also the author of a book upon the cognate subject of "Wit and Wisdom of the English Parliament," and is well qualified to deliver an interesting and instructive address upon the subject he has

Defencing a Laughter's Name

Thos. H. Marshall, of Philadelphia, through his attorney J. Hay Brown, esq., has entered a suit for slander against Barton Stauffer, of East Earl township. The affidavit filed sets forth that the de fendent has circulated reports affecting the character of the daughter of plaintiff whereby she has suffered \$10 000 damages.

He is still on a drunk and behaved in so disorderly manner on North Duke street yesterday afternoon that another warrant was issued for his arrest by Alderman Fordney.

Overcome by the thest

This morning a gentleman who is a member of the company which played "Lady Clare" last night, was overcome by the heat while waiting for a train at the Penusylvania depot. He was immediately carried into the gentlemen's room where he was carefully attended and was able to take the 10 o'cleak train for Harrisburg.

Patent " Glacier " Window Decoration.

The Most Perfect Substitute for Stained Glass

MANUFACTURED AT THE LINENHALL WORKS, BELFAST, IRELAND. MANUFACTURED AT THE LINENHALL WORKS, BELFAST, IRELAND.

This is a series of transparent designs, from the simplest to the most elaborate and complex, enabling any per son with a reasonable amount of taste and ingenuity to produce patterns on windows, having all the beauty of the real stained glass, at a very small cost. The advantages of this invention will be appreciated when it is considered that so many win lows have a disagreeable outlook; which can now, by means of the Patent Decoration, be shut out from view, and the beauty of the interior enhanced, while the labor of affixing the design is no more than a pleasant pastime and exercise of skill in which ladies and children can take part. In cases where no disagreeable view exists, there may be portions of the house where there is an access of light, and the covering of part of the glass with these designs will be found to be an improvement. Windows on stair landings are particularly good subjects for treatment by the "Glacter" Decoration; while almost all windows, in whatever position, will be improved in appearage by having a portion of the glass at top or sides covered with suita ble designs. Unlike many things invented for the purpose of window decoration, this cannot be rubbed off the window or defaced by cleaning.
