WASIT A TRAGEDY.

amentable Death of Two Young Ladies and the Narrow Escape of the Third

the Third

[Cineinnati Commercial Gazetts]

Not long ago a mother and caughter called at the office of a prominent New York physician. The young lady was fair of face, graceful of form, with a complexion indicating health, and yet her mother said there was every indication to her that she was the prey of some myst-rious disorder. At her request the physician made a searching examination nothing was discovered. At the importanties of the mother, another physician was called in and another examination made with the same result.

In less than three months the young lady was deal.

was dead.
In the same city another prominent physician was visited recently by a young lady of attractive a dress, refined manners and win-

attractive a idress, reflued manners and winsome appearance.

She had scarcely stated her care when her
lips quivered, her face pated, her arms dropped to her side, and sne was dead.

Sile died alone with her physician, and gossips made high scandal, but a poet mortem
examination showed that her death was
caused by a convulsion, and the voice of
slander was hushed. These are facts which
can be substantiated it need.

Medical science does not tell us all we ought
to know. It is small satisfaction for us that
death must lay our irlends low before we can
find out the nature of their diseases. Life is
a great mystery; and it is a sad commentary
on present human attainments that death is
the only key which in many cases can unlock

a great mystery; and it is a sad commentary on present human attainments that death is the only key which in many cases can unlock the depths of this mystery.

There is something it ore to be dreated than chosera, more to be leared than consumption, which is preying upon the health of our young people, because, unlike them, its approach is insidious, and we know of its presence only by the death it brings. Mr. Charles E Stephens, the well known exporter at 123 Third street, Louisville, Ky., had an experience somewhat similar to the mother whose case is above related. His daughter, when but nine years of age, seem d suddenly to droop. She was exceedingly languid, was frequently prostrated with headaches and nervous depre-slop, and the feeling of extreme fatigue grew upon her constantly. She could scarcely breaths; could retain nothing on her stomach, she bloated so that she measured 5 inches around the waist, and it seemed that she would go mad with agony. Every month she got worse and worse and fually, as death seemed to be obtaining the mastery, in alarm her case and treatment were telegraphed to a prominent New York specialist, who after due deliberation wired back that everything possible had been done and that she could not recover. In three months from that time however, she began to amend and in a few weeks was clothed with health and in her right mind.

In the first case mantioned, death was caused by what is called bright's disease of the kidneys, in the second it was found that uremic blood poisoning, caused by the same disease, produced the fatal convulsion, and in the third case death was threatened by the same disease, produced the fatal convulsion, and in the third case death was threatened by the same disease, produced the fatal convulsion, and in the third case death was threatened by the same disease, produced the fatal convulsion, and in the third case death was a verted, when every other means failed, by warner's safe cure. It is evident that medical men do not know everything, and yet how str

THE TOBACCO MARKET.

GROWERS NOW BUSILY STRIPPING.

Domplaint of Local Dealers Against the Ha-Vana—Advise to Farmers in Regard to Assorting—The Markets Very Dull.

The past week has been a busy one with tobacco growers. The continued wet weather gave them an opportunity to take from the poles a portion of their '84 crop, and a great majority of them took advantage of the favorable weather, and for several days past have been stripping and preparing their leaf for market.

From interviews had with many growers, we learn that the Havana seed leaf is clean and fine and of good color, especially that which was cut early in the season. A few growers acknowledge that there is some "white vein" amongst the plants that were cut late, during the

plants that were out late, during the very hot weather of September. The tobacco then cut dried too rapidly and did not cure properly. The same complaint holds good against the native seed leaf.

Dealers, as usual at this time of year, shake their heads ominously and say they don't want to buy, because trade is dull, the market is overstocked with unsalable goods, Sumatra leaf is in demand and is

oming in in great quantities at low duties, etc., etc. And although the dealers a year ago were unanimous in advising our farmers to grow nothing but Havana seed, and to prove that they meant what they said bought up the small quantity then grown, at high prices, they now say that while the '83 Havana seed was very pretty and promised well, it has not sweated well, but comes out of the cases in much well, but comes out of the cases in much the same condition it was when cased a year ago. And they fear the '84 crop will do no better, perhaps not so well on account of the terribly hot weather prevailing when it was cut. So they say; but farmers will do well not to place too much reliance on the unfavorable opinion of the dealers. Tobacco seldom looks well in their eyes until they have bought it. Let the farmers carefully strip and assort their crops into proper grades, and they will be apt to get for them all they are worth before next planting time comes around. The season is early as yet, and trade will brighten up before the winter is

trade will brighten up before the winter is over.
Following are the only sales of old tobacco that we have heard of:
Of the crops of 1881 and 1882 about 150
cases, and of the crop of 1888 over 300
cases. Only a few dealers are in the
market. Many of them are in the West gathering up the crops of '83 and '84 Wiscousin, which are said to offer favor-

able inducements for investment. THE NEW YORK MARKET. The Tobacco Leaf sums up New York narket this: Western Leaf-This department is well

western Leat—This department is well covered by the monthly circulars of our friends. The reported sales for the week included a few hogsheads for Italy.

Virginia Leaf—Very little doing in Virginia leaf the past week. A few bright cutters comprised the sales. Manufacturers are not disposed to buy until after the holidays.

Spanish—Havana fillers sell but very

moderately; 800 bales changed hands at from 80 to \$1.15. Sumatra-200 bales comprise the sales,

rices varying from \$1,30 to \$1,65. being hurried the past week, and we have heard of no transactions beyond the usual retail demand. There is a determined effort among the jobbers to get rid of old storekeepers before the end of the year and then start afresh. It seems to be slow work, but it will be partially successful. Prices for goods from reliable manufacturers continue firm, and we see no reason for any further concession for some time particularly to reliable black goods for export. Black wrappers appear to be very scarce and high. The exports were 256,045 pounds.

Smoking-Average weekly inquiry reported. Cigars-Demand fair, but lacking in

SALES OF SEED LEAF IN NEW YORK IN The month of November closed with reported sales in this city of 3 805 cases, against 7,052 cases in October. In detail the business of the month was as

 TOBACCO MANUFACTURE IN NEW TORK CITY IN

SECOND DISTRICT NEW YORK. THIRD DISTRICT, NEW YORK. .

remember the similar returns for this city in the month of October. What with the loss of one day and the excitement incident to the presidential election the manufactures of tobacco here exhibit the very noticable decrease. But, on the other hand, business in all branches of trade was very light, and for the same reasons, during the past month.
