FUTURE RETRIBUTION.

Unitarian View of the Punishment Tim

One of the great defects of the "evangelical" m of administering rewards and punish any go to heaven who ought to go to hell, nd the reason of this is that orthodoxy does rilest criminal who repents on the scaf-sufficiently to "believe in the atoning bliss. But the honorable and worthy on the sweet and holy woman, the con ut accepting the dogma of the ng blood," are as illogically consigned nal woe. There is something fundally wrong in a system which rewards nd Orthodoxy will be obliged to meet this serited and unanswerable reproach until it xepts salvation by character instead of sal-

pts salvation by character instead of salon by dogma.

lough we utterly repudiate Dr. Shedd's
as a solid arraignment of the divine juslet it not be inferred, as is too often done,
we do not believe in future retribu. On the contrary, we hold that future
ibution is as necessary to vindicate the
al order of the world as future happiness,
this future retribution we consider not
arbitrary infliction or penalty, but simat this future retribution we consider not an arbitrary infliction or penalty, but sim-y as an inevitable moral consequence of il motive and action. Men enter the next e, we hold, with precisely the character at they have fashioned here. This fact fur-shes one of the strongest motives for the velopment of character, as it should also mind us of the terrible consequences, here d hereafter, which may follow moral de-doration. To believe in a future retribu-m which is corrective and reformatory is on which is corrective and reformatory is te thing; to believe in endless punishment hich is neither corrective nor reformatory vastly different. The first view honors the oral law of the universe; the second con-adicts justice, and proclaims the eternal ruelty of God.

For the last three months a great many people have been housed up, because they have not felt able to withstand the stormy wintry weather that has prevailed. But unfortunately the con-finement and close air of modern houses during the winter season, is very enervating, and the system needs help to enable all the organs to do their proper work.
