REVISED FRUIT-LIST.

SOME SUGGESTIONS TO THE HORTICUL TURISTS FOR THE SPRING OF 1885.

the "Germantown Telegraph's " Advice to the Tree Planters and Fruit Growers-The Standard Apples, Pears, Peaches, Ounces and Small Fruit.

Our regularly published list is always more or less slightly changed, for sufficient reasons, either in taking from or adding to it ; but in regard to the list as a whole, we can see no just grounds for disturbing it, though we do not hesitate to do so whenever there are new things strongly recommended to us and sustained by the best authority. Indeed, we do not see how it can be improved for his section of country, or as a general list for all the Middle states. And this is the opiniou of a number of fruit-growers who sittlefsed it, or from whom we have heard. some of each of the separate selections may not do well upon one premises that will suc ceed admirably on another, even if separated by only a single form or a line-feace. Hence, each grower must find out for himself the particular apples, pears, &c., especially adapted to his soil and location. This can be easily done by inquiries of those who within a reasonable circuit are successful fruitgrowers and whose soil is somewhat similar

to his own. According to our present preference, we should select the following for our own plant-ing, nearly all of which we have grown more or less successfully :

STANDARD PEARS.

L Giffard ; 2. Dovenne d'Ete ; 3. Early Catharine ; 4. Bloodgood ; 5. Summer Juli enne ; 6. Tyson ; 7. Brandwine ; 8. Bartlett ; & Belle Lucrative ; 10, Manning's Elizabeth H. Seekel ; 12. Howell ; 13. Anjou ; 14. Shel-den ; 15. Lawrence ; 16. Reading ; 17. Kieffer.

den ; 15. Lawrence ; 16. Reading ; 17. Kieffer, For those who may desire a smaller num-ber, we should select : L Giffard ; 2. Early Catharme; 3. Bloodgood: 4. Tyson; 5. Bart-lett; 5. Belle Lucrative ; 7. Seckel ; 8. Law-rence; 9. Reading; 10. Kieffer. They ripen in about the order they are arranged, except as to the three latter. The Lawrence, which begins to ripen, or can be made to ripen early in November, will keep until April with in November, will keep until April with care, it being the only winter pear which with us keeps beyond February. In the above list from No. 1 to 7, are sum-

mer varieties; from 8 to 14 autumn (early and late); and 15, 16 and 17 winter, thus af-fording a sufficient number for each of the periods of the best known sorts for this re-

OWARF PEARS.

1. St. Michael d'Archange ; 2. Bartlett ; 3. Comice ; 4. Diel ; 5. Tyson ; 6. Belle Lucrative ; 7. Lawrence ; 8. Ott ; 9. Louise Bonne 10. Bose; 11. Boussock ; 12. Glout Moreeau. We have dropped the Rosteizer as not being generally sufficiently productive.

L Maiden's Blush; 2. Baldwin; 3. Sinoke-house; 4. Northern Spy; 5. Smith's Cider; 6. Falawater; 7. Cornell's Fancy; 8. Red Astrachan; 9. Wagener; 10. Porter; 11. Gravenstein; 12. Tompkin's King; 13. Rox-bury Russet.

PEACHES.

L. Crawford's Early: 2. Hale's Early: 3. Troth's Early: 4. Old Mixon; 5. Crawford's Late: 6. Ward's Late; 7. Smock's Late; 7. Admirable, Late.

QUINCES.

There are several varieties of the quince, to wit: Orange, Champion, Rea's, Mammoth, and ball a dozen others, but we can safely recommend only the Orange. It is the one almost universally grown for market, and is all that any one can desire. We have uniformly cased splendid crops of it.

GRAPES. Telegraph; 2. Concord; 5. Hartlord; 4. Clinton; 5. Salem; 6. Rogers' No. 32; 7. Brighton; 8. Prentiss; 9. Pockington, The Prentiss is, so far, the best of all white

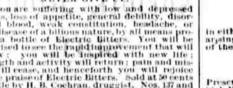

grapes. The Pocklington and Brighton the best out-door varieties. Clinton is expressly for wine. For a fewer varieties for family

ney-Wort can be relied on to bring back a healthy condition.

BRANDERTH'S PHAS preserve the vigor of

NEVER GIVE UP.

It leads the list as a truly scientific prepara-tion for all blood discusses. If there is a lurking SCROPULA stant of Scrorula about you, AYER'S SCROPULA SARSAPARILLA will dislodge it and purpose TREPARED BY Dr. J. C. Ayer & Co., Lowell, Mass. Sold by all Druggists. \$1, six bottles for \$5 DOES WONDERFUL CURES OF -AT-KIDNEY DISEASES -AND-Because it acts on the LIVER, BOWELS and KIDNEYS at the SAME TIME. Bocause it cleanses the system of the poisonous humors that develops in Kidney and Urinary Piseases, Billiousness, Jaundice, Constipation Piles, or in Rheumatism, Nuralgus, Nervous Dis orders and all Female Complaints. AP-SOLID PROOF OF THIS."SS CLEANSING THE BLOOD. Restoring the normal power to throw off dis-THOUSANDS OF CASES PERFECTLY CURED.; Also, Good Secon Burlington, Vt. Send stamp for Dairy Almanae of 1885. SICK DR. LESLIE'S

1. May Bigarreau; 2. Belle de Choisy; 3. Black Tartarian; 4. Black Eagle; 5. Black Hawk; 6. Elton; 7. Downer's Late; 5. Early Richmond; 9. Early Purple Guigne; 10. Del. Bleeding Heart. The ripening of the list will range from the order the block the state of the st

the earliest to the latest, thus carrying one through the whole cherry season. No one can go amiss in adopting this list, as it cannot be surpassed.

Cuthbert.

The "Cuthbert," a new variety, possesses all the evidence of being a raspberry of decided merit. It is of good size, excellent quality, the cane a strong grower, abundant bearer, and perfectly hardy without protec-tion, though we have always contended that notwithstanding how hardy a variety may be, it is more productive and the fruit of finer size by bring pruned in the fall and laid down and covered through the winter.

STRAWBERRIES.

New kinds of strawberries are constantly appearing, and we could, name half a dozen ; but thus far we know of no improvements on the foregoing, which, it will be seen, in-cludes the "James Vick," a variety of a sin-gle plant which was found beside an old barn, near Sedalia, Mo. by Jadge Samuel Miller, who, in a somewhat similar way, dis-covered a single plant of the famous straw-berry, "Captain Jack," and from a single one enough has been propagated to supply all the great demands for them. These are good enough until better turn up, which we shall not be slow in amouncing. CURBANTS.

CURBANTS.

1. Red Dutch; 2. Red Cherry; 3. Red Versailles; 4. White Grape, 5. Black Na-

GOOSEBERRIES.

1. Houghton : 2. Downing. These are the two best gooscherries grown in this country for general use, so far as we know. They bear every year heavy crops, and free from mildow, are of excellent qual-ity and are large enough for all practical pur-

uvate fruit and have to make purchases, should take this list with them to the nursery, and adhere to it as far as possible, ex-cept in special cases in which their own individual wishes may be better satisfied.

In selecting fruit-trees, or any others, be careful to choose those with smooth, healthy looking bark, have entirely shed the leaves, and have plenty of small fibrous roots. Trees on which the leaves remain after frost sets in, and the bary bar of the same in the same set. and stick to the branches in the spring, may be regarded as not healthy, and in some way lacking stamina.

Death in the Swallow Tail. From the Home Journal.

Evening dress, and especially swallow tall coats, are found to have a direct influence on the death rate. A fashionable physician tells me that the opening of the social season always sees a great increase in social season always sees a great increase in the number of his patients suffering with pul-inonary troubles. The fact that this increase is not due to the weather simply is shown by the other fact that with the beginning of Leni, when fashionable contertainments are moduled or given up altogether, the number of patients falls off and continues to grow smaller until Easter, when up it goes again. An operatic season is always, he says, a period of coughs, catarrh and in-cipient consumption. Swallow-tail coats and low-cut vests are not adapted to this climate. While the fashion of full dress lasts it will, of course, always have an army of followof course, always have an army of follow-ers, and there are some precautions that it will be well to observe. It is a good thing to have a heavy flannel or perforated buckskin chest protector, to be worn under the linen only when a swallow-tail is donned. It is good, too, to wear another outside the linen, so that it may be removed and put into an overceat pocket when one's destination is reached and readjusted on again going out of doors. Despite all pre-rantions, however,one might just as well un-derstand that a certain number of men must die of the swallow-tail every season.

A remarkable case of the failure of fidth cure has just terminated in Sycamore, Ills., in the death of the wife of A. W. Parry, a Free Methodist minister. The cause of the
