The Pleasure and Profit of Cultivating the Best Varieties-Timely Recommendations From a High Authority-The Proper

Variety of Beans and Cabbage,

From the Germantown Telegraph.

The most profitable portion of the farm is a well conducted vegetable garden. A good one should consist of two parts—one devoted chiefly to seed beds and the earliest vegetables requiring the most care and attention. condition in every respect, as it will be worked by manual labor exclusively and need not be very large. It should be in a sheltered locality, well drained and heavily manured with stable manure. The other manured with stable manure. The other division is simply a miniature farm or field, in which different crops are planted side by side, such as corn, beans, peas, potatoes, etc. These may be planted in parallel rows, suffi-ciently spart for cultivation with the horse

It is a difficult matter to name a list of vegetables that would be best adapted to all oils and conditions. The following varieties, however, are known from practical ex-perience to be reliable and to give satisfacory results under seasonably favorable cir-

Beans—Early Valentine for early, Refugee for late and pickling, Black Wax for snap, Large White Kiduey, Horticultural and Concord for shelling, of the pole varieties. The Large White Lima is excellent, but more difficult to cultivate. The Horticultural is excellent as a dry bean. Beets—The Dark Egyptian answers all

purposes.
Cabbage—Early Wakefied for early, Late Flat Dutch for late, and for the best at any time, Improved American Savoy,
Carrots—Early Horn for early use, and Long Orange for winter use.
Cauliflower—Extra Early Erfurt and Early Snowball for early, Algiers or Nonpariel for late.

Corn.—Early Marblehead or Early Narragansett for early, Triumph for Medium, Stowell's Evergreen for late. The supply of

Lettuce—Early Curled Simpson for earli-est, Black Seeded Butter for forcing and for spring. Salamander and Deacon are good

spring. Salamander and Deacon are good for summer use.

Melons,—Hackensack and Cassaba are two of a long list that are equally good. Of Watermelons, Phinney's and the Peerless are among good varieties.

Onions.—Yellow Globe, Danvers and Wethersfield Large Red. For early the Extra Early Red may be used.

Parsnips.—The Student is mildest; the Hollow Crown is good.

Parsnips.—The Student is mildest; the Hollow Crown is good.

Peas.—Varieties are almost innumerable, and many of them are good, but properly managed as to times of planting, etc., American Wonder and Champion of England would supply any ordinary demand.

Radishes.—White Turnip Rooted, Earliest Scarlet Eriurt and Olive Shaped.

Spinach.—Round Leaved for early; Long Standing for late spring.

Squash.—Perfect Gem and Summer Crookneck for summer; Hubbard for winter. There are new candidates for favor in this field whose merits still require being tested.

Tomatoes.—Little Gem is earliest, but is small; Livingstone's Perfection and May Flower have no superior.

Turnips.—Purple Top Strap Leaf, Yellow Aberdeen, American Improved Ruta-Baga. Very few farmers are found who have not their favorite varieties of vegetables, but sometimes a change will prove very satisfactory and of advantage to the grower, hence we furnish the above list.

Counsel for Farmer and Planter. In preparing to plant strawberries, take good land if you can get it; if not, take poor, and enrich it if you can. To make black raspberries self-supporting,

or not needing stakes, plant them at least four inches deep, instead of only an inch or two, and then they never blow over. The flow of milk may be arrested and very much impeded by harsh language, or kicking, or grounding of cows when in the stable. If the best results would be obtained by those who have stock in their charge, kindness to them must be observed. ness to them must be observed.

ness to them must be observed.

It is considered a good return for a common cow, giving four thousand pounds of milk in a year, to increase her butter yield by having her own milk fed back to her; in other words one hundred pounds of skim milk might be expected to add one pound to her yield of butter.

Half a pint of sunflower seeds given to a horse with his other food each morning and night will keep him in better health and better spirits than he will be without it, while his hair will be brighter. When a saddle horse is required to be resticularly sprightly he may be given a pint of sunflower seed with his oats at night, and half as much in the morning.

with his oats at night, and half as much in the morning.

Dr. W. S. D. Johnson, of Lewis county, Missouri, described as an experienced and eminent physician, as well as a large and successful stock raiser and farmer, says that in 1871 he came to Missouri with one hundred and eighteen head of hogs. Hog cholera set in and they commenced dying and helost in a little time ninety-seven head. He killed four and made very careful examinations and found them dying from the effects of other animals—animals within. He made an infusion of tobacco and gave it to the hogs in buttermilk and they stopped dying, and after that not a hog was lost from hog cholera. When the disease was suspected the tobacco infusion was given.

The Significance of "Arbor Day."

Moncure D. Conway. It is a great pleasure to think of the young people assembling to celecrate the planting trees, and connecting them with the names authors whose works are the farther and higher products of our dear old Mother Nature. An Oriental poet says of his hero:

"Sunshine was he in a wintry place, And in midsummer coolness and shade." And in midsummer coolness and shade."

Such are all true thinkers, and no truer monuments of them can exist than beautiful trees. Our word "book" is from the beech, tablets on which men used to write. Our word Bible is from the Greek for bark of a tree. Our word paper is from the tree papyrus—the tree which Emerson found the most interesting thing he saw in Sicily. Our word library is from the Latin liber, bark of a tree. Thus literature is traceable in the growth of trees, and was originally written on leaves and wooden tablets. The West responds to the East in associating great writers with groups of trees, and a grateful posterity will appreciate the poetry of this idea as well while it enjoys the shade and beauty which the schools are securing for it.

Politicians in Prime Luck.

Numerous political aspirants have been auxiously looking for an equitable division of official loaves and fishes to themselves since the inauguration, but those who struck genuine first-class luck are the ones that learned the unsurpassed merits of Durry's Purs Malr Wriary for the first time in their passage through Pattimore, to and from the great political Mecca. Besides being a perfect consolation for disappointed hopes, it is absolutely free from all inflammatory and exciting elements found in ordinary beverages, and is strongly endorsed by the best doctors, as a remedy for the prevalent diseases of pneumonia, diphtheria, malaria, and pulmonary complaints, Large bottles fi, at all drugglsts and grocers. druggists and grocers.

SPECIAL NOTICES.

Indigestion's Martyrs.

Half the diseases of the human family spring from a disordered stomach, and may be prevented by invigorating and toning that abused and neglected organ with Hostetter's Stomach Bitters. Let it be borne in mind that the liver, the kidneys, the intestines, the muscles, the ligaments, the bones, the nerves, the integuments, are all renewed and nourished by the blood, and that the digestive organs are the grand alembic in which the materials of the vital fluid are prepared. When the stomach fails to provide healthful nourishment for its dependencies, they necessarily suffer, and the ultimate result, if the evil is not arrested, will be chronic and probably fatal disease somewhere. It may developed in the kidneys in the form of diabetts, in the liver as congection, in the muscles as rheumatism, in the nerves as paralysis, in the integuments as scrofula. Remember, however, that each and all of these consequences of indigestion may be prevented by the timely regular use of that sovereign antidote to dyspepsia, flostetter's Stomach Bitters. William McKnew, 154 Payette St., Enkimore, Md., says: "I believe 'Favorite Remedy 'b a good medicine. It is doing me more good than anything I ever tried, and I have tried almost everything, for I am a sufferer from dyspepsia." While "Favorite Remedy " is a specific in Stomach and Bladder diseases, it is equally valuable in cases of billous disorders, Constipation of the Bowels, and all the class of ills apparently inseparable from the constitutions of women. april-Imeodaw

"ROUGH ON COUGHS," Ask for "Rough on Coughs," for Coughs, Colds, Sore Throat, Horseness, Troches, 15c.

All excitants, to radically cure, must be innocent. The art consists in continuing their use until matters in the system contrary to health are removed. Health finds happiness in the mere sense of existence.

Brandreth's Pills purify the blood so as to enable nature to throw off all morbid humors, and cure disease, no matter by what name it may be called.

The secret of recruiting the vital principle is discovered in Brandreth's Pills, because they remove what holds it in check. It is believed they possess the elements of vitality. Heat, healthy animal warmth, is certainly increased by the use of this wonderful medicine. Provided the organs are not irreparably injured, there is no discase Brandreth's Pills will not cure. The true art of healing is to assist nature to throw off disease—to concentrate, as it were, the whole vitality of the system to effect the enemy that has fastened on a part.

Get Brandreth's Pills! Be put off with none other! and follow the printed directions, and health will surely iollow you. The secret of recruiting the vital principle is

It is now about five years since 1 first began selling Ely's Cream Balm, and from the time of its first introduction there has been a growing demand for it, and so far as I can learn, it has given very great satisfaction to my customers. I consider it a catarrh remedy of genuine merit.

Thomas' Eelectric Oil cured me. I was also troubled with hoarseness, and Tho was' Eelectric Oil always relieved me. My wife and child had diphtheria, and Thomas' Eelectric Oil cured them, and if taken in time it will cure seven times out of ten. I am confident it is a cure for the most obstinate cold, or cough, and if any one will take a small teaspoon and half fill it with the Oil, and then place the end of the spoon in one nostril and draw the Oil out of the spoon into the head, by sniffing as hard as they can, until the Oil falls over into the throat, and practice it twice a week, I don't care how offensive their head may be, it will clean it out and cure their catarrh. For deafness and carache, it has done wonders to my certain knowledge, It is the only medicine dubbed patent medicine that I have ever felt like recommending, and I am very anxious to see it in every place, for I tell you that I would not be without it in my bouse for any consideration. I am now suffering with a pain like rheumatism in my right limb, and nothing relieves me like Thomas Eelectric Oil." Dr. E. F. Crane, Corry, Pa.
