

RECENTLY APPOINTED SECOND COMP. TROLLER OF THE TREASURY.

President Cleveland has appointed Isaac H. Maynard, of New York, to be second comptroller of the treasury, vice W. W. Upton, of Oregon, resigned by request. The office is worth five thousand dollars a year. General satisfaction is expressed with the appointment, which was conferred unsought. Isaac H. Maynard, now a resident of Delhi, Delaware county, New York, was born in the Empire state, at Bovina, Delaware county. April 9, 1838. He is of mixed English and Scotch stock. After careful proparatory

His first conspicuous public service was as a member of the New York assembly, in 1877, when he distinguished himself by his zeal against the liquor interest. After serving for a time as county judge, two years ago he was the Democratic candidate for secretary of state, and was defeated, it is said, because of his prohibition record. When his new appointment was given him, he was holding the office of first deputy attorney general of New York.

ON THE FARM.

Attention to Cultivated Crops-One of the Se crets of Snecess.

From the Germantown Telegraph. After the ground has been prepared, the fertilizer applied and the seed sown or planted with such crops as oats, rye, wheat, barley, buckwheat, etc., nothing turther remains to be done but watch the progress of growth until the time of harvest, when the gathering in must be performed; but not so with corn, otatoes, beans, sorghum and many other crops that are usually denominated cultivated crops. From the nature of these, in vated crops. From the nature of these, in order to secure satisfactory returns, they must be planted at such distances apart as will admit of the free passage of heat and light in order to secure proper development; but this will not be accomplished if the unoccupied space is allowed to be encroached upon by a dense growth of weeds. There is no special demand for any such growth, and yet willow taking growth of weeds. There is no special demand for any such growth, and yet without taking due precautions, in those sections of country that have, been cultivated for some time, weeds spring up so freely that in a little time they will exert a serious influence for evil. The reroody for this is found in proper attention to cultivation. The frequent disturbance of the soil by means of the cultivator, horse hose or hand hose prevents the growth of weeds, and not only that, it promotes the growth of the crop. It has been estimated that cultivation alone will add very much to the amount of the crop, which is much to the amount of the crop, which is probably a fact. At all events, we know of a field of corn that was hoed but once that gave but meagre returns when there was no other reason that could be given why the crop was not a heavy one. Do not slight labor connected with the cultivation of crops.

Planting Potatoes, From the Germantown Telegraph. Unavoidable conditions very frequently letermine the mode of planting potatoes. For a soil in which to plant, if good-sized smooth tubers are to be desired, we have never had anything better than that furnished by some old outlying pasture that is dry and inclined to sandy loam and that has not been under the plow for some years. Such fields are common in the older and New England

Or there may be some tract of natural mow-ing that has not been plowed for years, which is also good. Plow the sod a few days before desiring to plant, giving an opportunity to dry and giving the surface a thorough dress-ing of horse manure. We prefer horse manure to any other manure made up on the farm, for the reason by experiments made in connection with other kinds we have always found this to give the best results. Then use the harrow thoroughly, so that if possible the sod will be cut and torn in pieces and the manure thoroughly incorporated with the soil. Work in this direction cannot be too thorough, as it will tell in results. Our practice is to cut vill tell in results. Our practice is to cut the seed to two or three eyes and put one piece in each hill. When ready for planting we mark for the row with a horse plow to a depth of three or four inches below the gen-eral surface, making the rows about three feet apart and the hills from ten to twelve inches apart. In order to give a start it is sometimes desirable to use a little phosphate in the hill, which can best be applied with the fertilizer dropper. The seed can be cov-ered by horse power or very quickly by hand, and if proper attention is paid to culti-vation a good erop of excellent tubers may be expected.

Another Gun that West Off Unexpectedly. A sad shooting accident occurred at Kingson, Pa., Wednesday afternoon. Mrs. John Remmel was returning from a friend's funeral when she stopped in front of T. H. B. Lewis' residence to chat with Mrs. Lewis. She got down from her carriage and ap-proached the gate were Mrs. Lewis was standing. Arthur, a young son of Mrs. Lewis, aged seventeen, was standing in the yard with a refle in his hand. He pointed the weapon at refle in his hand. He pointed the weapon at a dog who was standing near Mrs. Rennnel, when the latter told him to be careful lest it should go off. Young Lewis said it was not loaded, and turned around to go back in the house. As he did so the hammer struck against a tree and the gun was discharged, the ball striking Mrs. Remmel in the forehead. She fell to the ground in a fainting condition and cried out that she was killed. She was carried into the house and doctors pronounced the wound fatal. Mrs. Remmel is a prominent member of the Presbyterian church, aged about forty-three, married and has three children. has three children.

Two Men Killed by a Train.

At Lawrence station, near Trenton, N. J. Wednesday morning, two unknown men were run over and killed by a train on the were run over and killed by a train on the Pennsylvania raitroad. Their remains were frightfully mangled and were taken to the morgue in that city. Both were apparently young men. One was well dressed and the other looked like a tramp. The name of the former it is supposed was Thomas Dillou, as a hatters' union card with that name was found in a memorandum book which lay near the mangled bodies. This makes six men who have been run over and killed on the railroad here inside of a month. railroad here inside of a month.

Death at the Rope's End.

Wilson J. Dorward, driver of the Philadelohia & Reading express at Slatington, Pa., ommitted suicide Wednesday morning, by anging. He was found in the stable where hanging. He was found in the stable where the team is kept and while the body was still warm, but life was extinct. The only cause which can be assigned is the fact that he lately purchased the express team, and being unable to dispose of it he became dispendent. He was in comfortable circumstances, having \$1,000 on degest in the local bank. Dorward bore a good reputation and was unmarried. He was 23 years of age.

A TRUE STORY. "Where is the baby, grandmama?"
The sweet young mother calls
From her work in the cosy kitchen,
With its dainty whitewashed wall.
And grandma leaves her knitting,
And looks for her all around;
But not a trace of baby dear

No sound of its merry prattle, No gleam of its sunny hair, No jatter of tiny footsteps. No sign of it anywhere. All through house and garden

all through house and garden, For put into the field, They search each nook and corner, But nothing is revealed.

And the mother's face grew pallid; Grandmann's eyes grew dim; The father's gone to the village; No use to look for him. And the baby buil! "Where's Rover!" The mother chanced to think Of the old well in the orelard Where the cattle used to drink.

Where's llover † I know he'd find her ;
"Hover!" In vain they call,
Then hurry away to 'De orobard;
And there by the moss-grown wall,
Nume to the well, lies hover,
Holding to buby's dress,
Who was leauing over the well's edge
In perfect fearlessness.

In perfect fearlessness.

She stretched her little arms down,
But Rover held her fast.
And never seemed to mind the kicks
The tiny bare feet cast
So spitefully upon him,
But warged his tall instead,
To greet the frightened searchers,
While naughty baby said;—

"Dere's a 'ittle diri in the ater; She's dust as big as me; Mamma, I want to belp her out, And take her home to tea, But Rover, he won't leb me, And I don't love him. Go Away, you naughty Rover! Oh! why are you crying so?" The mother kissed ber, saying : "My darling, understand,

And see, he licks your hand! Kiss Rover!" Baby struck him. But grandma understood; she said. "It's hard to thank the friend Who thwarts us for our good."

Good Rover saved your life, my dear-

SPECIAL NOTICES.

The Preventive of a Terrible Disease, No disorders, excepting the most deadly forms of lung disease, involve such a tremendous de struction of organic tissue as those which faster upon the kidney. Such maladies, when they become chronic—and none are so Bable to assume that phase—completely wreck the system. To prevent this terrible disease, recourse should be had, upon the first manifestation of trouble, to Hostetter's Stomach Bitters which experience has proved to be highly effective as a means of imparting tone and regularity to the organs of urination, as well as to the liver, stomach and lowels. Another beneficial result of this medicinc, naturally consequent upon its diuretic ac-tion, is the elimination from the blood of impurties which beget rheumatism, neuralgia, gout dropsy and other maladies. By increasing the activity of the kidneys, it augments the depurative efficiency of these organs, which are most important outlets for the escape of such impuri-ties. jet-10

There is no use fighting nature. Dr. Kennedy's Favorite Remedy does nothing of that kind. It loes not make the sufferers who trust it worse under the pretense of doing them good. It acts tenderly and in sympathy with what Nature herself is trying to accomplish. Do you have trouble with your digestion, your liver or your kidneys ? Does rheumatism pain and rack you? s your head thick and heavy? It will charm away these ailments almost ere you are aware (1)myll-lmdcod&w

MAYORITE REMEDY.

Amputation of the Le.

Money is the universal necessity, an some but a cynic or a fool will affect to dear etc. Mr. Abram Ellsworth, of Port Ewen, U er county, N. Y., had realized this truth. I disease in voived the whole of his thigh, se, and the suffering man looked forward, without apparent reason, to death as hi only deliverer. The family physicians refused a amputate the limb, asserting that the operates would kill the patient on the spot. Dr. De dKENNEDY, of Rondout, N. Y., who was consisted, held a different opinion and amputated the limb. The Doctor then administered freely his great lilood Specific FAVORITE REMEDY to afford tone and strength to the system and prevent the return of the disease, and Mr. Ellsworth remains to this day in the bloom of health. This gentleman's disease was the off pring of foul blood, and Kennedy's FAVORITE REMEDY purified the blood and restored to him the power once more to enjoy his life.
