Fourth of July in the Borough.

Fourth of July was quietly observed in clumbis by its citizens. The small boys ere in their glory and during the day the e of fire crackers and the firing of pistols d continually be heard. The customcould continually be heard. The custom-ary displays of fireworks in the evening was omitted this year and nothing of any unusual nature was celebrated by Columbia as a whole. During the day the streets were filled with strangers bent upon having fun, but they came to the wrong place to have it. Several Columbia parties spent the day at York Furnace, Chickies Rock and McCall's Ferry and had a quiet but enjoyable Fourth. Vary few drunken persons were seen upon the streets which, considering the number of people in town, was something very unus-ial.

SLIGHT ACCIDENTS. The usual Fourth of July accidents have again occurred as the result of fooling with Charles Smedley was wounded in his right

d while celebrating the Fourth by shoot-

ing off a pistol.

By the premature discharge of a pistol Harry Courtney received an ugly wound in his left hand from a wad striking the hand. Dr. Markle attended him.

Frank Kauffman also received the contents of a pistol in his left hand which was held in the hand of a companion. Dr. Taylor attended the lad, whose wound is somewhat serious.

John Dean was firing off a cannon and received the discharge of one of the loads full in his face. The boy thought the fuse had gone out and had gone to ignite a fresh one when the cannon exploded, the powder striking him in the face, making a very painful burn. Dr. Hinkle has removed some of the powder, and is of the opinion that nothing will result from the injury.

Patent for Improvement in Brick Machines. A patent, No. 320,944, dated June 30th, 1885, has been issued to Mr. Henry Martin, A patent, No. 32,974, uated June 30th, 1885, has been issued to Mr. Henry Martin, of this city, for an improvement in brick machines. The object of the improvement is to prevent the clay from working up about the edges of the top plate of the plunger as it descends into the chamber to force the clay into the moulds. This is accomplished by fixing a curtain against the back of the chamber by means of metallic straps, which act as hinges permitting the lower end of the curtain, which is free to be forced outward, flush against the plate by the clay, which it scrapes from the back of the plate. It packs between the curtain and the back of the chamber, and by filling bars engaging with the ends of the plate by means of grooves sufficiently deep to allow of considerable play, having the lower inner edges beveled so that the pressure of the clay as the plunger descends forces tham outward against the sides of the chamber. This patent was secured by Wm. R. Gerhart, solicitor of patents, of this city.

"O, Lor' Hit 'Im Again ! In the early days of Methodism in Scotland, a certain congregation, where there was but one rich man, desired to build a new chapel. A church meeting was held. The old rich Scotch-man rose and said: "Brethren, we dinna need a new chapel; I'll give £5 for repairs." Just then a bit of plaster falling from the cell-Just then a bit of plaster falling from the cell-ing hit him on the head. Looking up and seeing how bad it was, he aid: "Brethren, it's worse than I thought; I'll make it 50 pun'."

"Oh, Lord," exclaimed a devoted brother on sack seat. "hit 'im again!" back seat. "hit'im again!"

There are many human tabernacles which are in sore need of radical building over, but we putter and fuss and repair in spots without satisfactory results. It is only when we are personally slarmed at the real danger that we act independently and do the right thing. Then it is that we most keenly regret because we did not sooner use our own judgment, follow the advice born of the experience of others, and jump away from our perils.

Thousands of persons who will read this paragraph are in abject misery to-day, when they might be in a satisfactory condition. They are weak, lifeless, full of old aches and pains, and every year they know they are getting worse

weak, lifeless, full of old aches and pains, and every year they know they are getting worse even though the best doctors are patching them in spots. The origin of these aches and pains is the kidneys and liver, and if they would build these all over new with Warner's safe cure as millions have done, and cease investing their money in miserably unsuccessful patchwork, they would be well and happy and would bless the day when the Lord "hit 'em" and indicated the common sense course for them to pursue.—
