FARM AND GARDEN.

Timely Hints for the Husbandman and Hor-

From the Germantown Telegraph. Trees whose roots seek water should never be allowed near the drains. The roots entering the pipes choke them. The willow has been known to travel one hundred feet to enter a well.

One of the most successful of Illinois dairymen keeps one hundred cows, but never raises a pound of hay. He feeds his cattle corn fooder cut when in blossom, bound and set up till cured, or till winter, when it is removed to the barn. He gets seven tons of this dry fodder to the acre, and claims it is worth as much as the best of hay.

If posts are bored with a few holes from one foot above the ground line and downward, and filled with crude petroleum, the wood will be saturated and decay retarded. Then paint, just before setting, from one foot above the ground line downward, with a thick of raw linseed oil and lampblack or finely pulverized charcoal. Sound posts will remain intact for years after; posts not

treated are decayed. A New York farmer who has been testing Holsteins as milkers states that in a herd of twelve the highest yield was twenty pounds, and the lowest fourteen pounds of butter. The daily yield of five of them was over three pounds for the highest, and two and half for the lowest. He thinks the Holsteins can be made to rival the Jerseys in production of butter, while for milk, butter and beef combined, they are superior to all other

As a general thing the summer season As a general thing the summer season through horses can do more work than oxen for this reason, if no other—they can stand the heat better. Both are important on a large farm, and if the oxen is found to be worth the most when age suspends labor, the borse will have made up the difference by the celerity of his movements, and the more diversibled uses for which his laber has been available. Both are good in their places, and no extensive larmer is properly equipped for business who is destitute of

There is no season of the year when the armer bends all his energies to the accomplishment of one purpose as is the case during the securing of the hay crop. With all the modern appliances to aid in this work, it is laborious still and severely taxes the physical energies. That the hay may be secured in good condition is the carnest desire of every farmer, since upon this largely depends the successful wintering of the aninals upon the farm, and so undivided attention is paid to this harvest. But while the farmer is thus putting forth his efforts in this direction, it sometimes seems as though Nature was putting forth her best efforts in other directions, and the garden, the root crops, etc., will often show sad evidence of

neglect.

As the garden, onion or carrot patch are visited on the completion of haying, which may not have occupied more than two weeks, the remark is common, "it beats all how the weeds have grown; this ground was entirely clean when I commenced laying." entirely clean when I commenced laying. There seems to be no condition in Nature adverse to the growth of weeds. While it may too wet or too dry for ordinary crops to grow successfully, we have never been able to discover a time too hot or too dry for weeds to grow. We know the advice given is prevent their seeding and thus seems. is, prevent their seeding and thus secure eradication. That is excellent in theory, but in practice so far as we know has never proved successful. It is probable that so long as man tills the soil weeds will continue to grow, and if one or another appear to be annihilated there are always some newannihilated there are always some new-comers to take their places. If the farmer can succeed in coupling their growth within reasonable limits, he ought to be thankful.

Kindness to Horses. The value of our noblest animal, the horse, depends much more upon kind treatment than is supposed. If we go upon our busiest streets in cities, or upon the most traveled road in the country, we shall soon see such treatment of this faithful servant as shows how utterly ignorant many of the drivers are of his nature and how to best profit by his labor. They have no more comprehension of the horse than to suppose that his best effort can only be obtained by the whip. In this respect the horse is much wiser than his driver. One who has studied this animal can see at once that the horse only makes a pre-tense of doing his best. He knows he is abused, and takes his own way to get even with the ignorant, brutal driver. The horse is capable of strong attachment, and will always do his best for the driver that has gained his confidence by kindness. The whip is seldom used by such a driver. His word is all his horses peed. Belly ward in word is all his horses need. Balky and unreliable horses are nearly always made so by bad and vicious drivers. We have owned horses that would draw the last pound for a kind driver, but who would not draw the empty wagon for one who had abused them.

Wherever Malaria Exists, The bilious are its certain prey. In intermittent and remittent fever, dumb ague and ague cake, the liver is always seriously affected, and the blood contaminated with bile. One of the chief reasons why Hostetter's Stomach Bitters is such a sure defense against chills and fever and every form of malarial disease, is, that it does away with liability to the disease by reforming irregularity of the billary organ in ad-vance of the arrival of the season when the disease is prevalent. There is no finer fortifying preparative for those about visiting or emigrating to a locality where the Miasma-taint ex ists. There is no certain immunity from dis ease in an endemic or epidemic form, to be se-cured by the use of the average tonics and anti-spasmodies. But where quinine fails the Bitters succeeds both in preventing and curing. More-over, it removes every vestige of dyspepsia and overcomes constipation, theumatism, inactivity of the kidneys and bladder, and tranquilizes ad strengthens the nervous system.

SPECIAL NOTICES.

Persons Who are Past Fifty will find Dr. Ken nedy's Favorite Remedy just about the medi-cine they need when they need a medicine at all. The ten years which follow that age are full of dangers which do not threaten younger men and women. This preparation gives tone to the system, greatly expels impurities and prevents the outcropping of diseases the seeds of which may have been sown in earlier life. Why not live out all your days in health and strength.

Mothers! Mothers!! Mothers!!! Are you disturbed at night and broken of you rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOUTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. A Baptist Minister's Experience.

"I am a Baptist minister, and before I ever thought of being a clergyman I graduated in medicine, but left a lucrative practice for my present profession, forty years ago. I was for many years a sufferer from quinsy. Thomas' Eclectric Oil cured me. I was also troubled with hoarseness, and Thomas' Eclectric Oil always relieved me. My wife and child had diphtheria, and Thomas' Eclectric Oil cured them, and if taken in time it will cure seven times out of ten. I am confident it is a cure for the most obstinate cold, or cough, and if any one will take a small teaspoon and half fill it with the Oil, and then place the end of the spoon in one nostril and draw the Oil out of the spoon into the head, by sniffing as hard as they can, until the Oil falls over into the throat, and practice it wice a week, I don't care how offensive their head may be, It will clean it out and cure their catarrh. For deafness and earache, it has done wonders to my certain knowledge. It is the only medicine dubbed patent medicine that I have ever felt like recommending, and I am very anxious to see it in every place, for I tell you that I would not be without it in my house for any consideration. I am now suffering with a pain like rheumatism in my right limb, and nothing relieves me like Thomas' Eclectric Oil." Dr. E. F. Crane, Corry, Pa.
