#### GAUSE TWO WANDERERS TO TELL OF THRIR STRANGE LIFE.

Their Little Girl Finally Admits That She Die Not Tell The Truth-The Capture of B. Frank Baylor-Latest Notes About Town.

Regular Correspondence of the INTRLUCENCER. COLUMNIA, Pa, Aug. 18.—The upper end of town was greatly excited yesterday after-noon by a story told to a number of persons living in that vicinity of what was supposed to be a genuine case of kidnapping. Soveral residents of that neighborhood had their sympathies aroused by a young girl from 12 to 14 years of age, who told them that she had been kidnapped from her home in Har-risburg by a man and woman who had been leading a nomadie life in this section of the state. The story was brought to the notice state. The story was brought to the notice of 'Squire Young, who deputized Joseph McFalls as a special officer to make the arest, as the town constables were in Lancas. ter attending court duties. The man and woman were arrested and about five o'clock last evening were given a hearing at the oftice of 'Squire Young. The woman told the following story : Several years ago she was living in Rohrerstown and was then be-trayed by a man named Miller, and the trayed by a man named Miller, and the girl who said she was kidnapped was born. After the birth of the girl the woman was married to Miller, who was kilded on the rail-road after a few years of married life. After a short duration of mourning the widow married a man named Wren, with whom she is still living. The couple possess a horse and wagon and tent, and live in a manner kee gypsies. The story told by the girl was almost the same as to the later facts as the woman, and she admitted that the woman was her lawful mother, and that the story of didapping was concocted by her in a mo-mest of anger. No evidence could be pro-duced against the couple, and they were re-leved by the 'squire. B. Frack Sylor Arrested at Last. The efforts of the constables of Washington

### TEACHERS FOR THE PRIMARIES.

## Prof. Buchrie's Suggestion of the Importance

of Efficent Instructors. cares when Pittsburg Leader.

Prof. Buehrle, city superintendent of the ancaster, Pa., public schools, has called atention in his last monthly report to a subject of the greatest interest-the importance of securing good teachers in the primary hools, and of keeping them there. He leclares that he knows "of no good reaon why all the the beginners in teaching should be obliged to experiment on the youngest, the most impressible, and youngest, the most impressible, and hence the most easily and the most hast-ingly injured pupils." This will strike the conscientious parent and the experienced educator as a very forcible way of preventing a grave error that is only too prevalent. Superintendent Buehrle condemns the pernicious practice of not only putting beginners in instruction into the primary schools, but "as soon as they show supe-rior qualifications as teachers replacing them by such as have no experience, thus rior qualifications as teachers replacing them by such as have no experience, thus condemning these schools to be taught either by the inefficient or by the inexperi-enced." A crying evil in the public schools is the too irequent changes made in the text books, more especially because outside of the injury they necessarily work in retard-ing the progress of the pupil, such charges are rarely free from jobbery, and never from the suspicion of jobbery. But the greater evil in the present school system is the frequent substitution of tyros for experienced teachers in the primary grades. As Prof. Buchrie wisely contends superintendents, directors and others inter-ested in securing the best results, when they get the right teacher in the right place, get the right teacher in the right place should keep him or her there and pay his or her worth, regardless of an arbitrary, an ar-tificial, a false and injurious standard which graduates salaries and assigns teachers irre spective of special aptitude and merit.
