INDESTRUCTIBLE GRAINING.

No CRACKING, NO PEELING, NO BLISTER-ING.

We have a system of graining New wood that must, in the near future, take the place of the old system on all new work, its merits being as follows: Total jabolition of a painted groundwork, speed and cleanliness in working it, beauty and transparency of finish, smoothness and durability, and the capability of receiving as high finish as hard wood by the same methods. This process is the nearest approach to natural wood that has yet been discovered. Call and see samples.
