#### THE RESULT OF THE TEST. The Clapp & Jones Fire Engine Fails to Come

As stated in Friday's INTELLIGENCER, the new Clapp & Jones engine, No. 2, was given near the public schools, where a stream of 185 feet was thrown through an inch and a quarter nozzle. As the water main was med too small to furnish a sufficient supply of water, the engine was taken across Conestoga bridge at Graeff's Landing where it played alongside the bridge, but the wind was so high that the stream could

The engine was next taken to the plug corner of Lime and Orange streets, where it received water from the 20-inch main. A stream was thrown through an inch and a quarter nozzie 214 feet, the spray being thrown 10 or 12 feet further. One thousand feet of hose was then laid and a stream of 116 feet thrown through an inch and a quarter de, the steam pressure being 130 pounds the water pressure 220.

worked well but failed to throw water the distance guaranteed by the builders. Chief Engineer Vondersmith will write to Mr. Clapp to come on and give the

engine a trial.

In the meantime if the Union engine is as good as it is represented to be, it might not be amiss to rent or buy it. Exclusive of the Clapp & Jones engine, there are but two in the department fit for service.

Notes From the Yeates Institute,

Several of the pupils at the Yeates institute have organized a chapter of the Agassiz secciation, a scientific club with headquarters at Lenox, Mass, and meet regularly for entific instruction and discussion. Several interesting papers have been prepared by the d read at the weekly meetings. Master John Eby has one on the iron ores of Lancaster county, and Master Benj. Atlee on our native peat that would be creditable to "boys of a larger growth." Each furnished specimens of his own collecting to illustrate his subject. The head master has given the association a very good geological cabinet and many rare fossils, and W. U. Heusel has

given to the library about 20 volumes of the state geological survey reports. The trustees, ever mindful of the requirements of the present day, have just added a fine gymnasium to the school. It is amply supplied with dumb bells, clubs, boxing-gloves, bars, lifting-machines, and all apar-atus usually found in a first-class gymnasium.

Heavy Receipts of Tobacco The receipts of tobacco at the city warehouses were larger to-day than they have been any preceding day this season. Some of the growers left with their loaded wagons last night, arriving at the warehouses long before daybreak, and thus being able to unload early. From daybreak until noon Charlotte street, Harrisburg avenue and Tobacco avenue were lined a square or two with wagons awaiting their turn to unload, and many of them had to wait till late in the afternoon before their turn came. The banks at which the accounts of the growers and buyers are settled have been very busy all day, and the bankors say they will have to work late to clear their desks. As we said a week ago, and several times previously, the crop of 1886 is guing to be lifted rapidly, and those who want any of it had better pitch in before it is too late.
