

Intelligencer. EVERY EVENING IN THE YEAR... THE INTELLIGENCER, (EIGHT PAGES.) Published Every Wednesday Morning, Two Dollars a Year in Advance.

The Lancaster Intelligencer.

LANCASTER, APRIL 12, 1886.

The Bituminous Coal Strike. The continued cessation of the mining of bituminous coal will have a permanent effect in crippling that industry. It works directly to the benefit of the anthracite region. A year ago bituminous coal was largely substituted for anthracite by manufacturers who found it cheaper at prices then prevailing.

None need complain in life of having nothing to do. Medical authorities in Philadelphia are giving their energies to the question whether Desdemona, Shakespeare's said heroine, died by stabbing or by strangulation.

Consoling to American Farmers. American farmers who are disposed to complain should read how their brethren in England and Ireland get along as tillers of the soil. An English farmer, industrious and a good manager, resident in North Lincolnshire, gives his experience for the past ten years.

The Reading Times appears this morning in new type and enlarged. It is now a 32-column paper, and the subscription price has been lowered to ten cents a week. It is on the move.

A Good Man Gone. John Welsh, who died in Philadelphia on Saturday, had attained honorable and high distinction before his career was crowned with the appointment to represent his country in its first diplomatic position.

John Welsh, who died in Philadelphia on Saturday, had attained honorable and high distinction before his career was crowned with the appointment to represent his country in its first diplomatic position.

APPLE TREES IN LOVE.

Henry Ward Beecher has written a charming little book on the subject of love. It makes no difference that you have seen forty or fifty springs; each one is as new, every process as fresh, and the charms as fascinating, as if you had never witnessed a single one.

The experiments made with natural gas for puddling purposes at Beaver Falls, Pa., show that this new fuel works six times as rapidly as coke. And the end of its possibilities is not yet in sight.

It is a notable evidence how the idea of denominational education is growing in this country when such a practical Calvinist and Unitarian as Prof. Silliman, of Cornell College, puts himself on record in these words: "No nation was ever saved by its intelligence. We must have virtue."

EDITOR PULITZER, who has made the New York Herald such a conspicuously successful newspaper, resigns his seat in the federal House of Representatives, considering it vain to attempt to be successful simultaneously in the two important functions of journalist and legislator.

It has been alleged by a correspondent of the Philadelphia Press, concerning "Spiritual Poets" that he "never heard that Charles Sumner, long-suffering or the other Christian graces were considered at all."

CHARLES W. COOPER, cashier of the Allentown National bank since 1852, and its president since May last, died Sunday evening in Allentown, aged 60 years.

CARDINAL MANNING has expressed himself in opposition to the Vatican action in stone's bill which excludes Irish representatives from sitting at Westminster.

JOHN B. LENO, of A. R. Post No. 405, of this city, has been appointed one of numerous aids-camp to Gen. Com. Condon, who says the appointments "are made not merely to confer honor, but in appreciation of the interest manifested and work done in the Grand Army, and with a desire to have those honored put forth their best efforts to advance the interests of the Union."

NOVELLUS HOWELL says of Washington: "I was charmed by the freedom and the genial way social receptions are conducted. I saw no nobility of any kind, nothing but pure good American customs, the one liberty all people enjoy under the stars and stripes."

A QUESTION ABOUT BROWN'S IRON BITTERS.

The question has probably been asked them a hundred times. "Well, it does cure everything." "Well, it does cure everything."

Running a Locomotive While Deadly Sick. Dr. David Kennedy, Randolph, N. Y. DEAR SIR, I am an engineer on the Old Colony railroad, and run the Fall River boat train between Fall River and Lowell, residing in Taunton.

There, on the very topmost twig, that rises and falls with willow motion, sits that ridiculous but sweet-singing, singing, all a Roman-candle fizzes, showers of sparkling notes. If you stand at noon under the tree, you are in a very blue heaven. The tree is musical. The blossoms seem to sing. You feel as if like were a timidity in it, that asked your sympathy and yielded to solatiation.

Three civil engineers employed on the Chesapeake & Ohio railroad, were drowned on Saturday morning by the upsetting of a skiff while crossing the New river, in West Virginia. The drowned were two brothers named Quinby and a man named Jamison.

Stiel was made in Chattanooga on Saturday by the Bessemer process, at the South Tennessee iron works. At the first time this process has been used there, on both iron ore, and the result is declared satisfactory.

It is a bad thing, but Dr. Pierce's Favorite Prescription, deserves its name. It is a certain cure for those painful maladies and weaknesses which afflict the lives of so many women. Of druggists.

Curious to think that ducks and chairs kill people. They do. Taken in large quantities office furniture is fatal as yellow fever. Write and write ourselves away. Sedentary habits produce constipation. In the morning, rheumatism and kidney trouble follow in their lives passed over and in the morning of their lives sought to keep Dr. Kennedy's Favorite Prescription always on hand for the stomach and brain.
